Orchestrating a brighter world

People around the world today face a host of global challenges: terrorism and cybercrime that threaten their everyday security; environmental issues such as intensification of natural disasters due to climate change; scarcity of energy, food and water resources; population growth in developing countries, aging populations in developed countries, burgeoning urban populations and widening interregional disparities.

NEC is committed to resolving these challenges with its ICT assets, especially AI and IoT technologies, and new business models developed collaboratively with customers and partners.

Through these activities, NEC will create social value in the form of safety, security, efficiency and equality, all of which are prerequisites for an abundant society for all people, in the aim of realizing a bright, hope-filled future in concert with people and countries across the globe.

This mission is embodied in NEC’s Brand Statement: Orchestrating a brighter world.
### Performance Highlights

NEC Corporation and Consolidated Subsidiaries

for the fiscal years ended or year-end as of March 31

#### Key Management Measures

- Measures to optimize business portfolio
- Measures to grow business and strengthen financial foundation

#### Fiscal year ended March 31, 2011

- Made NEC Electronics Corporation, a semiconductor business currently Renesas Electronics Corporation, into an equity-method affiliate

#### Fiscal year ended March 31, 2012

- Made the consumer PC business into an equity-method affiliate
- Acquired Global View S.A., a video surveillance services business in Argentina

#### Fiscal year ended March 31, 2013

- Acquired the business support system business of U.S.-based Cenega Corp.
- Acquired the IT service business of Australian-based CSG Limited

#### Fiscal year ended March 31, 2014

- Divested all of NEC’s stakes in NEC Mobility Ltd., currently 500 Mobility Co., Ltd., a mobile phone sales business
- Stopped the development of new smartphones

#### Fiscal year ended March 31, 2015

- Divested all of NEC’s stakes in NEC BIGLOBE Ltd., currently BIGLOBE Inc., an internet service provider in Malaysia, in March 2014
- Made NEC Building Ltd., providing operation and maintenance of IT systems, into a wholly owned subsidiary
- Established NEC Solution Innovators, Ltd. in a reorganization of seven software development subsidiaries
- Established NEC Platforms, Ltd. in a reorganization of four hardware development and manufacturing subsidiaries
- Established NEC Management Partner, Ltd. in a reorganization of four back office operation subsidiaries
- Completed acquisition of an energy storage system business for electric power companies and established NEC Energy Solutions, Inc. in North America

#### Fiscal year ended March 31, 2016

- Transferred administrative staff functions and shared IT assets from NEC to NEC Management Partner, Ltd. (Business Process Optimization Project)

#### Fiscal year ended March 31, 2017 (fiscal year under review)

- Acquired Balanced Internet security company Anyway Information S.A.
- Consolidated Japan Aviation Electronics Industry, Limited

**Notes:**

1. Net profit (loss) attributable to owners of the parent excludes net profit (loss) attributable to owners of subsidiary companies.
2. Dividend payout ratio = dividend per share / earnings per share
3. Dividend yield = dividend per share / current stock price
4. Improvement in energy efficiency of products is based on a comparison with the fiscal year ended March 31, 2006.
At a Glance

Revenue, operating profit (loss), and composition of revenue are financial results for the fiscal year ended March 31, 2017 (IFRS).

(Nota) Figures for revenue, operating profit (loss), and composition of revenue for the fiscal year ended March 31, 2017 are restated to conform with the new segments, which have not been audited by the accounting auditors.

**Public Business**

- **Revenue**: 766.2 billion yen
- **Operating profit**: 33.2 billion yen

**Composition of revenue**

- **29%**

**Public Solutions**

- **Main customers**: Public and regional industries

- **NEC Lighting, Ltd.**: NEC Lighting, Ltd.
- **NEC Management Partner, Ltd.**: NEC Management Partner, Ltd.
Message from the President

To remain an essential company in the eyes of society in 5 years, 10 years and beyond, NEC will create new value by always keeping abreast of what constitutes value for its customers and society.

Since its inception in 1899, NEC has been ethically creating products and services of value to customers under the motto “Better Products, Better Services.” We are committed to remaining a company of choice and trusted by customers and all other stakeholders. This commitment has been captured in the NEC Way, which encapsulates the NEC Group’s management philosophy, vision and business framework. The NEC Way guides all of us at NEC.

Meanwhile, the value that customers and society seek and expect from NEC is constantly changing. Whereas by itself our technologies and products were once a sufficient source of value, customers and society are now tapping into increasingly diverse sources of value. To remain an essential company in the eyes of society in 5 years, 10 years and beyond, we must create new value by constantly keeping our finger on the pulse of what it constitutes. Such an approach is absolutely imperative.

To express this mindset both internally and externally, we adopted “Orchestrating a brighter world” as our Brand Statement in 2014. This Brand Statement reflects NEC’s determination to realize bright, hope-filled societies and ways of life as a leading integrator that possesses both computing and network technologies and combines them with diverse knowledge and ideas in collaboration with people around the world. Guided by the NEC Way, we have chosen the path of creating social value in the form of safety, security, efficiency and equality, all of which are prerequisites for all people, and an abundant society, in the aim of orchestrating a brighter world. To achieve this aim, we have identified the seven themes for social value creation, in which we can help resolve social issues by leveraging our strengths. Continuously providing value as a social value innovator is our approach to sustainability.

Interest is growing globally in building sustainable societies has led to the emergence of international societal frameworks such as the United Nations Global Compact (UNGC), a set of sustainability guidelines for companies. The UNGC encompasses 10 principles pertaining to human rights, labor, the environment and anti-corruption. As a UNGC signatory since 2005, NEC conducts its business activities in compliance with these 10 principles.

In 2015, the UN adopted Sustainable Development Goals (SDGs) that coincidentally have much in common with NEC’s seven social value-creation themes. We believe that by continuing to create social value, NEC will also contribute to the achievement of the SDGs.

Takashi Niino
President and CEO

September 1954  Born in Fukuoka Prefecture, Japan
March 1977  Graduated from the Faculty of Engineering of Kyoto University
April 1977  Joined NEC Corporation
April 2006  Senior Vice President
April 2010  Executive Vice President
June 2011  Executive Vice President and Member of the Board
April 2012  Senior Executive Vice President and Member of the Board
April 2016  President and CEO (Representative Director) (to present)
Renewed Focus on Compliance

Over the course of conducting business activities, NEC was notified by the Japan Fair Trade Commission of a violation of the Act on Prohibition of Private Monopolarization and Maintenance of Fair Trade ("Antimonopoly Act") with respect to transactions with Tokyo Electric Power Co., Inc. (currently Tokyo Electric Power Company Holdings, Inc.) on telecommunications equipment for electric power systems, in July 2016. In February 2017, NEC also received Cease and Desist Orders and Surcharge Payment Orders from the Japan Fair Trade Commission for activities in violation of the Antimonopoly Act with respect to transactions for wireless digital emergency firefighting equipment, and with respect to transactions for hybrid optical communication equipment and equipment for transmission lines for Chubu Electric Power Co., Inc.

Compliance is one of the NEC Group’s top management priorities. The NEC Group has a long history of diligently implementing and continuously operating internal control systems. We sincerely regret and have self-reflected deeply on the repeated violations of the Antimonopoly Act. In response, we are endeavoring to reinforce our entire Group workforce’s compliance mindset by repeatedly reminding all personnel about compliance-related matters, revising our fair trading education curriculum and methods, and stepping up internal reviews and monitoring of fair-trade compliance. These measures are not merely a one-off response. Going forward, we will endeavor to prevent recurrences of violations of the Antimonopoly Act by continuously improving our compliance regime in the aim of regaining trust.

NEC’s Challenge

We have long been expanding our operations by developing and supplying products and services of value to our customers. In the past, our business units’ technologies and products were so valued by customers that we were able to grow simply by upgrading our technologies and products. The more we did so, the more our operations grew. Today, however, customers and society’s needs and wants have evolved and are diversifying so much that we can no longer grow our operations merely by virtue of the technologies or products alone.

To adapt to such change, NEC must mount company-wide efforts that transcend internal organizational boundaries and identify how and where to provide value by innovatively deploying its diverse assets in synergistic combinations. This is the biggest change in NEC’s history. Building the pillars that will drive NEC’s next growth phase in response to this change is the greatest challenge currently facing NEC.

To surmount this challenge, we have designated key business areas in our mid-term management plans and have been allocating resources in pursuit of business expansion. While our efforts are starting to bear fruit in certain areas, we have yet to achieve full-fledged expansion in any of the key business areas. We have so far been unable to build the pillars of globally competitive businesses that will drive our next phase of growth. How do we successfully navigate this challenge? I believe the key to this is management speed.

High-speed Management and the CEO’s Role

Society and customers have been changing at a dizzying pace in recent years. If asked how well NEC’s businesses are adapting to such change, I cannot deny that we lagged in certain areas. To avoid falling behind, and to keep abreast of societal changes and regain leadership stature, NEC must visibly step up its management speed. To do so with a sense of urgency, we have delegated authority to eight C-suite officers tasked with addressing nine issues that require action across internal organizational boundaries. As CEO, I of course assume responsibility for the final outcomes, but a CEO cannot realistically make every decision. The other C-suite officers must make decisions to the extent possible within the range of their respective responsibilities and authority. This initiative is not confined solely to C-suite officers. Our C-suite officers were appointed in the hope they would serve as in-house exemplars of transformation by changing and evolving themselves. I hope that such a transformational spirit is ultimately instilled in each and every front-line employee and pervasively embedded into NEC’s culture. I believe that fostering a culture of thinking for oneself and proactively taking action will revitalize our organization and result in faster management speed.

For NEC to survive in an era of digital transformation, it must swiftly change not only its business models but also everything from its employees’ individual mindsets to its corporate culture.

Given such a reality, I believe my most important role as CEO is to determine the direction of NEC’s evolution and advancement, and foster a culture in which NEC thrives, organizationally and in terms of human resources and its business processes.

In Pursuit of Improved Profitability

NEC aspires to be a leading global company leveraging the power of innovation to realize an information society friendly to humans and the earth. Current profits, however, are still insufficient for NEC to be globally competitive. We must improve our profitability. I believe there are three keys to doing so. The first is to reduce our internal costs. We must thoroughly reduce and eliminate waste arising from unprofitable projects and other inefficiencies. The second is to ensure adequate profits from domestic operations. With domestic markets already highly mature, we assume that our domestic revenue will remain largely unchanged. Customers, by contrast, are constantly changing. Domestic business models likewise are changing dramatically. Amid such an environment, the key issue for NEC is how to transition existing businesses to sufficiently profitable business models.

The third is our mindset vis-à-vis global operations. Future revenue growth is contingent on expansion of our global operations. Such expansion has been a key priority of our mid-term management plans to date. We must bear in mind, however, that we cannot inflexibly cling to

Maximizing Corporate Value Through Co-creation

Digital transformation is driving society toward a major turning point. We see this development as not a mere trend but a watershed event consequential enough to change economies’ industrial structure. As digital transformation continues to progress, new business models and arrangements will emerge. As they do, what NEC is capable of accomplishing on an individual basis will progressively shrink in scope. Going forward, the issue of how to collaborate with customers and various other stakeholders to maximize the value NEC provides will become increasingly important. NEC will engage in an ethical manner such co-creation more proactively than in the past, not only in Japan but also globally.

Lastly, I want to reiterate that all NEC personnel must act fairly and ethically with a bona fide compliance-first mindset. By doing so consistently, we will enhance our corporate value as a sound company while regaining the trust of all stakeholders.

July 2017

Takashi Niino
President and CEO

Commentary on Management Strategy

In fiscal 2017, we reluctantly lowered our revenue and profit forecasts in response to multiple factors, including delivery delays that pushed back substantial revenue beyond the fiscal year end. Failure to land expected orders, sluggish growth in overseas operations and a falloff in hardware sales. Revenue and profits ended up falling short of our initial forecasts.

Targeting a 5% operating margin as one of its key business areas (for example, Safety, SDN/NFV) to target, we aim to expediently move forward by pursuing alliances and/or where feasible M&As.

Other operating margins for existing businesses missed their targets and we encountered delays, mostly overseas, in ramping up the three key businesses. Consequently, we failed to achieve revenue growth.

Operating profit fell sharply from the previous fiscal year, largely as a result of earnings deterioration in the Telecom Carrier and Smart Energy businesses, and unprofitable social infrastructure projects.

Additionally, we provisioned reserves for contingent losses after being found in violation of the Antimonopoly Act, as well as ordered to cease and desist and fined by the Japan Fair Trade Commission in fiscal 2017 in connection with three matters for which we had been under JFTC investigation.

Mid-term Management Plan 2018 Progress and Formulation of Next Mid-term Management Plan

Review of Mid-term Management Plan 2018

Below I review our challenges and accomplishments in fiscal 2017 in terms of our Mid-term Management Plan 2018 and explain our intentions in terms of formulating our next mid-term management plan.

Challenges

Fiscal 2017 proved to be a challenging year that exposed NEC’s shortcomings in bold relief. Our fiscal 2017 operating performance fell far short of our initial forecasts, which we revised downward in January 2017. In my assessment, the biggest factor behind the shortfall were deficiencies in management execution capabilities in terms of responding to changes in market environments and customer trends.

Our Mid-term Management Plan 2018 was initially predicated on predominately overseas revenue growth in the aforementioned three key businesses and flat revenue in our predominantly domestic existing businesses. However, the existing businesses missed their targets and we encountered delays, mostly overseas, in ramping up the three key businesses. Consequently we had failed to achieve revenue growth.

Operating profit fell sharply from the previous fiscal year, largely as a result of earnings deterioration in the Telecom Carrier and Smart Energy businesses, and unprofitable social infrastructure projects.

Additionally, we provisioned reserves for contingent losses after being found in violation of the Antimonopoly Act, as well as ordered to cease and desist and fined by the Japan Fair Trade Commission in fiscal 2017 in connection with three matters for which we had been under JFTC investigation.

Looking Back at the 1st Year of the Mid-term Plan - Challenges

Lack of execution by management team responding to changes in market environments and customer movements

- Financial targets for existing businesses not achieved, while results for new businesses delayed
- Could not execute growth strategy well enough in 3 focus business areas, mainly in the international market

Profitability deteriorated in certain business areas

- Dip in Telecom Carrier business: Need to flexibly allocate resources to focus business areas for optimization, accelerate development of 5G technology targeting the shipment of commercial prototypes in FY19/3
- Slow recovery in the energy business: Loss from operations (excluding one-time costs) decreased. Expect sales growth and profitability improvements, mainly in the large ESS and electrode business
- Booked new unprofitable projects: Accelerate deployment of project management know-how from system integration/services throughout the company during FY18/3

Governance, Compliance

- Received the cease and desist orders and the orders for payment of surcharge
- Booked provision for contingent loss (FY17/3). Anticipate an influence from the nomination suspension (FY18/3)

Given NEC’s current situation, we cannot afford to prioritize any of these three keys over the others. We must simultaneously forge ahead on all three fronts. NEC has long been pursuing a 5% operating margin as one of its targets. This target is now imbued with a sense of critical urgency: if we do not achieve it soon, NEC may not have a future. I am determined to first expeditiously achieve our 5% operating margin target and then further boost our operating margin to a globally competitive level.
Accomplishments

While fiscal 2017 left us with much to reflect upon, we also started to make progress on certain fronts. Fiscal 2017 being our Mid-term Management Plan 2018’s initial year, we focused on implementing the plan’s two management policies: reorganization of profit structure and getting back on the track to growth.

First, reorganization of profit structure, we (1) took remedial action toward underperforming businesses and unprofitable projects, (2) implemented the business process optimization project and (3) worked on optimizing development and manufacturing functions in the aim of realizing a 5% operating margin. Of these three initiatives, the business process optimization project has progressed as planned. In fiscal 2017, it yielded some ¥14 billion in year-over-year cost savings, largely from improvement in operational and IT cost efficiency. Meanwhile, we made steady progress toward realizing ¥10 billion of fiscal 2019 cost savings from optimization of our development and manufacturing functions by reorganizing and merging our domestic hardware development and production subsidiaries and also our domestic software development subsidiaries effective April 1, 2017.

To getting back on the track to growth, we focused on growing our safety, global carrier network and retail IT service businesses, all of which we have designated as key businesses, in the aim of globalizing our Solutions for Society.

In the safety business, our video face recognition technology was ranked first in a benchmark performance test conducted by the U.S. National Institute of Standards and Technology (NIST). Including previous benchmark tests of still-image face recognition, NEC has won four consecutive top rankings in NIST benchmark tests of face recognition technologies. We believe we have firmly established a competitive advantage in the face recognition field. The global carrier network business landed 10 contracts for commercial SDN/NFV projects from major telecom carriers in Europe, the Near/Middle East and North America. Our pipeline of network projects under negotiation also has been steadily growing. We intend to parlay telecom carriers’ growing push to upgrade their networks into expansion of our network business. In the retail IT service business, we were awarded an order and maintenance contract from 7-Eleven, Inc., for a POS system for around 8,600 stores in the US and Canada.

Lastly, we proactively pursued alliances and collaborations with other companies and academic institutions in pursuit of future business expansion in the AI and IoT realms, both of which are crucial for diversifying our Solutions for Society.

Looking Back at the 1st Year of the Mid-term Plan - Achievements

Stable progress in the business process optimization project

Reorganization of Profit Structure

- Business process optimization project: Improved efficiency of back-office operations and reduced expense/IT-related costs by approximately ¥14.0 billion YoY (in line with expectations)
- Optimization of development and manufacturing functions: Integrated subsidiaries of hardware development and production as well as software development

Getting back on the Track to Growth

- Safety: Ranked #1 at face in video evaluation (4th consecutive win including previous benchmark tests of still image face authentication technologies)
- SDN/NFV: Acquired 10 commercial deployment orders from major operators in Europe, the Middle East, North America, etc.
- Retail IT Service: Selected by 7-Eleven, Inc. to provide and maintain POS system
- AI & IoT: Enhanced partnership with academic institutions and commercial partners

Next Mid-term Management Plan

In 2013, we decided to focus on Solutions for Society with the aim of becoming a social value innovator that solves social issues through information and communication technologies. This goal remains unchanged today, underpinning the significance of NEC’s continued existence and growth within society.

To realize this goal, however, we ourselves must personally continue to change faster than the rapidly evolving markets. In preparing our next mid-term management plan, we intend to first revise our mid-term and annual planning processes with the aim of expediting the transition from strategy formulation to execution. Additionally, to upgrade corporate functions, we will accelerate decision-making by progressively delegating authority to C-suite officers and clearly delineating their roles, responsibilities and authority.

Our primary focus in terms of management policy is reforming underperforming domestic operations and otherwise improving domestic profitability while devising specific measures to accelerate overseas growth in our three key businesses. As our primary management objective, we will focus on establishing a profit structure that ensures a 5% operating margin through disciplined management of a well-diversified portfolio of businesses.

We are currently in the process of formulating specific quantitative targets for our next mid-term management plan. Suffice it to say for now that we intend to set responsibly attainable targets that are credible to various stakeholders.

Key Management Agenda

Discuss new mid-term management plan during 2017

Accelerate management speed

- Change the process of mid-term and annual plan formulation
- Enhance corporate functions

Management policy

- Improve profitability of business in Japan, including transformation of underperforming businesses
- Pursue further opportunities in addition to the 3 focus areas, while fundamental policy of international growth unchanged

Set new financial target

- Establish structure to generate 5% operating profit margin
- Portfolio management with discipline
Message from the CFO

We aim to enhance corporate value by investing in growth businesses, further solidifying our financial foundation and keeping a commitment to shareholder returns at the center of our capital policies.

Executive Vice President, CFO (Chief Financial Officer) and Member of the Board

Isamu Kawashima

Fiscal 2017 Performance

The NEC Group recorded consolidated revenue of ¥2,665.0 billion for fiscal 2017, a decrease of ¥159.8 billion yen (5.7%) year-on-year. This decrease was mainly due to decreased sales in the Telecom Carrier business and the Public Business. Regarding profitability, operating profit worsened by ¥49.8 billion year-on-year, to an operating profit of ¥41.8 billion, mainly due to a decrease in gross profit caused by a decline in revenue, despite efforts to reduce selling, general and administrative expenses. Net profit attributable to owners of the parent was a profit of ¥27.3 billion, worsening by ¥48.6 billion year-on-year. This was primary due to the worsening of income before income taxes and increased income taxes. As a result, return on equity (ROE) was 3.4%, a 6.1 percentage point worse than the previous fiscal year. Although the profit attributable to owners of the parent for fiscal 2017 was less than planned, NEC secured profit over the total amount of dividends. As a result, NEC declared an annual dividend of ¥6 per share of common stock, the same value as announced at the beginning of fiscal 2017.

Fiscal 2017 Financial State

Total assets were ¥2,684.0 billion as of March 31, 2017, an increase of ¥155.1 billion as compared with the end of the previous fiscal year. Total liabilities were ¥2,465.0 billion, a decrease of ¥55.4 billion compared with the end of the previous fiscal year to ¥1,508.7 billion, mainly due to an increase of cash and cash equivalents. Non-current assets as of March 31, 2017 increased by ¥99.7 billion compared with the end of the previous fiscal year to ¥1,175.3 billion, mainly due to increases in property, plant and equipment, net, as well as other non-current assets.

We aim to enhance corporate value by investing in growth businesses, further solidifying our financial foundation and keeping a commitment to shareholder returns at the center of our capital policies.

This decrease was mainly due to decreased sales in the Telecom Carrier business and the Public Business. Regarding profitability, operating profit worsened by ¥49.8 billion year-on-year, to an operating profit of ¥41.8 billion, mainly due to a decrease in gross profit caused by a decline in revenue, despite efforts to reduce selling, general and administrative expenses. Net profit attributable to owners of the parent was a profit of ¥27.3 billion, worsening by ¥48.6 billion year-on-year. This was primary due to the worsening of income before income taxes and increased income taxes. As a result, return on equity (ROE) was 3.4%, a 6.1 percentage point worse than the previous fiscal year. Although the profit attributable to owners of the parent for fiscal 2017 was less than planned, NEC secured profit over the total amount of dividends. As a result, NEC declared an annual dividend of ¥6 per share of common stock, the same value as announced at the beginning of fiscal 2017.

Fiscal 2017 Financial State

Total assets were ¥2,684.0 billion as of March 31, 2017, an increase of ¥155.1 billion as compared with the end of the previous fiscal year. Total liabilities were ¥2,465.0 billion, a decrease of ¥55.4 billion compared with the end of the previous fiscal year to ¥1,508.7 billion, mainly due to an increase of cash and cash equivalents. Non-current assets as of March 31, 2017 increased by ¥99.7 billion compared with the end of the previous fiscal year to ¥1,175.3 billion, mainly due to increases in property, plant and equipment, net, as well as other non-current assets.

Revision of Mid-term Management Plan 2018 and Fiscal 2018 Initiatives

Our fiscal 2017 operating performance fell far short of our Mid-term Management Plan 2018’s targets for its initial fiscal year. Our fiscal 2017 performance was hurt by deficiencies in management speed and execution capabilities in terms of adapting to changes in the external environment and customer trends. In fiscal 2018, we will formulate our next mid-term management plan in pursuit of growth overseas and an improvement in domestic profitability, including reform of underperforming businesses. Fiscal 2018 is thus an important year for further solidifying our foundations heading into fiscal 2019, the first year of our next mid-term management plan.

For fiscal 2018, our revenue target is ¥2,800 billion. Although we face a top line headwind in the form of suspension of our eligibility to bid on public contracts in conjunction with the Grant and Desist Orders and Surcharge Payment Orders from the Japan Fair Trade Commission, we aim to achieve our revenue target by expanding our three key businesses (Safety Business, Network Business for Global Industries, Limited. We set our fiscal 2018 targets for operating profit and net profit attributable to owners of the parent at ¥50 billion and ¥30 billion, respectively, factoring in strategic investments and restructuring costs. We plan to achieve these targets through a combination of offensive and defensive action. Offensively, we will execute restructuring and strategic investments in pursuit of growth as planned. Defensivey, we will improve operating efficiency and unprofitable projects’ profitability. By doing so, and continuing to pay annual dividends of ¥6 per share*, we intend to regain your trust.

* Assuming the share consolidation is achieved on October 1, 2017, an annual dividend per share of common stock will be ¥60.
Our History

Guided by the motto, “Better Products, Better Service,” NEC has pursued and provided better products and services to customers since its founding in 1899. Through the years, NEC has successfully risen to the challenges of a wide range of innovation to create social value. These challenges have included everything from the electrograph, the basic technology behind fax machines, to terrestrial stations for satellite communication that support international television broadcasting.

At the same time, the demands of both society and customers today are diversifying. In order to provide value to society and customers alike, NEC must combine the varied assets it possesses, demonstrate ingenuity, and think outside the box about the fields it should enter and the value it will provide. With that said, our desire to provide better value to customers and society is a universal one that bridges every era. With “Orchestrating a brighter world” as our brand statement, we at NEC, taking advantage of dialogue and co-creation with our many stakeholders, remain committed to creating value well into the future.

2012
Delivery of broadcasting equipment to Tokyo Skytree

2014
Formulation of brand message “Orchestrating a brighter world”
In 2014, NEC devised seven themes for “social value creation” based on six “megatrends” that the company identified by taking a wide range of perspectives into consideration, including the environment, society, industry and daily lifestyles. In relation to this, NEC aims to provide for a more fulfilled society and a brighter future through services that promote safety, security, efficiency and equality. This is in addition to creating innovative value together with customers and stakeholders, while maximizing the company’s real-time, dynamic, remote and secure capabilities backed by its information and communications technologies (ICT) and integration skill.

### The NEC Group’s Vision of Social Value Creation

#### Six Megatrends

| 01 | Chain of resources and environmental issues |
| 02 | Growth in emerging countries and their new challenges |
| 03 | Search for innovative society models |
| 04 | Increase in power and influence of individuals |
| 05 | Decentralization of power |
| 06 | Diversified threats and needs for safety and security |

#### The Seven Themes for Social Value Creation

- **Quality of Life**
- **Sustainable Earth**
- **Safety**
- **Security**
- **Efficiency**
- **Equality**
- **One to Many**

#### Value for Society

![Value for Society](image)

- **Safety**: Ensuring a broad range of safety for all, including individuals and organizations
- **Security**: Serving society and the Earth
- **Efficiency**: Realizing sustainable growth
- **Equality**: Closing the social divide and eliminating inequality

#### Four Sources of Value

- ![Real time](image)
- ![Dynamic](image)
- ![Remote](image)
- ![Secure](image)

### One to Many

**Addressing fundamental issues for our customers and society**

To contribute to the resolution of social issues across global markets, NEC must create society-wide value and embed a “One to Many” business model in its corporate culture. NEC is committed to expeditiously providing ever greater value to its customers and society by capitalizing on its ICT assets and wealth of experience to thoroughly fulfill customers’ wants and needs and meet society’s expectations.
Social Value Creation Process

NEC creates social value through the following three-stage process.

1. Awareness of fundamental issues of customers and society
2. Collaboration for generating value such as open innovation
3. Value creation that leverages leading-edge ICT including AI and IoT

As part of this process, NEC also uses NEC Social Value Design™, a design model for creating value for customers and society from societal, cultural, industrial, and other perspectives.

Creating new social value requires a vision of how society should be or what the future should look like from both micro and macro standpoints. The former of which zooms in on factors such as people’s lifestyles and behavioral patterns while the latter zooms out to a city-wide, national or global scale.

This social value creation process involves dialogue and co-creation with a wide range of stakeholders.

NEC Social Value Design™

NEC Social Value Design represents NEC's original way of creating value through co-creation with customers. NEC Social Value Design leads to innovations for business and future society by focusing on two perspectives: User Experience—considering how to improve the value of human experience, and Social Experience—considering the way society should be.

Aiming to Resolve Social Issues as a Member of International Society

NEC actively engages in investor relations (IR) activities, including meetings with shareholders, quarterly financial result briefings and business briefings conducted mainly by its CEO, CFO and Investor Relations Office, a department within the Corporate Strategy Division. Meanwhile, IR staff proactively relay shareholder and investor feedback to management, and periodically report to the Board of Directors. In fiscal 2017, NEC held its first environmentally themed IR meeting with institutional investors.

[For details, see Promoting Environmental Management to Realize a Sustainable Earth on p. 53]
NEC believes that innovation is the key to continually adding value to society, and continuously invests 4-5% of its revenue in R&D. NEC proactively embraces open innovation in addition to intensively investing in its technological strengths. In fiscal 2017, NEC launched a new AI technology brand, NEC the WISE, and initiated four major research collaborations with universities and public research institutions as part of its intensive investment program.

Executive Vice President, CTO (Chief Technology Officer) and Member of the Board
Katsumi Emura

Intensive Investment in Technological Strengths and Proactive Open Innovation

To gain competitive advantage, NEC invests intensively in its distinctive technological strengths, most notably data analysis and research and development visualization technologies.

With in-licensing of external technologies essential to expansion of added value, NEC is an active practitioner of open innovation. NEC embraces open innovation in pursuit of diverse collaborations that extend beyond technology alone. One such example is the NEC University of Tokyo Strategic Partnership Agreement for Future AI Research and Education. NEC is forging ahead with comprehensive co-creation that runs the gamut from basic research to sharing of visions or themes regarding how research results can be applied within society, to social receptivity testing and human resource development.

With its global research facilities in five locations, NEC is hiring and training diverse personnel. While aggressively hiring top-caliber talent at its overseas research facilities in five locations around the world, NEC is also stepping up recruitment of doctorate-degree holders and graduates of globally top-ranked universities in Japan.

Intellectual Property Strategy

NEC treats its intellectual property (IP) as an important management resource that contributes to its Group’s competitiveness and operational stability. NEC strengthens and protects not only its patents and know-how but also the trademarks and designs that underpin its global brands.

In the core Solutions for Society businesses, building an all-encompassing IP portfolio inclusive of customers and partners’ businesses is an important priority. NEC is accordingly creating, building and utilizing an IP portfolio to not only erect IP-based barriers to entry and secure competitive advantage but also strengthen and protect collaborations with customers and partners.

NEC owns some 53,000 patents (including approximately 23,000 Japanese patents) as of March 2017.

R&D Strategy

R&D drives technological development. Through R&D, NEC identifies solutions best-suited to resolve social issues and refines its “No. 1/Only 1” core technologies required to realize those solutions in light of technological trends. By so doing, NEC aims to provide value in the form of Safety, Security, Efficiency and Equality. NEC is proactively utilizing global open innovation throughout its R&D operations with the aim of timely commercialization of technologies under development.

NEC has been expanding its NEC the WISE face recognition, heterogeneous mixture learning and predictive robust optimization technologies’ scope of application by amassing technologies and building a track record of performance over decades.

For example, face recognition has its roots in image analysis technologies. In the early 1960s, the only available image analysis technology was optical character recognition (OCR) capable of recognizing standardized characters only. Subsequent refinements enabled recognition and comparison of large volumes of non-standardized still images, as exemplified by fingerprint recognition. Today’s technologies are capable of recognizing and comparing moving images. This technological advancement was driven by not only increasingly sophisticated recognition algorithms but also major improvements in information processing power and communication throughput engineered by NEC.

To continue improving “No. 1/Only 1” core technologies into the future, NEC is hiring and training diverse personnel. While aggressively hiring top-caliber talent at its overseas research facilities in five locations around the world, NEC is also stepping up recruitment of doctorate-degree holders and graduates of globally top-ranked universities in Japan.

10. Marked a major milestone in the development of facial recognition technology.

NEC Corporation Annual Report 2017
NEC is focusing on seven social value creation themes in light of six megatrends identified through analysis of global economic, societal and technological trends. Capitalizing on its long track record and unique strengths, NEC is endeavoring to resolve challenges facing its customers and society, focusing on the seven themes in particular.

NEC’s social value creation themes are similar to the Sustainable Development Goals (SDGs) adopted by the UN in 2015 in that both involve goals rooted in social issues and otherwise have much in common with each other.

To quantitatively measure the extent to which it is providing value deemed necessary by society and its customers as a social value innovator, NEC is attempting to quantify the social impact of selected initiatives corresponding to its seven social value creation themes, using the SDGs as a model. Examples of the metrics NEC is using to do so include reduction in crime rates, improvement in operating efficiency and percentage reduction in food spoilage losses in distribution channels.

Sharing targets with customers and the general public is important to maximize the value that customers and society are seeking. NEC expects dialogue and co-creation with diverse stakeholders to become increasingly important as a means of sharing targets.

Examples of the fruits of such dialogue and co-creation are presented below.

**Social Value Creation Initiatives**

**Building and Developing Safe and Secure Urban and Administrative Foundations**

As globalization and the concentration of populations in cities progress, new safety risks from cyber attacks are increasing. In addition to detecting potential crimes and disasters before they occur, NEC will contribute to the realization of an administrative platform that demonstrates regional appeal by making use of the power of local residents in addition to support from industry, government, and academia.

**Unique Identification Authority System in India**

Conducted during G7 summit in Japan

**Cutting-Edge Security System Preventing Dangers**

Supporting International Cultural Exchange and Community Events with ICT

Supporting Safe and Secure Event Management

Supporting a national project in India through advanced recognition technologies

India continues to exhibit rapid development spurred by its high economic growth. In order to equally provide education, healthcare, social welfare, and other social services to all residents, a Unique Identification Authority System for identifying each and every citizen has been launched in this country with a population of more than 1.2 billion.

Central to this initiative is an unprecedented, large-scale biometrics system for distinguishing 1.2 billion people, which is equivalent to approximately one-sixth of the world’s population.

The system collects biometric data, including fingerprint, face and iris data, and combines it to match and identify individuals. This enables issuing a unique ID to each and every citizen throughout India.

NEC built a highly reliable system by utilizing the latest technologies in the continuously evolving field of biometrics, such as Face Recognition and Fingerprint Identification. NEC strongly supports the building of societies where people around the world can receive equal treatment and live in prosperity.
### Aiming to Enhance Stability, Safety and Efficiency

#### Deploying Digital Data in Plant Operations

Oil refineries, natural gas plants and other such industrial facilities face the issue of how to operate safely and efficiently with aging infrastructure and workforces. JGC Corporation and NEC are working together to resolve this challenge by synergistically combining JGC’s plant construction know-how with NEC’s “System Invariant Analysis Technology,” a form of AI.

System Invariant Analysis Technology detects signs of abnormalities in plant operations based on correlations among various sensors installed throughout the plant. Such abnormalities are treated as a sign of impending malfunction and promptly addressed. Early rectification of deviations from the norm prevents emergency plant stoppages and helps to alleviate environmental burdens.

### Laying the Groundwork for IoT Ubiquity

#### Indonesia Global Gateway (IGG) Submarine Cable

NEC is engaged in the Indonesia Global Gateway (IGG) project, a large-capacity optical submarine cable connecting nine cities of Indonesia with Singapore. NEC signed a contract with PT Telekomunikasi Indonesia, the country’s largest telecommunications carrier, to lay cables totaling 5,300 km in length. The cable which is expected to be ready-for-service in the first half of 2018, features the latest 100Gb/s DWDM (Dense wavelength Division Multiplexing) technology and it has an initial design transmission capacity of 32Tb/s.

Once IGG is completed, this cable system will not only enhance connectivity between the major cities of Indonesia but it will bridge two other International submarine cables being built by NEC, namely the SEA-US submarine cable system connecting Indonesia to the U.S. and SEA-ME-WE5 submarine cable system connecting Singapore to Europe through the Middle-East. The IGG will empower Indonesia’s domestic communication networks, enhancing connectivity between the major cities of Indonesia but it will bridge two other international submarine cables being built by NEC, namely the SEA-US submarine cable system connecting Indonesia to the U.S. and SEA-ME-WE5 submarine cable system connecting Singapore to Europe through the Middle-East. The IGG will empower Indonesia’s domestic communication networks, while transforming Indonesia into an international communication hub.

### Co-creation with Customers in the FinTech Space

#### Creating New Value by a FinTech Joint Venture with SMBC

Sumitomo Mitsui Banking Corporation (SMBC) and NEC have established a joint venture company “brees corporation” that will offer a new Convenience Store Payment service that allows customers to pay utility bills and online shopping purchases at convenience stores using their smartphones rather than conventional payment slips. Users of the new service, available from 2017, will be able to upload barcodes on payment slips to their smartphones and make payments by scanning the screens at convenience stores. This not only contributes to improving the efficiency of payment processing for convenience stores, but also reduces the costs involved in printing and transporting payment slips for merchants. Users of the service also enjoy the benefit of not having to carry around slips of paper, which, if forgotten, could lead to late payments.

Going forward, brees aims to collaborate with major convenience stores and other retail companies, as well as venture startups, to continue creating new value.

#### Initiative to Improve Agricultural Productivity and Eradicate Poverty and Hunger

#### Facilitating FAO Farmer Assistance Project with e-Money Technology

In Mozambique, where 70% of the population lives in rural areas, improvements in agricultural productivity is a key issue for national development. One means of improving agricultural productivity is widespread distribution of high-quality seeds, seedlings and fertilizer to farmers. The UN’s Food and Agriculture Organization (FAO) has been endeavoring to improve Mozambique’s agricultural productivity by distributing vouchers that partially subsidize farmers’ purchases of seeds, seedlings and fertilizer. Once the vouchers had been used by farmers at agricultural supply stores, the FAO previously collected them and reimbursed the merchants for the vouchers’ value. However, given the vast expanse of Mozambique’s rural regions, collection of paper vouchers and reimbursement of merchants took a long time. Long delays between voucher redemption and reimbursement tied to a problematic situation that tied up agricultural supplies’ working capital, with no means to accurately assess by whom and for what purposes the vouchers were being used.

To resolve these issues, NEC partnered with local companies to build economic infrastructure that utilizes e-money technology. The infrastructure has facilitated smooth distribution of agricultural supplies while also enabling the FAO to provide more effective guidance on improving crop yields based on individual farmers’ purchase histories. Mozambique’s agricultural productivity has consequently improved. The improvement has been accompanied by growth in farmers’ incomes also.

NEC will continue to endeavor to resolve local social issues through global co-creation activities, thereby contributing to customers and society’s sustainable growth.

### Industry Eco-System

#### Supporting a World Recreated with New Bonds of Industries and ICT

Organic integration of people, things and processes through IoT, the rapid digitalization of production and sales activities, the emergence of new business offerings in response to diversified consumer experiences and high-level needs, and many other factors are driving ongoing structural changes in our industries. NEC is delivering next-generation eco-systems for industry through the creation of new digital platforms.
Public Business

In the Public Business, we provide safe, secure and efficient social solutions for Japanese and foreign governments, governmental agencies, local governments, public institutions and other organizations by combining our distinctive technology assets, including network, sensor and analysis technologies, with a broad expertise in systems integration.

Public Business Comprised of Two Areas

Public business consists of “Public Solutions,” which is responsible for business involving regional sales functions and local governments in Japan, the “Public Infrastructure,” which takes charge of business involving government organizations and enterprises supporting national and social infrastructure.

Based on the new organization established in April 2017, the “Public Solutions” considers both the local needs and the required policy seeds. This area works together with regional stakeholders, such as local governments, universities, and businesses, to accelerate the development of new regional businesses, such as smart cities and utilization of the Social Security and Tax Number System (“My Number”), and health care. Based on our many years of achievements gained in supporting government agencies, the “Public Infrastructure” further improves the social infrastructure we provide to support a safe and comfortable lifestyle for everyone.

Revenue

Despite an increase in revenue from Japan Aviation Electronics Industry, Limited, which was made a consolidated subsidiary from the 4th quarter, overall revenues fell 2.6% year-on-year to ¥766.2 billion. This was mainly due to decreased demand for the digitalization of fire and emergency radio in the public solution business.

Operating Profit, Operating Profit Ratio

Operating profit dropped ¥20.3 billion year-on-year to ¥33.2 billion after reduced profitability in the space business, in addition to lower sales.

Strengths

- Strong track record in delivering products and systems that support social infrastructure – such as systems for domestic and foreign governmental organizations, broadcasting companies, and power companies, as well as cyber security – gaining high credibility and advanced technologies during this process. High market share in Japan.
- System integration capabilities developed in the implementation of large-scale mission critical IT systems for governmental agencies and public institutions.
- Unique products and solutions born from our strengths in three technology areas: networks, sensors, and data analysis technologies. (Face recognition and fingerprint recognition technologies, Big Data analysis, etc.)

Weaknesses

- While there is a high proportion of large-scale projects, there are fewer projects with regular income streams, such as in services, leading to exposure to risk from demand volatility.
- Additional costs result from the complexity of project management for large-scale projects and the issues inherent in system development using cutting-edge technology. These costs have an impact on business results. It is necessary to minimize risks with appropriate project management.

Market Environment (Risks and Opportunities)

Risks

- Competition is intensifying, increasing the number of projects with difficult requirements in cost and delivery. As a result, constant improvement of quality and cost competitiveness is necessary.
- Due to the large-scale demand cycle for the implementation of fire and emergency radio and preparation of infrastructure for the “My Number” system, ICT investments by national and local governments are expected to remain relatively low. Moving forward, it will be necessary to develop new markets by uncovering new demand through improvement of our solutions.

Opportunities

- Looking toward the year 2020, we anticipate active investment for the safe, reliable, and efficient operation of major international events.
- Cyber attacks pose a threat recognized around the world, gathering attention and increasing demand for reinforcement of systems and monitoring services for cyber security.
- We expect increased investment toward utilization of ICT across a variety of fields, including application in fields such as health care.
- As part of efforts toward regional revitalization, local areas across Japan are beginning projects aimed at the creation of smart cities and city development that makes use of public and private data.
Public Solutions Business

We provide IT and network systems for local governments and medical institutions, domestically and overseas, and also oversee our local branches across Japan to develop business with close ties to each region.

Executive Vice President  Chikara Nakamata

Fiscal 2017 Main Accomplishments

With business this year related to the My Number system remaining steady, mainly through improvements to mission-critical systems and reinforcement of security for local governments, the infrastructure development business has reached a turning point. With efforts such as the launch of sales for “My Number Card Solutions,” which support the creation of services and businesses that make use of the My Number card, we are further promoting business as we look towards the expanded use of the My Number system.

In the area of disaster prevention systems, we launched our Landslide Prediction System, which visualizes the risk of landslides by detecting the moisture content of earthen surfaces. In addition, we carried out joint testing of a landslide simulation system based on this technology along with Thailand’s National Disaster Warning Center, confirming the efficacy of the system in a forecasting Proof of Concept project conducted in a landslide-prone area in the northern province of Chiang Mai. Demand is growing for advanced disaster prevention systems, especially overseas, and we will continue to focus on expanding our business in the global market.

Cumulative sales related to My Number ¥100 billion

(From the fiscal year ended March 31, 2015 to the fiscal year ended March 31, 2017)

We have focused on infrastructure development for the My Number system for the government agencies and local governments, achieving cumulative sales of about ¥100 billion over the three years since the fiscal year ended March 31, 2015.

Initiatives in the Medium- to Long-Term

Over the past several years, NEC has led the market in infrastructure development for the My Number system, centered mainly on national and local governments. We have been engaged with several systems, starting with the “intermediate server platform” that serves as the foundation of the entire My Number system. As use of the My Number system increases, we believe there will be an expansion of infrastructure and use of the My Number card, along with promotion of public-private partnerships from expanded use of public and private data.

We are working toward the creation of these new markets. In particular, in the area of health care, we expect the realization of effective and efficient health care services through connection with various types of health and medical information. We anticipate that this will become an area of focus for us in the future.

In the area of regional revitalization, we have begun efforts in a variety of regions toward co-creation of local communities by industry, government, and academia. For a new kind of city development using public and private data, we are working to create new business by providing data linkage and utilization services, as well as an IoT platform that serves as a mechanism to sense, gather, and use a variety of data within a city or town. We are realizing regional coordination through the use of ICT, and thereby contributing to regional revitalization and the resolution of social issues.

Public Infrastructure Business

We provide social infrastructure that allows for everyone to have a safe and comfortable lifestyle, in the form of large-scale mission critical systems and network systems for domestic and foreign governmental agencies, local governments, broadcasting stations, and power companies.

Executive Vice President  Kazuhiro Takada

Fiscal 2017 Main Accomplishments

In the area of cyber security, we are contributing to strengthening the security of government institutions through technologies that are unique to NEC, such as through support contracts for the “Cyber Defense Exercise with Recurrence” (CYDER) put on for local governments in 11 regions around Japan by the National Institute of Information and Communications Technology (NICT). Outside of Japan, we have carried out cyber defense exercises in ASEAN countries and approved the acquisition of Brazilian security firm Arcis Informatica S.A., carrying on our efforts to strengthen our global position.

With the year 2020 in mind, we are steadily improving our solutions for realizing safe and secure city development. With improvements to the crowd behavior analysis technology within our state-of-the-art AI technology group, “NEC the WISE,” we have developed technology capable of predicting and estimating crowd sizes and flow with high accuracy and in real time using security cameras. Additionally, in conjunction with the G7 Ise-Shima Summit held in May 2016, we conducted a Proof of Concept project, in collaboration with the Tokyo Metropolitan Police Department, of an advanced security system that performs real-time detection of crowd size and automatically detects suspicious objects using security cameras.

Initiatives in the Medium- to Long-Term

In order to realize safe and reliable city development in preparation for the year 2020, we expect safety improvements and development of infrastructure such as authentication systems to prevent suspicious persons from entering critical facilities, and surveillance systems to protect the safety of pedestrians. Using NEC’s facial recognition technology, which has demonstrated the world’s top level of accuracy for both video and still images, and our proprietary AI technology, we will contribute to safe and reliable city development with our immigration control systems and a new means of security services.

Cyber security is an important area in which we expect market growth over the medium to long term. We will continue to be proactive in expanding our business in this area. Specifically, we are focusing on our steadily expanding security monitoring service and cyber-defense training services for domestic and foreign government agencies. Furthermore, we are working to realize growth through NEC’s unique solutions development, which combines product technologies with systems integration capabilities.
Enterprise Business

NEC provides IT solutions in manufacturing, retail and services, and finance in the private sector, helping customers to launch new services. We will resolve social issues and create value for customers through value chain innovation utilizing ICT assets such as IoT and AI.

Weaknesses

- Reliability and achievements cultivated over many years of providing IT services to domestic clients in the manufacturing, retail and service, and financial industries.
- The knowledge and expertise we have developed in manufacturing innovation at our own plants as a company in the manufacturing industry, as well as SCM transformation for global corporations.

Market Environment (Risks and Opportunities)

Risks

The market in IT for domestic private firms has many competitors, and competition on price continues to be intense. The question of how to secure profits in this area is an issue. Furthermore, we expect a decrease in existing business in areas in the medium term due to rapid adoption of cloud computing in Japan.

Weaknesses

- In order to achieve further growth, we will transform to a business model that makes use of knowledge and resources accumulated for each industry and client and consolidates them across the organization.

Opportunities

A market that utilizes IoT has been created, and we expect the establishment of a new foundation for growth. The expectations for and role of ICT are expanding as a solution, both for global problems, such as food waste and energy consumption, as well as for social issues like changes in the human resources environment due to a shortage of labor.

Fiscal 2017 Main Accomplishments

We have accelerated development, both in Japan and abroad, of value chain innovation for our total SCM that connects manufacturing, logistics, retail and quality of life. In the IT service business for retailers, we strengthened solutions that provide new value, such as an omni-channel environment, where goods can be purchased, regardless of sales and distribution channels. Furthermore, 7-Eleven, Inc. (the United States based company of 7-Eleven) selected NEC as a vendor to provide point of sale (POS) systems and maintenance services for approximately 8,600 stores throughout the US and Canada.

There is also a trend of increased provision of services that make use of advanced ICT, such as IoT and AI. For the manufacturing industry, we launched our "Visual Manufacturing Solution," which realizes next-generation innovation in production using IoT. We also provided a "Warehouse Product Inspection System" for the logistics company of the KADOKAWA Group.

In addition, we are also moving forward with efforts to cooperate with our clients, such as our collaboration with DENSO Corporation, which began in the fiscal year ended March 31, 2017, in the fields of advanced driver assistance, automated driving, and manufacturing. We also established brees corporation, a joint venture with Sumitomo Mitsui Banking Corporation, to commercialize FinTech services that combine financial services with IT.

Initiatives in the Medium- to Long-Term

The three years starting from the fiscal year ended March 31, 2017 have been positioned as a period of solidifying a base for growth in the Enterprise Business. Efforts are underway to transform the SI model, to establish a business foundation geared toward global expansion, and to create new value through IoT. As part of our work to build this system, we are promoting the creation of a business execution system based on vertical integration, encouraging the consolidation of technology assets and resources for each area by strengthening collaboration with other departments. For areas of business, we are focusing on NEC's strengths: the IT service business for retailers, manufacturing co-creation*, and the creation of new services for financial institutions. We are looking to expand our business with these areas at the core. In the IT service business for retailers, we are adding to the know-how we have accumulated from 40 years of providing IT services to domestic retailers, strengthening new solutions to enable safe, secure and efficient store management for 24 hours a day, 365 days a year as well as to further improve consumers’ experience. We are looking ahead to apply these ideas to other industries as we aim for global expansion of our business. In manufacturing co-creation, we are combining cutting-edge technologies, like IoT and AI, together with our own manufacturing innovations and knowledge gathered from reforming SCM for global companies as part of efforts to increase the value provided by NEC and to expand into new areas of business. In addition, with the transfer of business for financial institutions to the Enterprise Business as of April 2017, we are aiming to enhance NEC’s lineup of financial services and solutions by reinforcing collaboration with the retail and service industries in the area of FinTech.

* Manufacturing co-creation

Collaboration program where NEC offers enhanced solutions based on its own production innovation expertise through facilitating information exchange between customers, executing joint research or conducting Proof of Concept projects, etc.
Telecom Carrier Business

We provide network control platform systems and operating services for operations management, along with equipment for network implementation. NEC’s wealth of experience in large-scale network implementation and strong technical capabilities help us contribute to the resolution of social issues by providing safe, reliable, and efficient high-value-added networks for the age of IoT through the creation of value with our clients and business partners.

Strengths

- Track record of delivering for telecom carriers: fixed and mobile telecom products, IT system in Japan, and an accumulation of technology know how.
- Successful delivery to over 250 telecom carriers worldwide in the TOMS area.
- Industry-leading solutions in SDN/NFV, such as vEPC*1 and vCPE*2, which combine operations and services.

Market Environment (Risks and Opportunities)

Risks

- There is risk of Japanese telecom carriers further curtailing capital investment, and there is the possibility of intensified competition as the market becomes more borderless.

Opportunities

- Commercial deployment of SDN/NFV has begun. These technologies contribute to network transformation through outcomes such as faster delivery of services, optimization of network resources, and reduced operating costs for telecom carriers. Also, we expect demand for TOMS to continually increase. Additionally, we anticipate expanded business opportunities through the commercialization of the 5G generation mobile communications system (5G).

Weaknesses

- Business model in the international market is dependent mainly on equipment business.
- Business structure is easily impacted by restrained capital investment in the domestic business.

Revenue

<table>
<thead>
<tr>
<th>Year</th>
<th>Revenue (Billion ¥)</th>

<th>Operating Profit Ratio</th>
</tr>
</thead>
<tbody>
<tr>
<td>2016</td>
<td>699.0</td>
<td>45.6</td>
<td>6.6%</td>
</tr>
<tr>
<td>2017</td>
<td>600.4</td>
<td>18.1</td>
<td>3.0%</td>
</tr>
</tbody>
</table>

Due to sluggish capital investment by telecom carriers, in Japan and overseas, and the influence of the strong yen, there was a 12.9% decrease year on year down to 600.4 billion.

Due to a sales decline, as well as the influence of the strong yen, there was a decrease of ¥27.5 billion year on year, down to ¥18.1 billion.

(Fiscal year ended on March 31)

Fiscal 2017 Main Accomplishments

We worked toward expansion of business in the fields of TOMS and SDN/NFV, working along with Netcracker Technology Corporation, a subsidiary of NEC on the systemization of solutions that support rapid adoption SDN/NFV by telecom carriers. In addition, we secured 10 commercial projects for vEPC and vCPE from major global telecom carriers in Europe, the Middle East, and North America.

For the commercialization of 5G, we developed a massive-element Antenna System (AES) that achieves efficient transmission using high frequency bands. In addition, we jointly conducted a Proof of Concept project within DOCOMO for Massive MIMO (Multiple Input Multiple Output), a core technology for realizing high quality 5G transmission with high speed and capacity.

In our existing business areas, we finished construction of the “Asia Pacific Gateway (APG),” a high-capacity optical submarine cable that links 11 countries and territories between Japan and Singapore. We handed the completed cable over to a consortium of 13 companies from Japan, the US, and Asia.

We also developed a solution that links PASOLINK with our lineup of AI Technologies “NEC the Wise” to quickly build and configure optimal networks by analyzing network information with AI, and efficiently operating those networks.

Risks

- There is risk of Japanese telecom carriers further curtailing capital investment, and there is the possibility of intensified competition as the market becomes more borderless.

For 5G, we are accelerating the development of features such as high speed and capacity, low latency, and multiple simultaneous connections, which will be required of networks for new services in the age of IoT, such as transmission of 4K and 8K high-definition video and automated autonomous driving. Sales will steadily improve with the timely introduction of these products and services to the market.

In this business, we contribute to business transformation through co-creation with our customers, actively proposing value to those customers in new areas while working to maintain and expand our businesses. We will keep our awareness of the constantly changing market as we continue to work toward providing rich communications that support diversity and the creation of social value.

Expanded introduction of TOMS and SDN/NFV, Conducting Proof of Concept projects and developing technology for the commercialization of 5G

- Increasing our results for the introduction of TOMS and SDN/NFV, our major focus business over the medium-long term.
- Developing core technologies to commercialize 5G and conducting Proof of Concept projects with clients.

Initiatives in the Medium- to Long-Term

Business expansion for TOMS and SDN/NFV is the key for medium-to long-term growth in the telecom carrier business. With a tailwind in the market environment, momentum for deploying TOMS and SDN/NFV is increasing among the global telecom carriers. Within those conditions, NEC is contributing to larger profits and reduced capital investment and operational costs for our customers by creating value through the continuous improvement of solutions that integrate networks with IT, such as AI and linking TOMS with SDN/NFV.

These efforts are in addition to our other strengths, such as our ability to propose TOMS solutions, our customer base, and our commercial deployment track record of SDN/NFV.

For 5G, we are accelerating the development of features such as high speed and capacity, low latency, and multiple simultaneous connections, which will be required of networks for new services in the age of IoT, such as transmission of 4K and 8K high-definition video and automated autonomous driving. Sales will steadily increase with the timely introduction of these products and services to the market.

In this business, we contribute to business transformation through co-creation with our customers, actively proposing value to those customers in new areas while working to maintain and expand our businesses. We will keep our awareness of the constantly changing market as we continue to work toward providing rich communications that support diversity and the creation of social value.
System Platform Business

In the System Platform Business, we provide products for business, ranging from terminals to network and computer equipment, software products and service platforms, as well as integrated platforms based on them. We deliver labor-saving and efficient platforms for customers, while at the same time creating new value such as IoT platforms based on ICT as we contribute to the expansion of solutions for society.

Strengths

- Distinguished group of technologies*, including SDN, Big Data, the cloud, and security.
- Reliability and high quality cultivated under an intensively competitive domestic market; high share in Japan.
- Comprehensive capabilities with a wide range of assets necessary for building ICT platforms, from the cloud to devices such as networks and sensors.

Weaknesses

- Compared with global mega vendors, the scale of business is smaller due to many areas being specialized for the Japanese market, leading to relatively lower profits.
- In areas of growth, such as the cloud and SDN, we cannot fully utilize our own resources, and the expansion of our business is still in progress.

Market Environment (Risks and Opportunities)

Risks

- We expect a downward trend centered on our existing products and an increasingly competitive environment as progress toward the cloud and open systems continues. Furthermore, in areas such as IoT and AI, more companies will enter the market, including those from other industries.

Opportunities

- The markets for SDN and the cloud have grown considerably, and new needs, such as for a hybrid cloud and for vertically integrated infrastructure, are expanding. In addition, as markets launch in the future for IoT and AI, we expect expansion of areas that utilize ICT. On the other hand, development requires a much greater sense of speed than ever before in order to further strengthen our position in the market.

Revenue

Revenue was ¥719.9 billion, a decrease of 1.2% year-on-year, mainly due to decreased sales in hardware and enterprise networks.

Operating Profit, Operating Profit Ratio

Operating profit decreased by ¥2.6 billion year-on-year, to an operating profit of ¥29.6 billion, mainly due to decreased sales.

Weaknesses

* The world’s leading image recognition technology, including face recognition, advanced Big Data analysis technology, technology related to SDN, vector computing technology, etc.

Strengths

*1 The world’s leading image recognition technology, including face recognition, advanced Big Data analysis technology, technology related to SDN, vector computing technology, etc.

Fiscal 2017 Main Accomplishments

In Fiscal 2017, we have worked toward improving products and services to expand business in areas where we expect market growth, with a focus on SDN and IoT.

In the area of SDN for enterprises, we are putting in effort to expand our list of services to promote the introduction of SDN for customers in all industries with the goal of expanding our SDN business even further. In addition, we are carrying out various policies to expand the use cases for SDN, and to promote its use “on site” in locations other than an office by improving our co-creation activities with those who design and build infrastructure systems at sites such as factories and shops.

In regards to IoT, we began introducing our “Walkthrough Face Recognition System,” which is capable of recognizing faces without any need to stop in front of a camera, for use in managing entrances and exits from facilities or event venues. We also launched sales of our “Human Behavior Analysis Services,” which support marketing policies for a store by analyzing the behavior of customers using video footage from cameras inside the store. Through these efforts, we are strengthening our product lineup that makes use of our face recognition and image analysis technologies.

In terms of improving our cost competitiveness and as part of our gradual efforts to strengthen our domestic development and production systems, we launched a new company that unifies group-wide development and production of IT and network products. This company was formed by restructuring and integrating a total of five companies and departments, including NEC Platforms, Ltd. and NEC Network Products, Ltd.

Initiatives in the Medium- to Long-Term

In order to maximize value in the System Platform Business, it is essential to increase sales in key areas such as cloud platforms, SDN, Big Data, and security. To accomplish this, we must allocate resources to research and development, as well as capital investment, in order to become more focused and efficient. In particular, we will pursue greater profits by pushing for comprehensive improvements to our sales system, such as improving efficacy of our development costs, reducing costs, and increasing added value on our products for all of our existing businesses, which make up a large portion of the present System Platform Business.

Beyond that, we will be certain to link market growth with the expansion of our business by demonstrating our unique strengths in key areas with growing markets, such as SDN, Big Data, the cloud, and security.

In our IoT platform business, we will develop solutions and services that rotate around our competitive technologies, such as video analysis and security, and we will increase the value we provide to our customers. By providing high quality common platforms, including networks, with a sense of speed, we plan to contribute to the expansion of NEC’s IoT business and change the trajectory of its growth.
International Business Structure
(As of July 1, 2017)

NEC is working to grow globally while leveraging the strengths of its businesses in each market by locating regional headquarters in North America, Central and South America, EMEA (Europe, the Middle East and Africa), China/East Asia, and APAC (Asia Pacific). NEC has declared “Global Contributions through Solutions for Society” as a medium-term theme, striving for growth in key businesses and securing the profitability of core businesses.

The safety business’ track record includes several achievements during the fiscal year ended March 31, 2017. These include the delivery of a face recognition system for customs use at John F. Kennedy International Airport in the United States, and the adoption of a biometric identification system for government institutions in Australia. We have also steadily increased orders, accurately capturing rising global demand with respect to safety.

In the upcoming fiscal year, we will build on our concentration of resources in key fields and regions, investing strategically to quicken the pace of growth in key businesses. Beginning with the safety business, where we utilize technology benchmark tested by the U.S. National Institute of Standards and Technology (NIST), we will seek out business expansion with a focus not only on SDN/NFV (network functions virtualization), which telecom carriers are poised to begin to adopt full scale, retail and bus/fleet (bus transit) systems, but also on managed services, which are poised for growth in the APAC region.

North America
Toshiya Matsumi
Executive Vice President
NEC Corporation
In Charge of the Global Business Unit

NEC Corporation of America continued to see success in our focused growth areas by engaging at a more strategic level with our customers. We secured a major contract with 7-Eleven, Inc. to provide our point of sale technology in all North American stores. We also made progress with the federal government’s border protection initiatives using our biometrics solutions, and won significant customs inspection contracts with key state law enforcement agencies.

A major SAP® HANA migration project with the Ladies Professional Golf Association (LPGA) highlighted our Infrastructure as a Service (IaaS) private cloud activity for the year. Finally, FAPDUNK/EX-Advanced launched in North America as a market leading broadband wireless alternative to fiber-based data connections.

Central and South America
Masazumi Takata
Senior Vice President
NEC Corporation
President & CEO
NEC Latin America

NEC Latin America’s business is strongly aligned with the region’s needs, which drives us toward our goals and targets. During the fiscal year ended March 31, 2017, our efforts to realize SDGs resulted in the winning of a biometrics project that helps provide students in Chile with fair access to meals, thereby contributing to the equality of society. NEC Latin America continues to focus on providing our customers and partners with the best solutions in our market for MSS, as we aim to be the No. 1 value provider in Safe Cities utilizing a wide range of advanced assets from NEC.

For continuous growth, the region needs to boost innovation and productivity, which NEC Latin America aims to contribute to as we focus our efforts on new business segments, especially in the retail, agriculture and Bus Rapid Transit (BRT) fields. Going forward, NEC Latin America looks forward to achieving our goals as we continue supporting our customers, partners and the people of Latin America through the orchestration of a brighter world.

China/East Asia
Naoki Yoshida
Senior Vice President
NEC Corporation
President
NEC (China)

As a regional headquarters, NEC (China) covers China, Hong Kong, Macau and Taiwan, as well as Korea. In this capacity, we are broadly involved in the region in fields that include security, retail and other solutions, along with communication systems, PBX/servers, and displays.

Regarding security, we provide fingerprint identification, face recognition and other biometric identification systems, and work with governmental agencies, inspection systems and custom inspection systems to justice systems, law enforcement agencies, airports and other entities in each country and region. In the field of retail, in addition to providing POS and IT systems primarily for convenience stores, we provide a highly rated around-the-clock maintenance service, which is available to customers mainly in Taiwan. With restrictions to displays, we are broadly developing opportunities particularly in China in areas that include digital cinemas for movie theaters and products for airports and subways as we expand business. Beyond this, in Hong Kong, as an advanced base in the bus/retail (bus transportation system) field, we are providing technological support not only for the Hong Kong market but also for NEC’s global activities.

NEC (China) will continue to promote business expansion particularly in the fast-growing Chinese market, while strengthening partnerships with some of the region’s most prominent companies to create new business.

APAC (Asia Pacific)
Tetsuro Akagi
Senior Vice President
NEC Corporation
President & CEO
NEC Asia Pacific

NEC Asia Pacific is responsible for the ASEAN, Southwest Asia and Oceania market, collectively recognized as one of the worlds’ fastest growing regions. Using ICT to contribute to development in each country, we conduct business each day in ways that ensure NEC Asia Pacific is a company that society needs.

During the fiscal year ended March 31, 2017, we took steps to further expand Solutions for Society, most notably in safety arena, while positioning telecom carrier business as our core field. Successes during the year include orders from a number of ASEAN countries for an e-passport system featuring biometric identification. We also won for face recognition systems from law enforcement agencies in various countries, such as the South Australia Police. Additionally, we provided an intelligent bus management system for City of Pune, India, delivered digital terrestrial broadcasting equipment for a state broadcasting station in the Philippines, and conducted demonstration trials of a flood simulation system in Thailand. Through these efforts, NEC Asia Pacific contributed to the region’s expected social infrastructure in countries across the region.

NEC Asia Pacific is committed to delivering innovative solutions to communities in the region and leading NEC’s global business expansion.

EMEA (Europe, the Middle East and Africa)
Masahiro Ikeno
President & CEO
NEC Europe

NEC Europe promotes a sustainable society by providing solutions tailored to the diverse needs of more than 100 countries across Europe, Russia, the Middle East and Africa.

During the fiscal year ended March 31, 2017, a rise in safety and security needs triggered by acts of terrorism and other incidents doubled the order volume in the safety field, including solutions for airports and other vital infrastructure. In the telecom carrier business, we received orders for projects in the growth fields of TOMS and NFV from major carriers in Italy and Saudi Arabia, as we accelerated business development in this area. In terms of network business for the corporate sector, we expanded hospitality solutions, most notably for hotels.

With increasing demand for safety and other Solutions for Society expected to remain strong in the EMEA region, we will continue to accelerate business expansion in the upcoming fiscal year. In Europe, we will realize a secure, safe and efficient society by promoting smart cities and other globally cutting-edge initiatives. In Russia, the Middle East and Africa, where high future growth is expected, we will provide solutions including communications and energy, contributing to both business expansion and the realization of a more abundant society.

Shinsuke Takahashi
President & CEO
NEC Corporation of America

NEC is working to grow globally while leveraging the strengths of its businesses in each market by locating regional headquarters in North America, Central and South America, EMEA (Europe, the Middle East and Africa), China/East Asia, and APAC (Asia Pacific). NEC has declared “Global Contributions through Solutions for Society” as a medium-term theme, striving for growth in key businesses and securing the profitability of core businesses.

The safety business’ track record includes several achievements during the fiscal year ended March 31, 2017. These include the delivery of a face recognition system for customs use at John F. Kennedy International Airport in the United States, and the adoption of a biometric identification system for government institutions in Australia. We have also steadily increased orders, accurately capturing rising global demand with respect to safety.

In the upcoming fiscal year, we will build on our concentration of resources in key fields and regions, investing strategically to quicken the pace of growth in key businesses. Beginning with the safety business, where we utilize technology benchmark tested by the U.S. National Institute of Standards and Technology (NIST), we will seek out business expansion with a focus not only on SDN/NFV (network functions virtualization), which telecom carriers are poised to begin to adopt full scale, retail and bus/fleet (bus transit) systems, but also on managed services, which are poised for growth in the APAC region.

Overall, we see continued opportunity to become a strategic partner for digital transformation for more of our customers over the near term by leveraging the Internet of Things, analytics and artificial intelligence.
Initiatives Supporting Sustainable Management

NEC is advancing initiatives targeting ESG (Environment, Society, Governance), which is fundamental to sustainable management. Aiming for the sustainable development of society and the NEC Group, NEC has defined essential themes that prioritize ESG initiatives while also aiming to improve management from a non-financial standpoint. However, it is essential to establish specific themes and targets for the ESG initiatives, to tie these more closely to management, and to promote sustainable management that maximizes the value NEC provides to society through its businesses as a Social Value Innovator. From the fiscal year under review, NEC has again outlined its ESG strengths and challenges, launching initiatives aimed at reestablishing the materiality of how these contribute to its selectivity and concentration in management resource allocation. Based on the information gained through dialogue with a diverse set of stakeholders, NEC will define its materiality by measuring the degree of impact it has on society.

Environment

In 1970, NEC launched an organization dedicated exclusively to responding to environmental problems, and has been proactively addressing a range of issues ever since. Leveraging the skills and expertise gained in the process has proven useful in resolving client and society issues. This is why NEC promotes programs designed to integrate this knowledge within its businesses. Among the issues addressed, climate change is seen as an area in which NEC’s businesses have a high degree of impact on society. For this reason, NEC announced that it will prioritize initiatives outlined in the “Environmental Management Action Plan 2020/2050”, a long-term action plan for environmental activities that seeks both to mitigate and adapt to climate change.

Society

NEC recognizes human rights as one of the most significant themes for society. Together with concern for the human rights of employees and suppliers, NEC is putting systems and mechanisms in place to protect the privacy of citizens when delivering services through ICT. NEC is also promoting the creation of diverse human resources. Fostering an environment from which diverse perspectives and ideas can emerge and foster innovation is an important management strategy. Furthermore, in order to put NEC’s most treasured value since its founding in 1899, “Better Products, Better Services,” into practice, it is prioritizing efforts to deliver even more improvement in customer satisfaction, quality and safety as a company responsible for social infrastructure delivered through ICT.

Governance

In addition to enhancing management transparency, soundness and promptness, NEC is strengthening its corporate governance by clarifying its accountability and careful consideration of fairness in information disclosure. This is all in an effort to continuously create social value and maximize corporate value. In particular, NEC recognizes that compliance is indispensable to the promotion of sustainable management, and is striving for even more rigorous governance in order to realize and embed compliance as the first priority into its corporate culture.

Corporate Governance

In recognition of the fact that reliable corporate governance is essential to the continuous creation of social value and the maximization of corporate value, NEC is committed to strengthening its corporate governance practices through (1) assurance of transparent and sound management, (2) realization of prompt decision making and business execution, (3) clarification of accountability and (4) timely, appropriate and fair disclosure of information.

Main Initiatives for Strengthening Corporate Governance

1. Instituting Corporate Officer System

NEC instituted a corporate officer system in April 2000 and worked to delegate authority from the Board of Directors to corporate officers with the aim of separating management supervision from business execution and expediting business execution based on prompt decision making.

2. Reducing the Number of Directors

The number of Directors was reduced to streamline the Board of Directors. The aim is to ensure even sounder management through greater discussion at meetings of the Board of Directors and to deliver prompt decision making.

3. Appointing Multiple Outside Directors

NEC added an Outside Director in June 2001 for a total of two Outside Directors in order to strengthen the supervisory functions of the Board of Directors. The number of members has increased and the system of five Outside Directors has continued since its inception in June 2007.

4. Shortening Directors’ Terms

In June 2006, the term of Directors was shortened from two years to one year in order to clarify their responsibility for management.

5. Establishing a Nomination and Compensation Committee

The committee has been established to enhance transparency of nomination and remuneration of Directors. The committee is made up of five members, including three Outside Directors, one of whom is appointed as the chairperson.

6. Instituting the Chief Officer Position

The Chief Officer position was instituted in July 2011 to strengthen a company-wide strategy for realizing the NEC Group Vision. In April 2017, NEC extended the authority delegated to the Chief Officers in order to strengthen the corporate functions and accelerate the speed of decision making.
The above headcount includes 2 Directors and 1 A&SBM who retired at the close of the 178th Ordinary General Meeting of Shareholders held on June 22, 2016.

NEC does not disclose remuneration per individual. NEC’s basic remuneration policies and systems are also disclosed in the Business Report, the annual Securities Report and Corporate Governance Report.

The Executive Committee discusses important NEC Group management issues such as policies and strategies. This committee extensively discusses matters of particular importance prior to putting them forward to the meetings of the Board of Directors for approval. In doing so, the committee enhances the deliberations and ensures appropriate decision making.

### Nomination and Compensation Committee

The Nomination and Compensation Committee deliberates on (i) nomination for Directors, Representative Directors and Audit & Supervisory Board Members (KANSAYAKU) (“A&SBMs”), the chairman of the Board, and the president and (ii) the structure and the level of compensation for Directors, representative Directors and corporate officers with taking the business result of NEC and other conditions into account and from an objective perspective. The committee reports the results of its deliberations to the Board of Directors.

The A&SB holds regular meetings basically once a month and extraordinary meetings as necessary, decides on audit policies, the plan of annual agenda during the fiscal year ended March 31, 2017. The A&SBM answered a questionnaire about the role, composition and operation of the Board of Directors, and the Board of Directors discussed its functional advancement based on the results of such questionnaires.

For further details on the corporate governance of NEC Corporation, please visit the following URL:

http://www.nec.com/en/global/about/governance.html

### Remuneration for Directors and Audit & Supervisory Board Members (KANSAYAKU)

**Introduction of a New Performance-linked Stock Compensation Plan**

Based on the resolution at the 179th Ordinary General Meeting of Shareholders held on June 22, 2017, NEC introduced a new performance-linked stock compensation plan using a trust for its Directors (including Outside Directors) and corporate officers (“Beneficiaries”).

The purpose of this plan is to clarify the link between the value of the shares based on NEC’s performance and remuneration of Beneficiaries. Under this plan, the Beneficiaries share with the shareholders not only the benefits deriving from future appreciation of share prices, but also the risks associated with a fall in the same. This is intended ultimately to enhance the awareness of the Beneficiaries with respect to making a contribution to an improvement in NEC’s mid and long-term performance and its corporate value.

### Remuneration System

For the purpose of continuously improving corporate value and strengthening its competitiveness, NEC’s basic policy on the remuneration for Directors and A&SBMs is to set the level and system appropriate for a global company which enables NEC to secure excellent human resources and serve as an incentive to improve performance of the NEC Group.

**Remuneration for Directors**

Remuneration for Directors consists of fixed monthly remunerations and performance-linked bonuses as short-term incentives, and performance-linked stock compensation as mid- and long-term incentive. Neither bonuses nor stock compensation are paid to Outside Directors, from the viewpoint of securing their independence from NEC because NEC expects that Outside Directors play a leading role in supervision over business execution.

For more details, please visit the following URL:

http://www.nec.com/en/global/about/governance.html

### Evaluation of the Effectiveness of the Board of Directors

Since the fiscal year ended March 31, 2016, NEC conducted an analysis and evaluation of the effectiveness of the Board of Directors in order to strengthen the Board of Directors’ functions. Based on the conclusion of such analysis and evaluation, NEC updated the contents to be reported to the Board, improved the format of the meeting materials, made material distribution earlier and revised the plan of annual agenda during the fiscal year ended March 31, 2017.

**Evaluation Method**

NEC conducted the analysis and evaluation, in which each Director and A&SBM answered a questionnaire about the role, composition and operation of the Board of Directors, and the Board of Directors discussed its functional advancement based on the results of such questionnaires.

For more details, please visit the following URL:

http://www.nec.com/en/global/about/governance.html
Ensuring Compliance

For a company like NEC, which develops solutions for society, obtaining and maintaining the trust of society and its customers is of the utmost importance. To that end, compliance and ethical management are fundamentals at NEC, and we consider compliance to include not only legal compliance, but also compliance with the expectations and demands of society, such as social norms and common sense. Also, from the perspective of risk management, we have worked to minimize our compliance risks, such as competition law compliance, or risks stemming from bribery and fraud.

In fiscal 2017, we received notification of three violations of Antimonopoly Act from the Japan Fair Trade Commission. We accept these facts solemnly and sincerely, and along with a renewed commitment to make compliance a top priority, we are strengthening our internal systems, education, and awareness in order to prevent recurrences and restore trust. Each one of our officers and employees will act fairly and with integrity, working to conduct business activities with compliance as our top priority.

Based on our Competition Policy established in October 2011, NEC is striving to reduce the risk of being suspected of or becoming involved in a cartel or bid rigging, it has prepared rules for the prevention of cartels and bid rigging, and outlined regulations to restrict unnecessary contact with competitors. In addition, NEC and its subsidiaries around the world have established anti-bribery system and rules, working to prevent bribery in relation to our business activities through efforts such as bribery risk evaluations for businesses or work under our purview, and due diligence of appointed contractors. We have clarified our guidelines and procedures, as well as what to pay attention to when providing gifts, hospitality and travel expenses.

However, in fiscal 2017, we received notification of three violations of Antimonopoly Act from the Japan Fair Trade Commission. We accept these facts solemnly and sincerely, and along with a renewed commitment to make compliance a top priority, we are strengthening our internal systems, education, and awareness in order to prevent recurrences and restore trust. Each one of our officers and employees will act fairly and with integrity, working to conduct business activities with compliance as our top priority.

Fostering a Corporate Culture that Makes Compliance a Top Priority

In addition to strengthening the above systems, NEC is working to foster a corporate culture where compliance is a top priority through education and awareness activities. Top-level executives, starting with the CEO, periodically release words about the importance of compliance, and every year we hold the NEC Business Ethics Forum to raise awareness of compliance through lectures given by the CEO and external experts. Also, once every year we hold a Workplace Roundtable meeting at each workplace where employees are encouraged to think of compliance as their own problem, and we are also providing information on compliance through our company intranet.

In addition to strengthening the above systems, NEC is working to foster a corporate culture where compliance is a top priority through education and awareness activities. Top-level executives, starting with the CEO, periodically release words about the importance of compliance, and every year we hold the NEC Business Ethics Forum to raise awareness of compliance through lectures given by the CEO and external experts. Also, once every year we hold a Workplace Roundtable meeting at each workplace where employees are encouraged to think of compliance as their own problem, and we are also providing information on compliance through our company intranet.

Fostering a Corporate Culture that Makes Compliance a Top Priority

In addition to strengthening the above systems, NEC is working to foster a corporate culture where compliance is a top priority through education and awareness activities. Top-level executives, starting with the CEO, periodically release words about the importance of compliance, and every year we hold the NEC Business Ethics Forum to raise awareness of compliance through lectures given by the CEO and external experts. Also, once every year we hold a Workplace Roundtable meeting at each workplace where employees are encouraged to think of compliance as their own problem, and we are also providing information on compliance through our company intranet.

Aiming as an Organization to Never Again Violate the Antimonopoly Act

Even while undertaking these initiatives, we received certified notification of our violations of the Antimonopoly Act from the Japan Fair Trade Commission. Even now we are further strengthening our mechanisms to promote thorough awareness so that we may become an organization that never again violates competition law through actions such as bid rigging.

In fiscal 2017, we submitted a pledge to eliminate bid rigging, with all officers and employees of NEC and its domestic subsidiaries declaring to do away with bid rigging practices.

In addition to strengthening the above systems, NEC is working to foster a corporate culture where compliance is a top priority through education and awareness activities. Top-level executives, starting with the CEO, periodically release words about the importance of compliance, and every year we hold the NEC Business Ethics Forum to raise awareness of compliance through lectures given by the CEO and external experts. Also, once every year we hold a Workplace Roundtable meeting at each workplace where employees are encouraged to think of compliance as their own problem, and we are also providing information on compliance through our company intranet.

Aiming as an Organization to Never Again Violate the Antimonopoly Act

Even while undertaking these initiatives, we received certified notification of our violations of the Antimonopoly Act from the Japan Fair Trade Commission. Even now we are further strengthening our mechanisms to promote thorough awareness so that we may become an organization that never again violates competition law through actions such as bid rigging.

In fiscal 2017, we submitted a pledge to eliminate bid rigging, with all officers and employees of NEC and its domestic subsidiaries declaring to do away with bid rigging practices.

In addition to that, from April 2017 to June 2017, we directly communicated over 100 times with our officers and employees in regard to the three certified violations of the Antimonopoly Act, detailing what happened within the Company, how the case was handled by human resources, and what should be learned from the incident. By having the Company directly communicate the facts, we have increased employees’ acceptance of the events and awareness of compliance.

Effective April 1, 2017, NEC established the position of Chief Compliance Officer (CCO). Moving forward, the CCO will take the initiative to ensure that the lessons from these three violations are not forgotten within the Company, while promoting additional efforts to make compliance a fundamental part of our corporate culture.

For a company like NEC, which develops solutions for society, obtaining and maintaining the trust of society and its customers is of the utmost importance. To that end, compliance and ethical management are fundamentals at NEC, and we consider compliance to include not only legal compliance, but also compliance with the expectations and demands of society, such as social norms and common sense. Also, from the perspective of risk management, we have worked to minimize our compliance risks, such as competition law compliance, or risks stemming from bribery and fraud.

View your own actions objectively for thorough compliance

The word “integrity” is the basis of occupational ethics for professional accountants. Put simply, this word means, “don’t lie” and “don’t deceive.” While it may be nothing if not obvious to say this, most scandals that emerge happen because of a lack of integrity. Intentional criminal behavior aside, it is entirely possible for individuals, thinking they are acting in the interest of a client or the organization, to inadvertently violate rules, cover up facts or deceive others.

To prevent this, I think the most effective approach may be to have an individual objectively observe their decisions and actions. In other words, the idea is to have them consider the impact or likely outcome of their decisions and actions, and to be able to explain why this happened to someone else. The same thing applies to a company’s management. I definitely feel that deliberation by the Board of Directors, and particularly questions and guidance from the varied perspectives of the Outside Directors and Audit & Supervisory Board Members (“A&SBMs”), is crucial for boosting transparency. And if management objectivity and transparency are enhanced, employee awareness will be, as well. This, in turn, will lead each employee to see the actions they take in carrying out their duties each day more objectively.

A year has passed since my A&SBM appointment. As part of my duties, thinking of ways to address compliance and risk is never far from mind. With that said, as an Outside A&SBM, I strive to keep an objective viewpoint, and want to sidestep excessive risk avoidance in the hope that I can support rational risk taking and dynamic corporate activities.

Outside Audit & Supervisory Board Member (A&SBM) Kazuyasu Yamada

Advancing self-transformation and achieving growth through innovation

Technology in fields, such as ICT, AI and IoT, is evolving at a pace far faster than we could have imagined. To meet these trends in a timely manner, it is important for NEC to continuously create customer value by honing its technology in these fields, sparking innovation, and developing new business models. As NEC competes on a global stage, simply responding to changes that happen is too slow, and offers no prospects for significant growth. Transforming oneself is more important and essential.

On the one hand, NEC should closely examine what it considers its core technologies to be, and rigorously refine them until they are the best in the world. At the same time, in fields where NEC faces challenges, it is being asked to take steps to adopt external technologies and move away from overreliance on self-sufficiency, all while taking the initiative in open innovation.

From this perspective, I offer insights based on my own experience for the projects we discuss at meetings of the Board of Directors, doing my utmost to assist in the effort to speed up NEC growth strategies.

There is another vital role I play as an Outside Director. That is the ability to speak objectively from a position of fairness as an outside observer, thereby ensuring that corporate governance functions properly. In particular, I consider it the top priority to deeply embed the phrase “Compliance First” among NEC’s employees. Through the utilization of the Board of Directors, I fully expect NEC to quickly arrive at a growth trajectory prefaced on the idea of “Compliance First.”
Directors and Audit & Supervisory Board Members

[As of June 22, 2017]

Directors

Nobuhito Endo
Chairman of the Board (Representative Director)
After being engaged in the management of NEC as President (Representative Director) since 2015 and as a Chairman of NEC (Representative Director) since April 2016.

Takashi Niino
President (Representative Director) and CEO
After being engaged in the management of the financial divisions, business divisions and NEC Group’s management strategies, Mr. Niino has been engaged in management of NEC as President (Representative Director) and CEO since April 2016.

Isamu Kawashima
Executive Vice President, CCO (Chief Commercial Officer) and Member of the Board (Representative Director)
After being engaged in the management of marketing and financial affairs of the business units and overseas subsidiaries, Mr. Kawashima is in charge of NEC Group’s accounting and financial strategies.

Takayuki Horita
Executive Vice President, CEO (Chief Executive Officer) and Member of the Board (Representative Director)
After being engaged in the management of NEC’s global divisions, Mr. Horita is in charge of global business strategy.

Katsumi Emura
Executive Vice President, CCO (Chief Commercial Officer) and Member of the Board
After being engaged in the management of business divisions and general management of NEC, Mr. Emura is in charge of NEC Group’s technology strategy.

Hajime Matsukura
Executive Vice President, CCO (Chief Commercial Officer) and Member of the Board
After being engaged in the management of corporate strategy as well as in the corporate departments and in the NEC Group’s corporate communications, Mr. Matsukura is in charge of the NEC Group’s corporate strategies.

Takeshi Kunibe
Director/President (Representative Executive Officer), Sumitomo Mitsui Financial Group, Inc.
Mr. Kunibe has extensive experience and deep insight into management of a bank.
- Attendance at meetings of the Board of Directors: 11 out of 12

Hitoshi Ogita
Member of the Board
Adviser to the Board, Audits Group Holdings, Ltd.
Mr. Ogita has extensive experience and deep insight into management of manufacturing company.
- Attendance at meetings of the Board of Directors: 11 out of 12

Kazumi Sasaki
Member of the Board
President and CEO, Sumitomo International Inc.
Mr. Sasaki has wide range of knowledge on marketing and perspective of consumers.
- Attendance at meetings of the Board of Directors: 12 out of 12

Makoto Oka
Member of the Board
Senior Advisor, Sompo Japan Corporation
Mr. Oka has extensive experience and deep insight to management of a general trading company including the management in overseas firms.
- Attendance at meetings of the Board of Directors: 12 out of 12

Kunio Noji
Member of the Board
Chairman of the Board, Komatsu Ltd.
Mr. Noji has wide range of experience and deep insight to management of a manufacturing company.
- Attendance at meetings of the Board of Directors: 9 out of 12

Notes:
1. NEC has notified the Tokyo Stock Exchange of its basic independent Directors and three independent Audit & Supervisory Board Members (KANSAYAKU-KAI).

Audit & Supervisory Board Members (KANSAYAKU-KAI)

Tetsuya Fujisaka
Audit & Supervisory Board Member (Full Time)
Mr. Fujisaka has extensive experience in management for more than 20 years as a former General Manager of Corporate Finance Division.

Hajime Kinoshita
Audit & Supervisory Board Member (Full Time)
Mr. Kinoshita has extensive experience in management for more than 20 years as a former President of NEC Europe.

Kyoko Okumiyama
Audit & Supervisory Board Member
Mr. Okumiyama has a lot of experience and professional insight as an attorney at law.
- Attendance: At meetings of the Board of Directors: 12 out of 12
- Attendance: At meetings of the Audit & Supervisory Board: 17 out of 17

Takeshi Kikuchi
Audit & Supervisory Board Member
Attorney at Law
Mr. Kikuchi has a lot of experience and professional insight as an attorney at law in the field of M&A and Intellectual Property.
- Attendance: At meetings of the Board of Directors: 12 out of 12
- Attendance: At meetings of the Audit & Supervisory Board: 17 out of 17

Kazuyasu Yamada
Audit & Supervisory Board Member
Certified Public Accountant
Mr. Yamada has a lot of experience in audit and accounting.
- Attendance: At meetings of the Board of Directors: 10 out of 10
- Attendance: At meetings of the Audit & Supervisory Board: 13 out of 13

Board of Directors

Directors
11 Directors
6 Inside Directors
5 Outside Directors (of which 4 are independent Directors)

The Board of Directors makes important decisions regarding the Company’s business operations, starting with deciding on its basic management policies. It also fulfills the responsibility of supervising business execution, and therefore requires newsmanship based on broad knowledge. The Board of Directors is comprised with consideration given to diversity in such factors as career background, specialties and gender.

Audit & Supervisory Board (KANSAYAKU-KAI)

5 Audit & Supervisory Board Members

2 Inside Audit & Supervisory Board Members

3 Outside Audit & Supervisory Board Members (All members are independent Audit & Supervisory Board Members)

NEC appoints as Audit & Supervisory Board Members personnel who have the knowledge and expertise necessary for audits, such as considerable expertise in finance and accounting or experience as an attorney at law, and who strengthen the auditing functions of the Audit & Supervisory Board.
Cross-company Corporate Strategy Promotion Framework

(As of July 1, 2017)

NEC introduced its Chief Officer System in 2011 in order to promote the execution of strategy that spans across the entire company. From April 2017, we have increased the number of Chief Officers and are promoting the delegation of authority to each of them to further improve the speed of our management.

Specifically, we have appointed eight Chief Officers to cover nine themes representing efforts that go beyond the boundaries of our business units and Group companies. These officers determine the strategies for the areas they specialize in that extend beyond the framework of each business unit and Group company, and work to solve issues that affect the entire company.

Here, each of the Vice Presidents and Chief Officers, who are in a position to plan and execute cross-company strategies, will introduce the issues they face in their respective areas and their efforts to solve those issues.

Manabu Kino shita
Senior Executive Vice President, Executive Officer
Driving Company-wide Growth Through Customer-Oriented Social Value Innovation

In order to solve increasingly complex social issues and continually contribute to society, the sales staff, who are the point of contact with our customers, must have a deep understanding of the market and make use of the technologies and strengths we have cultivated to create the future we are aiming for.

We will train our employees to be able to think from the outset with the ability to quickly and appropriately grasp changes in the market and to think about these in new ways. We will also offer value proposals that make use of our corporate technology assets, like AI, and make full use of the knowledge and solutions held by both business unit and related company, and also achieve co-creation with our customers and sales partners. Through these activities, we will drive company-wide growth and management with a sense of speed.

Takayuki Morita
Executive Vice President and CCO (Chief Global Officer)
Speedy Policy Development for Realizing Global Growth

NEC’s biggest challenge is the realization of “growth.” To meet that challenge, NEC must assume its role ranging business portfolio down to businesses that can win in the global market, concentrating resources and prioritizing investment into these businesses. In addition to these kinds of organic policies, we will also broadly and speedily move forward with inorganic policies, such as co-creation with customers, partnering with governments, international organizations, and other companies, and also acquisition of other businesses, in order to achieve growth. As CCO, I will emphasize safety and security, SOROINP and IoT, and promote these policies to allow NEC to achieve growth as an industry leader.

Norihiko Ishiguro
Senior Executive Vice President
Becoming a Global Social Value Innovator

The building of safe and reliable cities and public services, and the formation of communication infrastructure that supports a thriving society, are some of the seven themes for social value creation presented by NEC. These themes are deeply connected to the SDGs, which are universal issues affecting developed and emerging countries around the world. Through IT and sales activities global to national and local governments for each country, international organizations, and local companies, NEC is aiming to be an innovator that can contribute to the solution of the world’s issues as a global Social Value Innovator.

Isamu Kawashima
Executive Vice President and CIO (Chief Financial Officer)
Reforming Cost Structure and Response to Underperforming Businesses While Redistributing Resources for Growth Areas

In fiscal 2017, new businesses failed to pick up as expected while existing businesses were on the decline. The emergence of underperforming businesses and problems with compliance also caused business performance to take a major downturn. For the next fiscal year, we will enhance compliance while also promoting reforms to our profit structure and identifying the foundation for improved financial performance in fiscal 2018. From the financial side, we will support the execution of business with a balance of offensive and defensive through measures such as capital investment to realize growth strategies, and shifting resources as required to meet our goals.

Katsumi Emura
Executive Vice President and CTO (Chief Technology Officer)
Creation of Business Based on Technology that Leads to the Next Level of Growth for NEC

By envisioning the society of tomorrow and its issues, and carrying out a wider range of problem solving and value creation activities, we aim for our new growth as well. We can create a competitive business by building a research and development strategy that is integrated with our business strategy, and thus further improve our own strength.

In order to advance these efforts with a sense of speed, we will use NEC’s technological strengths, such as image-processing technologies like face recognition, AI technologies, named as “NEC in the MET,” and security solutions, to drive collaboration with external partners. Promotion of strategic cooperation with other firms, large-scale collaboration with universities and research institutes, and the use of venturing, beyond what we have traditionally done, will lead to the creation of even greater value.

Kazuo Sakai
Executive Vice President, CIO (Chief Information Officer) and CSO (Chief Information Security Officer)
Preparing IT for the Realization of Digital Management

IT will become even more important in the age of digital transformation. NEC is contributing to the sophistication of business management systems by expanding digital utilization and supporting digital management based on business management infrastructure that has improved over the year. It is also promoting the enhancement of IT infrastructure that takes advantage of NEC’s strengths, including AI, IoT, closed, and security.

Makoto Enomoto
Senior Vice President, CMO (Chief Marketing Officer)
Establishing a Brand Image Centered Around “Co-Creation” as a Supportive Transformative Partner in the Digital Age

To realize our goal of becoming a sustainable company, we are working to improve the aspect of “co-creation” in addition to NEC’s reliable and friendly brand image. The CMO office actively oversees the story of “One NEC,” from a company-wide perspective, and in doing so we improve our ability to disseminate information, supporting the idea of our branding that makes NEC “the partner for transformation,” recognized by its customers.

In addition, we will quickly recognize market trends and the expectations of our customers, and incorporate these into our strategy with a sense of speed.

Shinobu Obata
Executive Vice President, CCO (Chief Compliance Officer)
How to Establish a Corporate Culture of Compliance

In fiscal 2017, NEC received formal notification from the Japan Fair Trade Commission for three violations on our part in the Antimonopoly Act of Japan. The NEC Group has for a long time regarded compliance to be a major issue for management and is for one which it has taken various measures. As Chief Compliance Officer, I will work diligently to prevent recurrence of such violations. In order to restore trust in NEC, we will reinforce compliance within our corporate culture, not allowing these incidents to be forgotten within the NEC Group.

For further details on the corporate officers of NEC Corporation, please visit the following URL:

Katsuo Nakamura
Executive Vice President and CHRO (Chief Human Resources Officer)
Increasing Profitability and Getting on a Trajectory of Growth Based on Excellent Technology and Resources

The needs of the customer are constantly shifting due to changes in the structure of society and the evolution of technology. In order to deal with these changes, we support the transformation of NEC by encouraging the development of employee skills and promoting the strategic placement of human resources.

In addition, we also aim to improve productivity through changes in work style and to promote diversity by changing our style of work through careful arrangement of our work environment, so we can change NEC into a company where diverse human resources can play an active role. Through these efforts, we will improve the organizational capabilities of the NEC Group to achieve globalization.

Hajime Matsukura
Executive Vice President, CIO (Chief Strategy Officer)
Improving Earning Power in the Workplace

We will redesign our company-wide strategy with the goal of accelerating our business model shift and improving the value we provide. To that end, we need to thoroughly classify the appropriate allocation of resources, as well as improving our business mix and driving active business portfolio changes. In this way, we will thoroughly continue to have open and essential communication between management and the employees on site, until they can share the same perspective. Our goal is to both create an organization that consistently transforms itself without lagging behind market changes, and to improve earning power in the workplace.

Susumu Makihara
Executive Vice President and CTO (Chief Technology Officer)
Increasing Profitability and Getting on a Trajectory of Growth Based on Excellent Technology and Resources

The needs of the customer are constantly shifting due to changes in the structure of society and the evolution of technology. In order to deal with these changes, we support the transformation of NEC by encouraging the development of employee skills and promoting the strategic placement of human resources.

In addition, we also aim to improve productivity through changes in work style and to promote diversity by changing our style of work through careful arrangement of our work environment, so we can change NEC into a company where diverse human resources can play an active role. Through these efforts, we will improve the organizational capabilities of the NEC Group to achieve globalization.
Human Rights and Diversity

The NEC Group Human Rights Policy was formulated as a declaration of NEC’s commitment to respect human rights in all of its corporate activities, and reject both child and forced labor in any and all circumstances. NEC also gives the utmost care to avoiding any violation of human rights, including invasions of privacy, in the provision of its services. This commitment applies to the suppliers that comprise NEC’s supply chain and their employees. NEC strives for respect of human rights that encompasses the rights of women and persons with disabilities as well. NEC holds that the dynamic utilization of diverse human resources, and the incorporation of different perspectives and ideas, are essential to the creation of new value and innovation. NEC thus promotes diversity and inclusion with this view in mind.

Measures to Protect Privacy

In recent years, new businesses have emerged from the collection and usage of data from a broad range of devices, through evolutionary advancements in IoT and other technologies. While these technologies may, on the one hand, benefit society, they can also open the way to violations of human rights from the consumer’s standpoint. Privacy protection in data usage is a particularly important human rights issue, and NEC works on it actively with governments, research institutes and ICT companies.

Aiming to promote business that makes use of visual images, NEC has led the launch of an investigative project that calls for cooperation from 35 companies and research institutes to create rules that protect the privacy of the consumer. The rules drafted by this project were proposed to a working group established by the relevant ministry and agencies for reviewing how to treat visual images in terms of privacy protection. This led to the publication of an official guidebook on the use of visual images and the protection of privacy.

Responding to the Modern Slavery Act

The Modern Slavery Act 2015 (“MSA”) is one of the most important pieces of legislation regarding human rights in the UK. From the fiscal year ended March 31, 2017, NEC created opportunities in the UK and Japan for employees to learn about and debate the MSA, with the goal of deepening understanding of the law.

Furthermore, in April 2017, NEC launched the “Data Distribution Strategy Office.” It has been working in active cooperation with external experts to promote initiatives for personal data usage focusing on privacy such as strategy and solution planning, policy proposals and communication to related stakeholders.

In September 2016, NEC Europe issued its first statement in reference to NEC Europe, its subsidiaries and supply chain working to be in accordance with Section 54 of the MSA. Based on the goals of the MSA, NEC Europe conducts audits to assess risks in its supply chain, such as forced labor and human trafficking.

Career Formation and Raising Awareness for Women

In the rapidly changing world of ICT, increasing the number of human resources that possess diverse perspectives and ideas is a vital concern. With this in mind, NEC has proactively sought to hire more women from scientific backgrounds since 1980.

During the fiscal year under review, NEC held “Summer Riko-Challe 2016” (Science and Engineering Challenge 2016), a dialogue event for junior high and high school girls aimed at conveying the excitement of working in the computer science and engineering field. Through a showroom tour and conversations with female researchers and engineers, the event provided a great opportunity for participants to witness how R&D and product development contribute to society, and to feel how closely ICT affects their lives.

Providing Society with More Individualized Services from a Female Perspective

“I have been involved in encryption and security research since joining NEC. There is a co-creative effort gaining momentum globally around the creation of a secure, robust and fair networked society that respects privacy. Cryptography has emerged as a technology for protecting individual information, even from organizations that possess massive volumes of information or crunch large amounts of data. With blockchain technology, the aim is to realize both fairness and transparency without relying on a central authority. Roughly half of the people in our world are women. Incorporating that perspective, we will provide society that are more closely tailored to individuals.”

Co-creation Activities with Customers Incorporating Diverse Perspectives

In October 2016, Mr. Daisuke Uehara, a silver medalist in Para ice hockey at the 2010 Paralympic Games in Vancouver joined NEC. By promoting branding and co-creation activities with customers that leverage Mr. Uehara’s insight as a Paralympian, NEC is taking steps to make society defined by diversity a reality.

Paralympian Perspective Comes to NEC

“After giving a lecture at NEC on para sports, I received a request from NEC helping NEC employees incorporate a Paralympian perspective in the run up to 2020. This culminated in me formally joining NEC. Many of our local government customers have some unease about the decision – what exactly should they be doing ahead of 2020? Would paralympians be looking to use local gymnasiums? I personally pay visits to these customers, doing my best to assist them in taking first steps in these directions. While collaborating with regional headquarters and branches across Japan, my hope is to solve issues that local governments face for 2020 and beyond, and thereby build even friendlier relationships with them.”
Further Promotion of Environmental Management Contributing to the Realization of a “Sustainable Earth”

In line with the seven themes of social value innovation under the “Orchestrating a brighter world” campaign, NEC is promoting co-creation with customers and gaining recognition from them for providing great value toward solving environmental issues. That value has come to be incorporated into our business thinking. The kind of “environmental management” we should strive for would not simply work to preserve the Company’s environment, but would create a business on its own that contributes to the resolution of environmental issues. I believe we have come close to achieving this. Meanwhile, in 2015 the UN proposed its “Sustainable Development Goals (SDGs),” and a worldwide agreement on policy to combat climate change was reached in the Paris Agreement. In response to all of this, NEC aims to contribute to the realization of a “Sustainable Earth” as a sustainable company that is conscious of our coexistence with the planet. We have been working from 2016 on expanding value provided that focuses on measures to combat climate change.

Promotion of the “NEC Group Environmental Management Action Plan 2020/2030,” the Key to Our Measures Against Climate Change

NEC has devised the “NEC Group Environmental Management Action Plan 2020/2030” as a medium- to long-term target, positioning climate change as a high priority theme (material) and working to resolve social issues pertaining to the environment. The three points on the right are our measures related to climate change.

1. Contribution to “mitigation” of climate change
   - Reduction in emissions of customers and society through the provision of IT solutions
   - Improvement in product energy efficiency
2. Contribution to “adaptation” to climate change
   - Preparing for the impacts of climate change through the provision of Solutions for Society
3. Reduction of emissions from business activities
   - Improvement in CO2 emission through efficiency of energy use during business activities
   - Conversion to renewable energy

Developing an Original Method to Quantitatively Evaluate “Adaptation” to Climate Change

NEC is developing and providing systems that support safe and secure lifestyles, such as preventative measures against natural disaster risks that increase from climate change, and effective evacuation guidance for times when disasters strike. One example is our “Flood and Landslide Simulation System,” which uses ICT such as NEC’s unique sensing and Big Data technologies to “visualize” the risks of landslides or flooding. Additionally, in regard to issues such as overstocking and losses from waste, which could also be considered modern-day food problems, NEC’s “Product Demand Forecasting Solution,” based on its independently developed heterogeneous mixture learning technology, can greatly reduce defects, overstocking, and waste losses by eliminating mismatches between manufacturing, distribution, and sales.

In order to expand this kind of value in a controlled, goal-oriented manner, NEC has worked with the Waseda Environmental Institute to jointly develop a quantitative method for considering the reduction of impact from climate change through IT solutions as equivalent to suppression of CO2 emissions. By propagating these kinds of ideas, we are helping to further accelerate our “adaptation” to climate change.

Aiming for Five Times the Value Provided Against Environmental Burden

By using these kinds of quantitative methods, NEC hopes to provide five times more value against the environmental impact of its supply chain by 2020. The results for fiscal 2016 were that we increased the value we provided up to 2.4 times our environmental burden. We will continue to aim for our goal, promoting greater value provided and reducing the environmental impact of our supply chain.

Improvements to Environmental Management through Dialogue with Our Stakeholders

Holding Meetings on ESG with Institutional Investors

In response to an increasing need among investors for ESG information, we are promoting greater understanding of our efforts in non-financial areas. As we grasp the ESG information requested by investors, we are aiming to improve our disclosure of information, and in July 2016, we held an IR meeting specializing in the “E” (environment) of ESG. 15 institutional investors from 13 companies participated in the meeting, leading to lively discussion with questions such as a request to more clearly show the connection between environmental activities and the management index, or what our future plans are for expanding the scale of our businesses related to SDGs. We received comments from participants that indicated they were better able to understand after hearing explanations in the directors’ own words, and that their impression of NEC improved after the meeting. We also received positive feedback expressing interest in participating in the next meeting.
Participation in SPEAR, a joint development project for a next-generation electricity network in Singapore

Along with Space-Time Insight, which has delivered numerous data analysis and visualization solutions, mainly to major European and US power companies, NEC and NEC Asia Pacific are participating in the Singapore Power Energy Advanced Research and Development (SPEAR), a next-generation power grid joint development project promoted by Singapore Power, which is Singapore’s largest electricity company. In this project, we are investigating efficiency improvement of capital investment and maintenance based on big data analysis, real-time visualization and analysis of power failures, and advanced power failure management that accurately predicts expected recovery time.

Taking advantage of the experience we gain through this collaborative project, we will accelerate the creation of new technologies and solutions that combine ICT and energy, and will continue to further expand the smart energy business in the Asia Pacific region.

Trial using flood and landslide simulation system in Thailand

In collaboration with the National Disaster Warning Center (NDWC), NEC conducted a trial of its system to predict inundation areas and landslide hazard areas.

Thailand is a country where floods are frequent. The flood of the Chao Phraya River in 2011 was a particularly damaging event, resulting in extensive damage to many industrial parks and urban areas, including Bangkok. This caused severe disruption of the global supply chain, and had a major impact not only on the Thai economy but also on the world economy. Further, landslides caused by heavy rain are also a frequent occurrence in Thailand, and because of the extensive human suffering and material damage they cause and their negative impact on logistics due to road closures. For these reasons, countermeasures to mitigate damage from floods and landslides have become critical issues.

In these trials, NEC ran simulations based on various data such as weather, topography, river, and soil conditions to predict inundation areas, maximum flood levels, levels of landslide risk etc., for up to 7 days in advance, and then confirmed the effectiveness of the system.

Going forward, NEC will continue to promote the advancement and utilization of disaster prevention ICT for floods and landslides in Thailand, and utilize the experience and know-how gained from these trials to proactively engage in the proposal of this system to other Asian countries that frequently suffer damages from floods and landslides.

This trial is NDWC’s first disaster prevention cooperation project between Thailand and Japan. NEC conducted this trial in collaboration with the Embassy of Japan in Thailand as part of the “Research and study for the development of a flooding simulator in Thailand” project commissioned by Japan’s Ministry of Internal Affairs and Communications, and the “Research and study for the development of a landslide simulator in Thailand” project.

*1 Figures for 2016 are a comparison to March 2006 fiscal year products. Data to a minimum baseline comparison year, 2017 figures are a comparison to March 2016 fiscal year products.
*2 Greenhouse gas refer to CO2 (carbon dioxide), CH4 (methane), N2O (nitrous oxide), HFCs (hydrofluorocarbons), PFCs (perfluorocarbons), SF6 (sulphur hexafluoride), and NF3 (nitrogen trifluoride).
*3 Greenhouse gas emissions are calculated based on the following categories stated by the Greenhouse Gas Protocol (GHG Protocol).
*4 Scope 1: Direct GEP is emissions from sources that are owned or controlled by the Company.
*5 Scope 1 and 2 GEP is emissions from consumption of purchased electricity, heat or steam.
*6 Scope 1 and 2 GEP from energy sources that are owned or controlled by the Company.

Corporate Overview

Note: The shareholding ratio is calculated by excluding the number of treasury stock (0,86,317 shares).
• All other names may be trademarks of their respective owners.

Effects of economic conditions, volatility in the markets generally, and fluctuations in foreign currency exchange and interest rates. The factors that may influence the operating results include, but are not limited to, the following:

• Risks arising from acquisitions, business combinations and reorganizations, including the possibility that the expected benefits cannot be realized or that the transactions may result in unanticipated adverse consequences.

• Developments in the NEC Group’s alliances with strategic partners.

• Effects of expanding the NEC Group’s global business.

• Risk that the NEC Group may fail to keep pace with rapid technological developments and changes in customer preferences.

• Risk that the NEC Group may lose sales due to problems with the production process or due to its failure to adjust to demand fluctuations.

• Deficits in products and services.

• Shortcomings in material procurement and increases in delivery cost.

• Acquisition and protection of intellectual property rights necessary for the operation of business.

• Risk that intellectual property licenses owned by third parties cannot be obtained and/or are discontinued.

• Risk that the NEC Group may be exposed to unfavorable pricing environments due to intensified competition.

• Risk that a major customer changes investment targets, reduces capital investment and/or reduces the value of transactions with the NEC Group.

• Risk that the NEC Group may be unable to provide or facilitate payment arrangements (such as vendor financing) to its customers in terms acceptable to them or at all or risk that the NEC Group’s customers are unable to make payments on time, due to the customer’s financial difficulties or otherwise.

• Risk that the NEC Group may experience a substantial loss of, or an inability to attract, talented personnel.

• Risk that the NEC Group’s ability to access the commercial paper market or other debt markets are adversely affected due to a downgrade in its credit rating.

• Risk that the NEC Group may incur large costs and/or liabilities in relation to internal control, legal proceedings, taxes and governmental policies, environmental laws and regulations, tax practice, information management, and human rights and working environment.

• Consequences of natural and man-made disasters.

• Changes in methods, estimates and judgments that the NEC Group uses in applying its accounting policies.

• Risk that the NEC Group may incur liabilities and losses in relation to its retirement benefit obligations.

The forward-looking statements contained in this material are based on information that NEC possesses as of the date hereof. New risks and uncertainties come up from time to time, and it is impossible for NEC to predict these events or how they may affect the NEC Group. NEC does not intend to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise.

The information contained in Annual Report 2017 is also available on NEC’s website.
