

Carrier Solution Business Growth Strategy

– Network Infrastructure Business toward NGN -

March 7,2007

Botaro Hirosaki, Ph.D.

Executive Vice President

NEC Corporation

1. Approach to NGN and IT / NW Solution Business

2. Out Commitment toward NGN

- NEC's Carrier Business Network Growth Strategy -

U can change.

NGN Market Landscape

Shift to All Digital / All IP

Band-free

Media-free

Protocol-free

Location-free

NGN

Network Providers

New Revenue Sources

Fixed Carriers

More New Services

Mobile Carriers

Service Providers

Broadcasters

Terrestrial / Satellite

Cable TVs

Contents Providers

Borderless Service Creation Environment

Network Equipment Vendors

Internet

Telecom Gears

Fixed

Mobile

IT Vendors

Microsoft

IBM

CPE Vendors

Standardization

What is NGN?

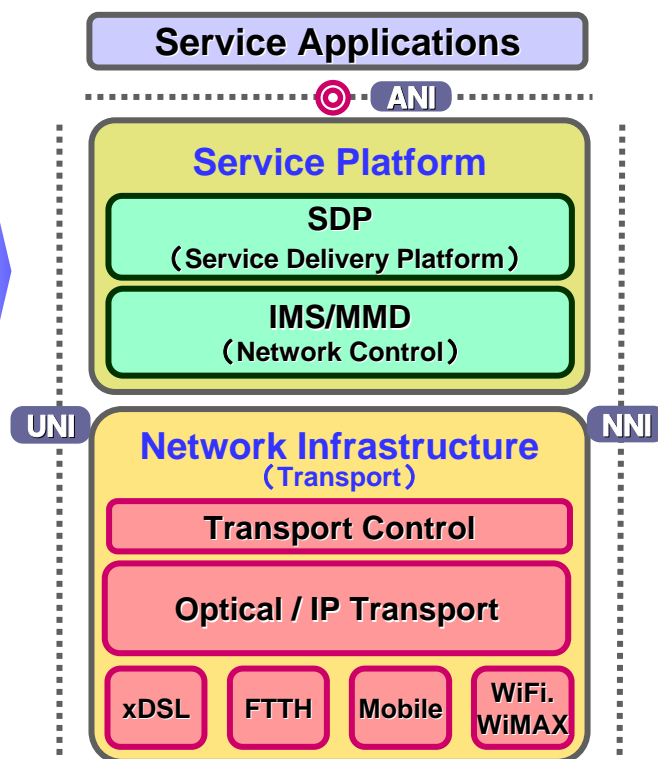

NGN: Flexibility for new business model creation

- ◆ All IP : Two-layer structure (Transport & Service)
- ◆ Open Interface Points : ANI-UNI-NNI

— Traditional —

— NGN —

NGN vs. Internet

NGN

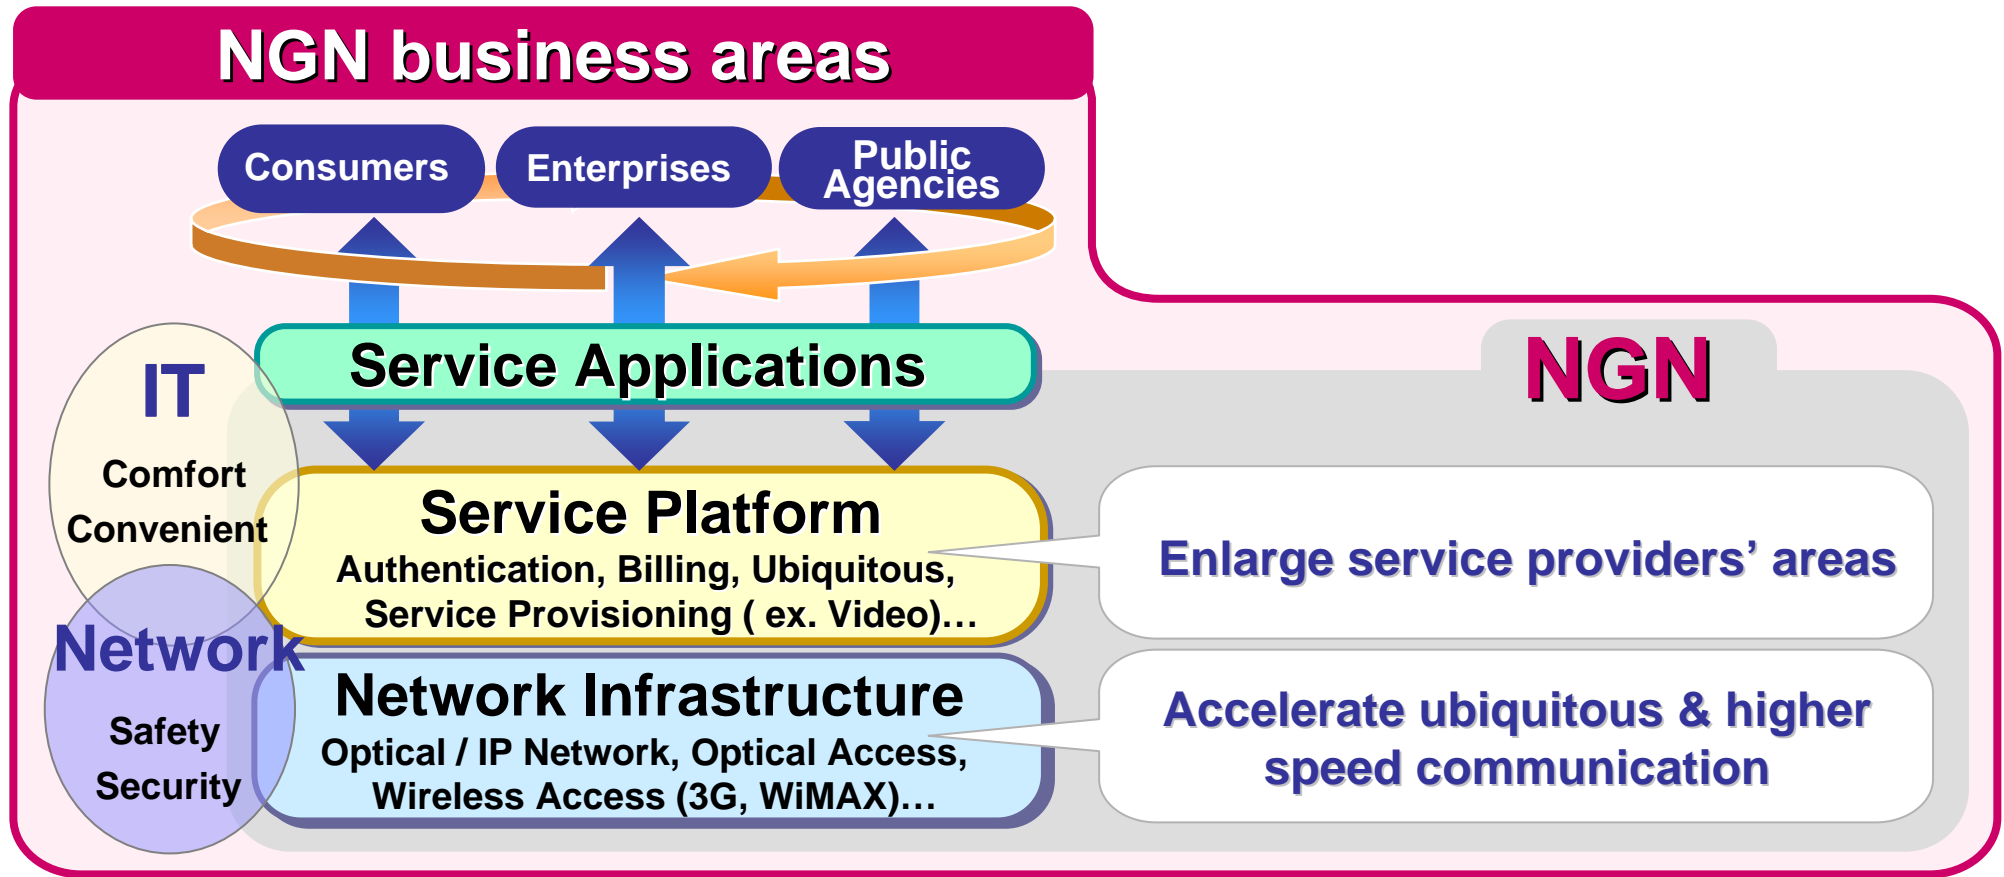

- Security & quality assurance provided by Network operators
- Efficient service creation by ANI
- Inter-network connection by NNI
- Seamless service provisioning to users by UNI
- Network management/control function (QoS, SLA)

Internet

- User's own risk
- Best-effort
- Autonomy-based (No central administration)
- Ease of use

- SDP: Service Delivery Platform
- IMS: IP Multimedia Subsystem
- MMD: Multimedia Domain
- ANI: Application Network Interface
- UNI: User Network Interface
- NNI: Network-Network Interface

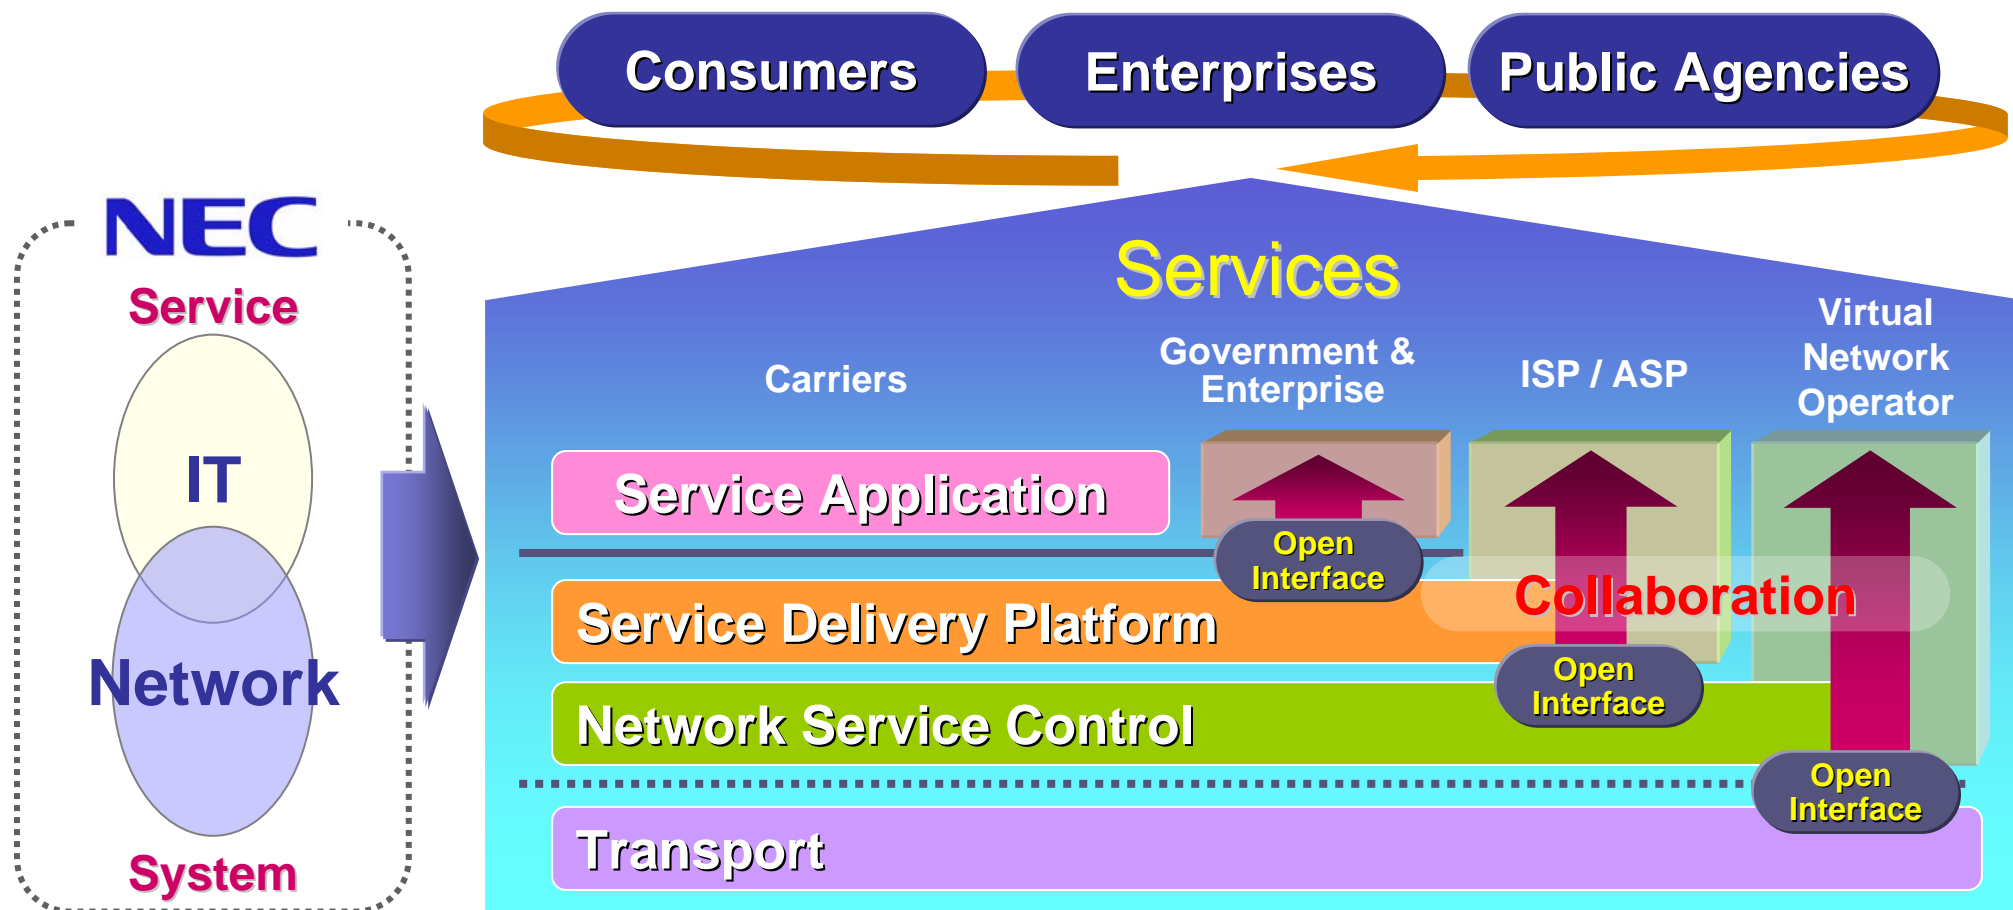

Broader Business Opportunities

NGN : Enabler of New Business Creation

NEC : Partner for Business Innovation

- ◆ As a leading company of both IT & NW industries, NEC will support your business innovation in all layers

1. Approach to NGN and IT / NW Solution Business

2. **Out Commitment toward NGN**

- NEC's Carrier Business Network Growth Strategy -

U can change.

Outline of NEC Carrier Network Business

Sales

- Carrier Network sales -

¥ 992.9Bil

Enterprise network
Carrier Network (70%)

Carrier Network Biz.
Business Area

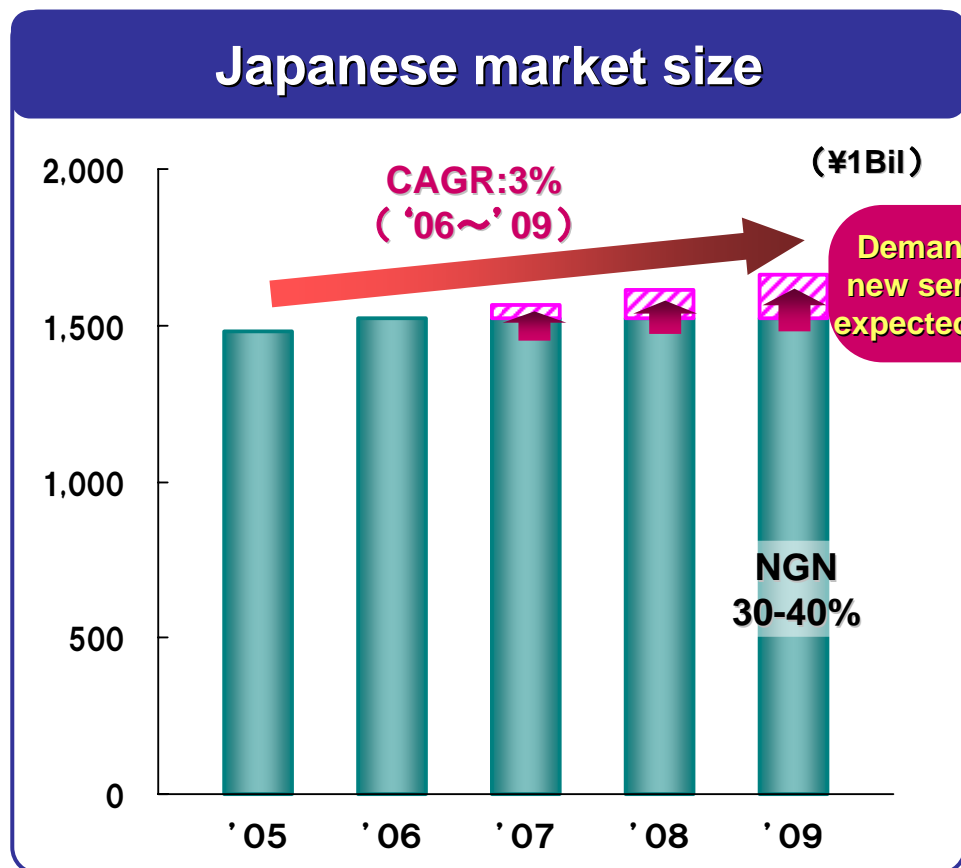

Service Platform
Network Infrastructure

Resources

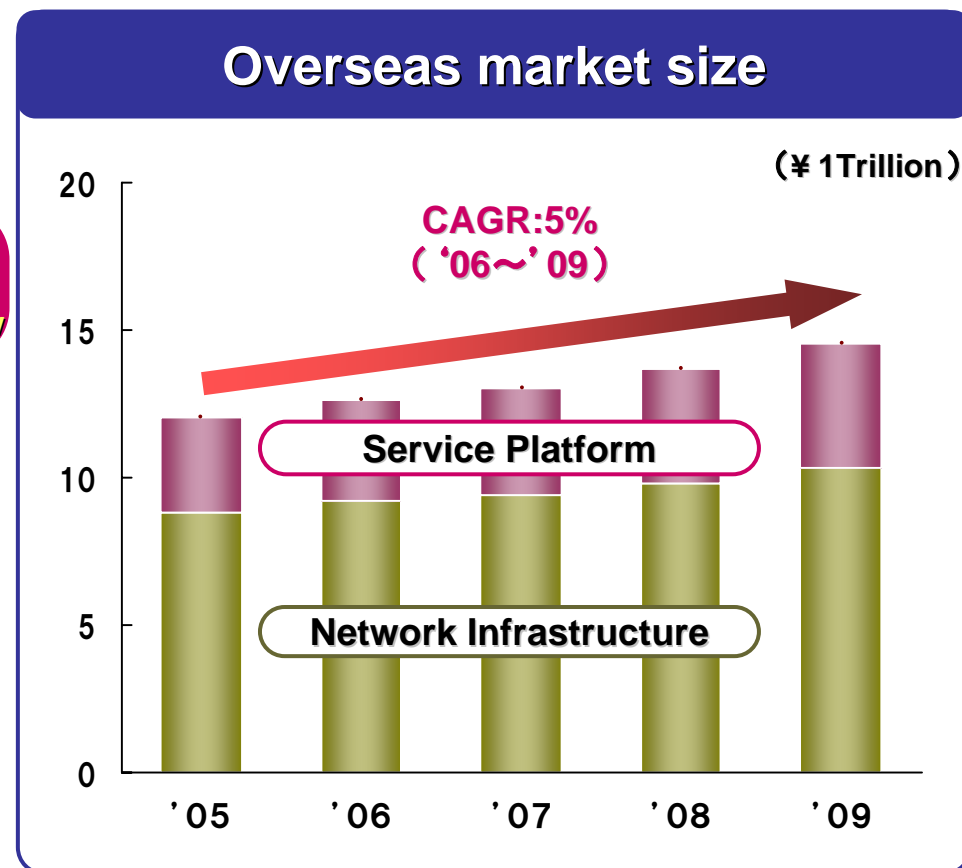

- ▶ Employees : About 10,000
- ▶ Subsidiaries (Carrier Network Business)
 - Japan : 12
 - Overseas : 27

Carrier Network Business Environment

- ◆ **Japan** :
Expectations for further investment toward NGN deployment
- ◆ **Overseas** :
Steady growth of emerging market , Recovery of advanced market

Estimated by NEC

Estimated by NEC

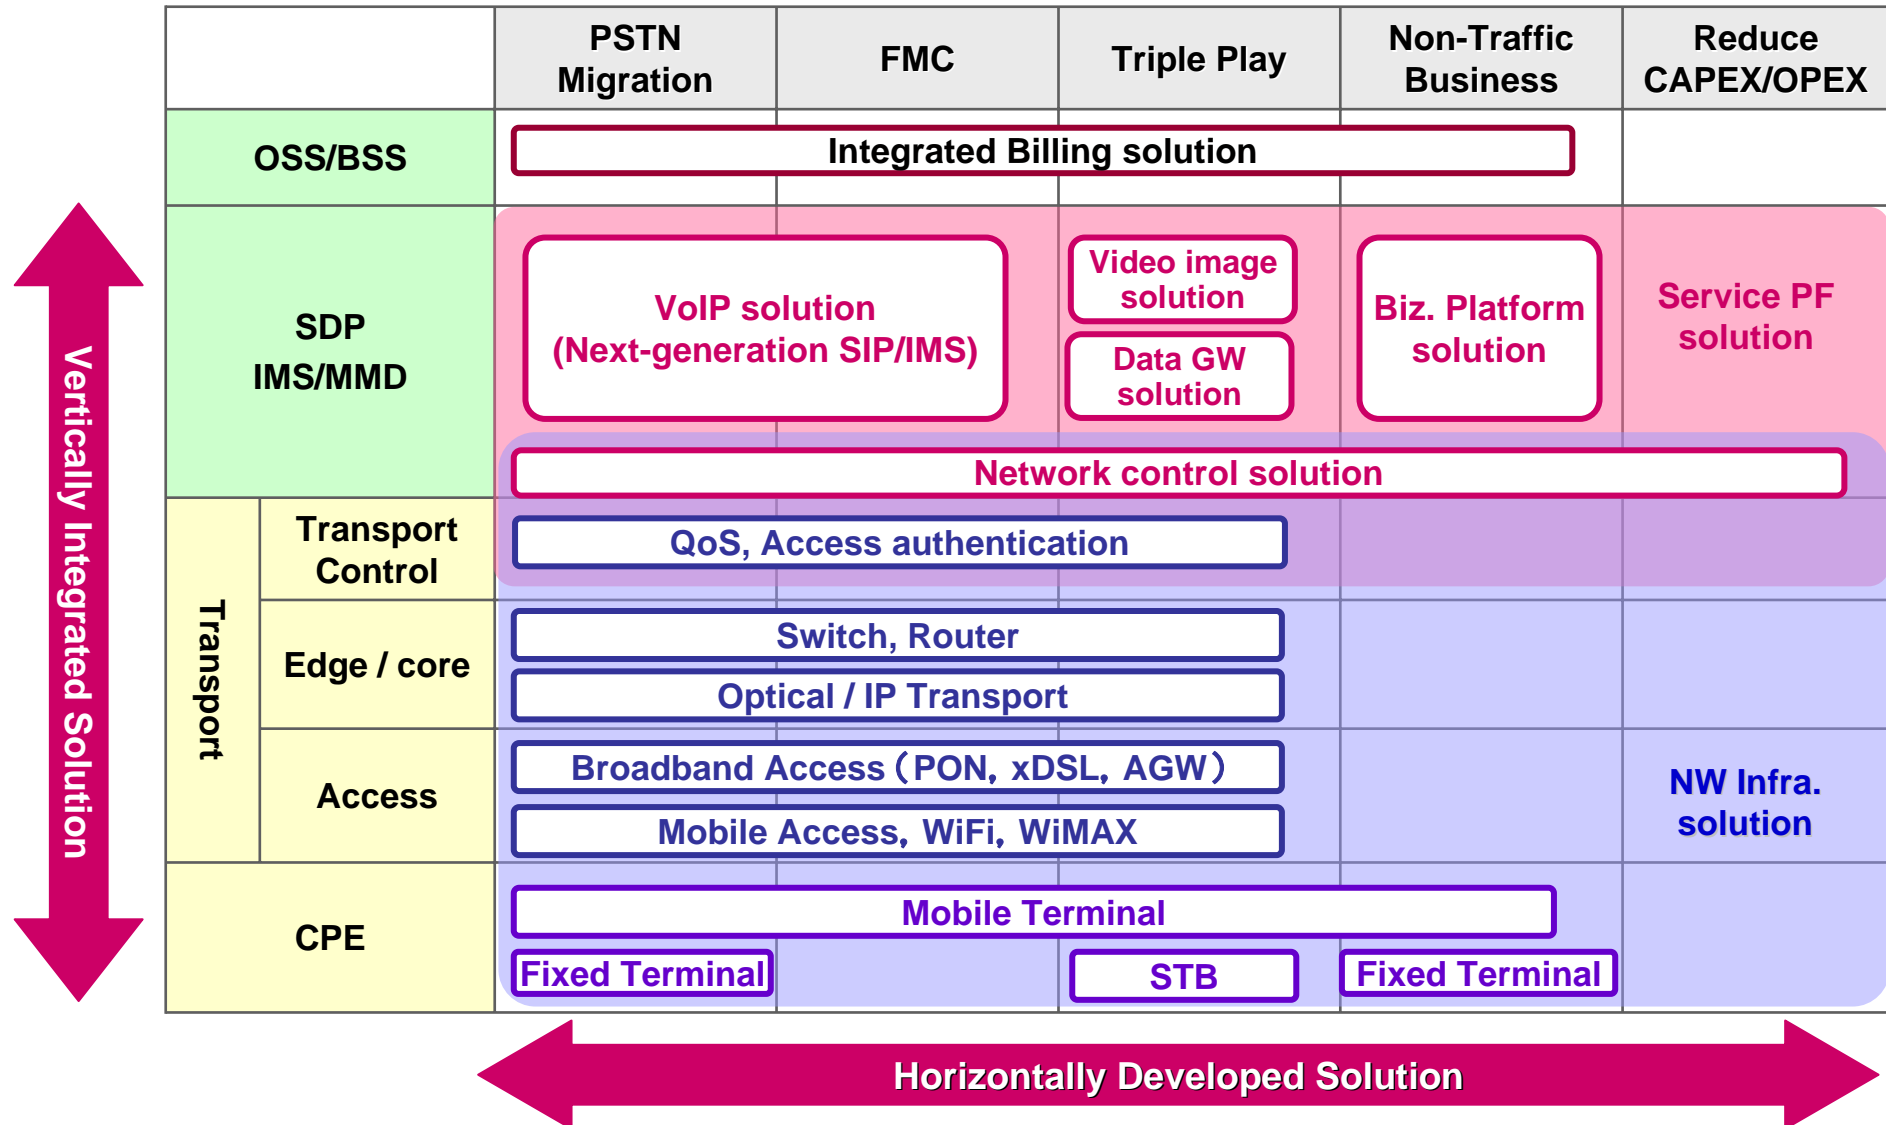

Driving Force of Business Growth in NGN era

NEC's Advantages

- ◆ **Capability of end-to-end solution supply**
 - From infrastructure to applications
 - “Full-layer & Full-line” solution lineup
 - NO.1 Position in Japan , the most NGN-advanced country
- ◆ **Expertise & Experiences in service platform layer**
 - Higher capability of development
 - Abundant records
- ◆ **Technology innovation towards NGN**
- ◆ **Footprints in overseas market**

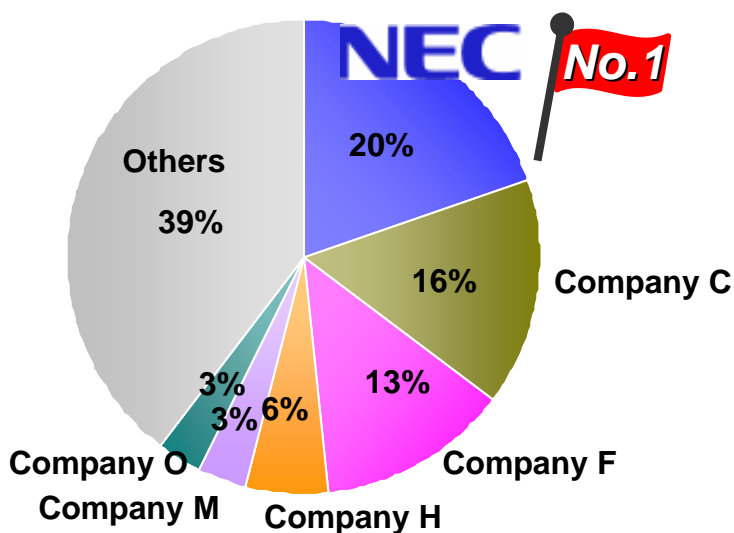

Advantage of NEC : “Full-layer & Full-line” Solution Lineup

Total Solution lineup from Transport to Services

Advantage of NEC : NO.1 Position in Japan

Market share(*) of Wire-line equipment in Japan

Market share(**) of WCDMA base station in Japan

Network equipment

- Optical transmission equipment
- Networking Equipments (ex. Router, Switch, Broadband Access ...)
- VoIP equipments (For carriers, enterprises...)
- VPN / Security equipment

(*) Fuji Chimera Research Institute, 2006

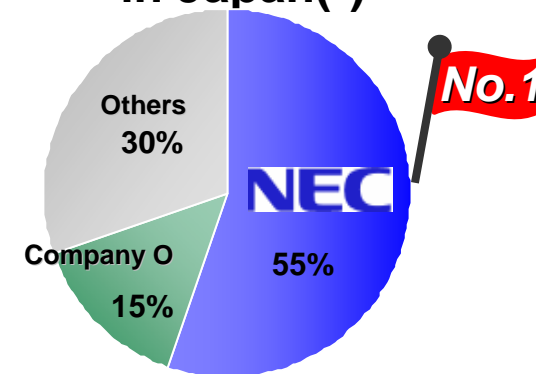

(**) MCA, 2006

Expertise & Experiences in Service Platform Development

◆ Outstanding System Integration Capability realizing Carrier-Grade Service

- Abundant “Know-How” accumulated through the supply of universal service systems (Switching equipment)
- Application to NW-software development

Market Share for Softswitch in Japan(*)

(*)Fuji Chimera Research Institute, 2006

◆ Massive software development power

- NW Vendors < NEC
(Utilization of IT Solution Software Resources)
- IT Vendors < NEC
(Abundant experiences in NW-Biz)

Development resource
(as of FY2006, incl. partners)

Advantage of NEC : Technology Innovation in NGN

Network product created through Technology Innovation

Service Application

Service Platform

SDP
(Service Delivery Platform)

IMS/MMD
(Network Control)

Network Infrastructure

Transport Control

Optical / IP Transport

Mobile

WiFi.
WiMAX

xDSL

FTTH

Carrier-grade Software Development : "NC9000/7000/5000 Series"

- ▶ Field-proven by major operators
- ▶ High-reliability (99.9999%)
- ▶ aTCA, UNIX -based

High-end optical transmission technology : "DWDM4200 Series"

- ▶ 40Gbs , Maximum 80 wavelengths
- ▶ Supporting GMPLS, optical cross-connect

Radio/Optical Convergence technology : "WCDMA base station"

- ▶ Field-proven by major mobile operators
- ▶ Antenna extension by optical fiber

Application of Carrier-grade IP technology : "Router/ Switch"

- ▶ IP technologies developed over switching-circuit equipment
- ▶ Collaboration with Juniper , Alaxala

NEC's R&D toward NGN

Enterprise IT/NW system

- Middleware for "Voice over IP Network"
- VoIP security
- Mobile E-ticket platform

Service Platform

- Service Integration Environment
- Multi-media Push to Talk
- High-quality Multicast Broadcasting System
- Quality Degradation Analysis for Large-scale Networks
- Data Mining for Fault Symptom Prediction

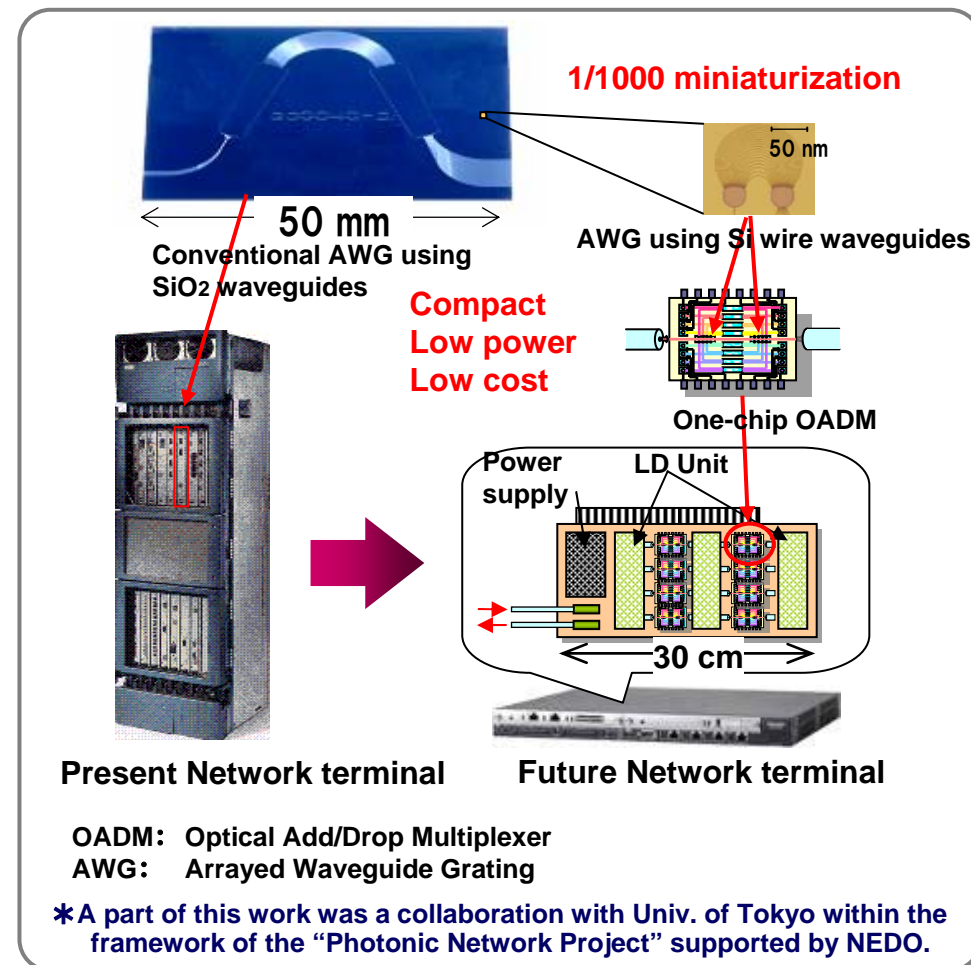

Transport

- 40Gb/s DWDM Long-haul Transport System
- Optical IP Network Control System
- Photonic Integrated Circuits with Si Photonics
- 10Gbps High Performance Security Platform
- Quantum Cryptography Network

Terminals

- Multicore Processor
- Highly Functional Bioplastics

- Photonic Integrated Circuits with Si Photonics - Miniaturizing and integrating optical devices by combining micro-photonics and Si nanofabrication technology

Advantage of NEC : Footprints in Overseas Market

Supply record of NEC's Network equipments (# of countries)

◆ MW radio (trunk)	150
◆ MW radio (PASOLINK)	123
◆ Optical Transmission	105
◆ Switching	71
◆ WCDMA	30
◆ i-mode Service	9

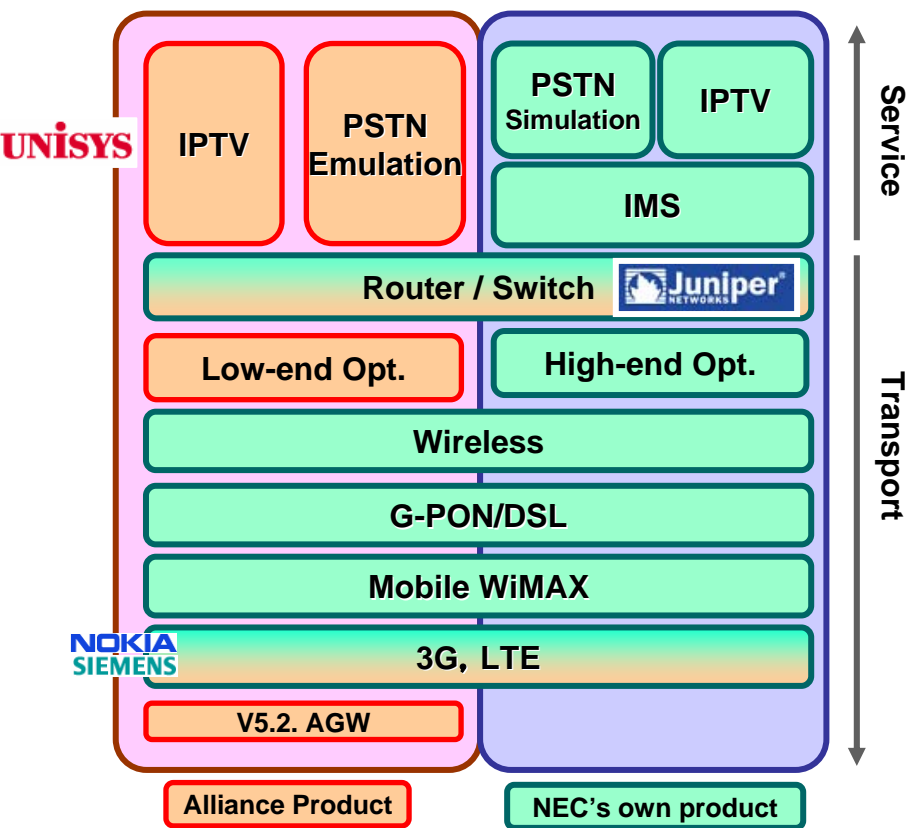

- ◆ World-wide customer bases
- ◆ Solution lineup fully conforming to global specifications

Advanced market

Emerging market
(e.g. BRICs)

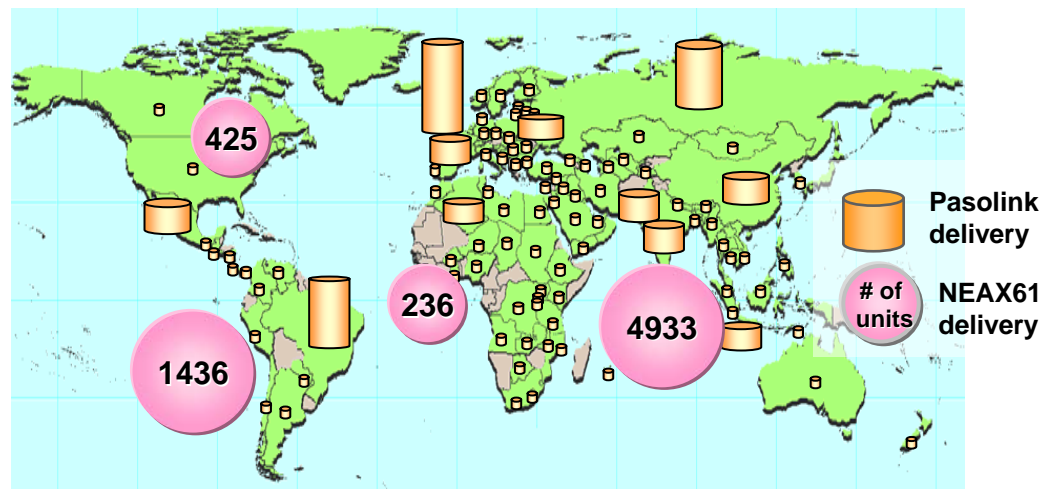

NEC's Activities toward NGN (Overseas Market)

Alliance with partners

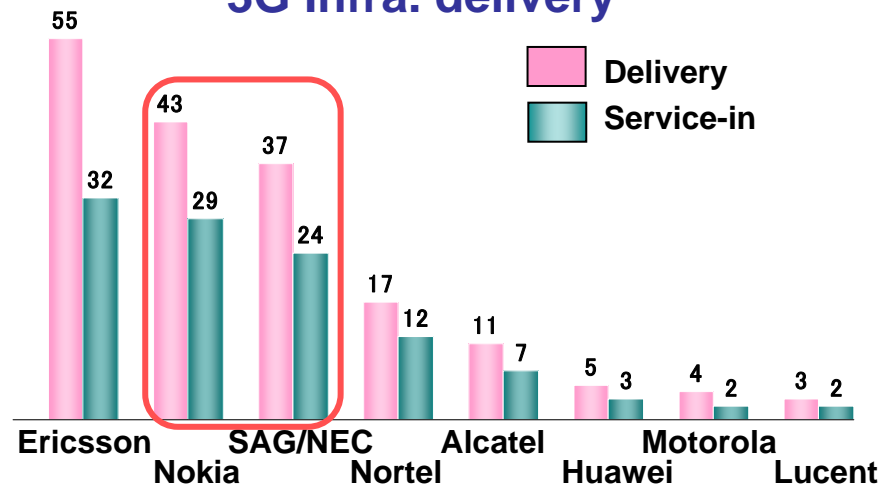

Global Customer Bases

- NEAX61/ Pasalink -

3G Infra. delivery

We would like to be ...

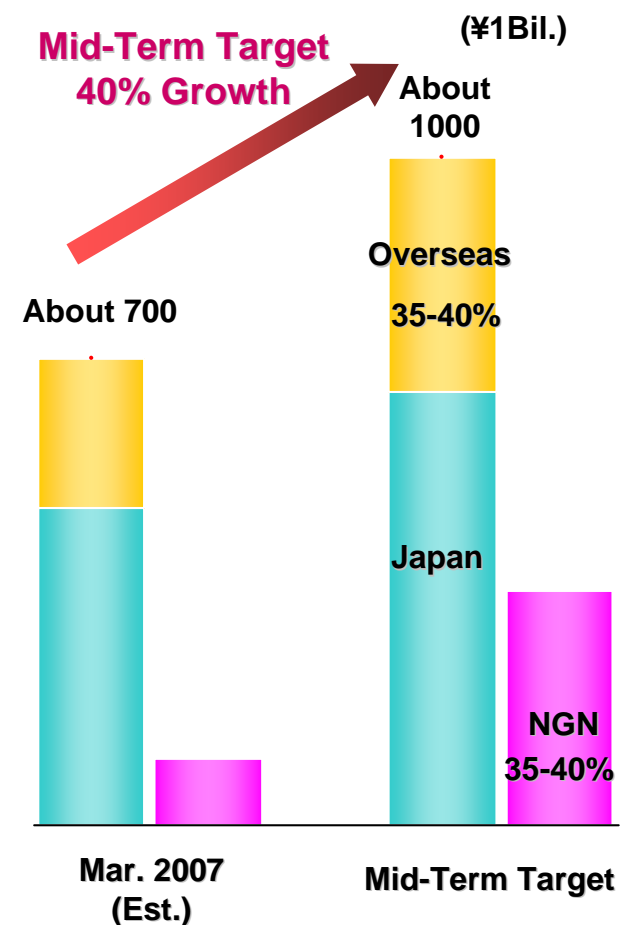

◆ Global Major Player in NGN market

- Best partner for Global Major Carriers
- Global top supplier of NGN products

◆ Strong Biz. Entity through “Empowered by Innovation”

- Software-oriented Biz. model
- Product development with common platform
- Establishment of global operations structure and cultivation of global major customers
- Strategic Alliance

Carrier Network business Sales

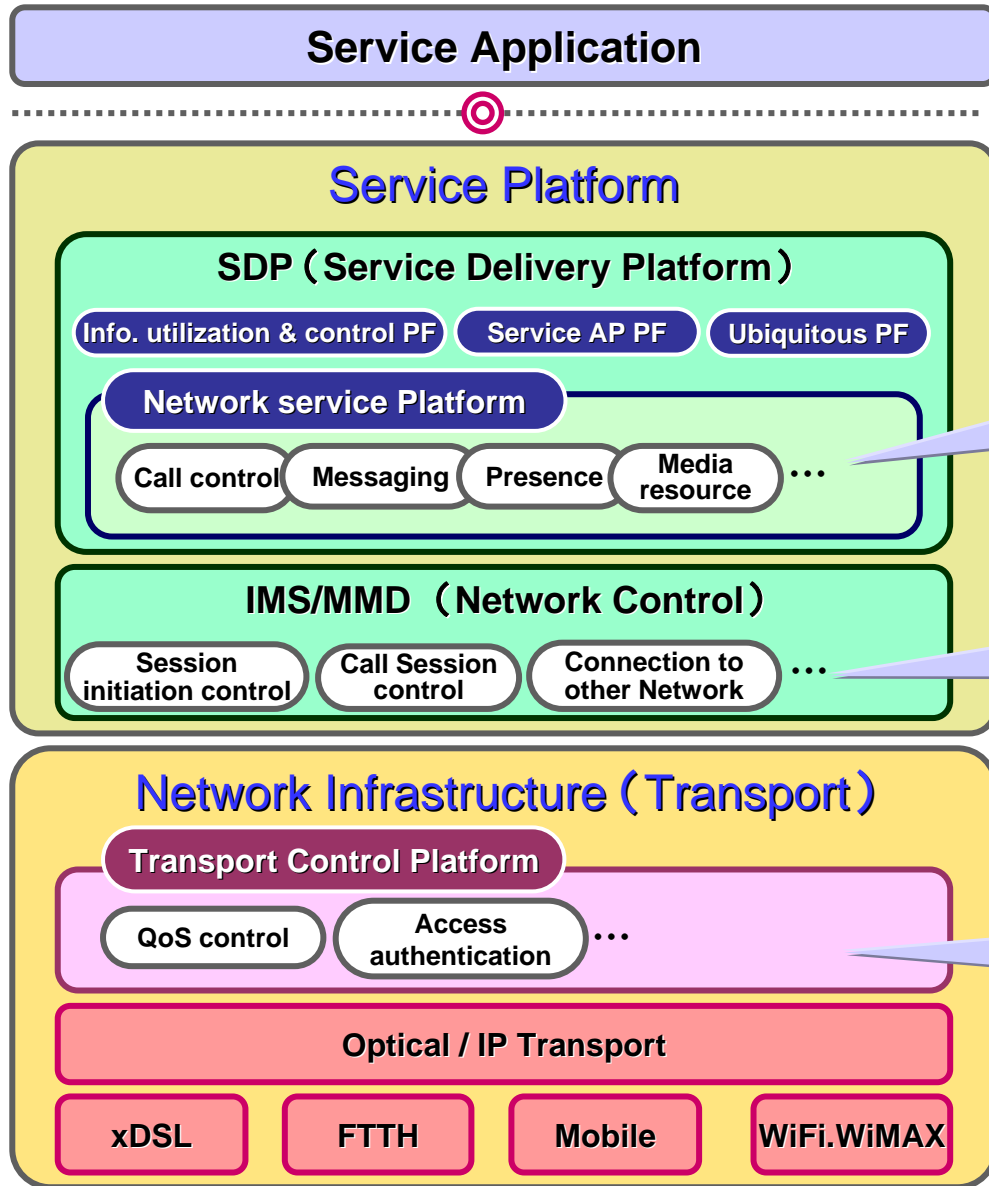

NGN Transport Product Roadmap

Feature expansion for further market competitiveness

			FY Mar.08	FY Mar.09	FY Mar.10				
Optical Transport	DW4200 UN5000	ROADM		WXC	GMPLS		100G		
		MSP	40G	RPR	GMPLS	Multi RPR, Hybrid SW			
Router / Switch	CX2600 Alaxala Juniper	SAS	CES,PON E-OAM	MPLS	PBB,PBT	WDM	Multicast	L7	100G
		Edge	Ring		SBC	IPsec		interworking with Mobile	
		Core		I-BGF		interworking with SAS	interworking with IMS		
Media Processing	CX8000	MG	MGW	SBC	Traffic control				
		MRF		Voice/Video IVR	Voice Authentication /synthesis		Broadband Video delivery		
		Handler		HA	IPsec	Load balancer			
Broadband Access	AM3110	MSAN	DSL/GPON/POTS		WiMAX				λ PON/10GbE
		FTTH (Terminal)	ONU		HGW/three wavelengths				
		VDSL (Terminal)	HGW		VDSL2+		Multicast		
FWA	Pasolink		Optical Interface/MUX		Router function			Opt/IP Interface	
Mobile	WCDMA	CN	MRF			SAE			
		RAN				LTE			
WiMAX				Mobile WiMAX					

NGN Software Products

◆ Core products toward IT/NW convergence

◆ Takes lead in full-layer product portfolio over competitors

NC7000 Series

Sep.2006

- ▶ Efficient Service development & operation
- ▶ Communication service development Know-How embodied over 4types components

NC9000 Series

May 2006

- ▶ NGN / IMS based SIP Call control function
- ▶ Highly reliable Mid-ware
- ▶ GMI (Global MSF Interoperability) test among Asia, Europe and US

NC5000 Series

NEW

- ▶ Transport control realizing high-quality, safety, reliability
- ▶ Interworking with NC9000, Decision of control information regarding band assurance & priority control for each services, QoS control to Transport Node

NGN Software Product Roadmap

Expansion of service function in response to market needs

			FY Mar.08	FY Mar.09	FY Mar.10
SDP	NC7000-CC	Call control	Basic function	Compliance with global Standardization : Service Enabler Expansion (Media-free, Community service, Communication & Broadcast Convergence) Function / Scalability Improvement	
	NC7000-PR	Presence			
	NC7000-MS	Messaging			
	NC7000-MR	Media Resource			
IMS/ MMD	NC9000-SS	Session Initiation Control (SIP)	Basic function	Compliance with global Standardization : Expansion of Service Application	
	NC9000-SC / PC	Call session Control (S-CSCF/P-CSCF)			
	NC9000-HS / SF	Subscriber control (HSS/SLF)			
Network Control	NC5000-PD	QoS control	Basic function	Compliance with global Standardization : ID control, Security, various menu	
	NC5000NS	Access authentication			

CC: Call Control
 PR: Presence
 MS: Messaging
 MR: Media Resource

SS: SIP Server
 SC: S-CSCF
 PC: P-CSCF
 HS: Home Subscriber Server
 SF: Subscription Locator Function

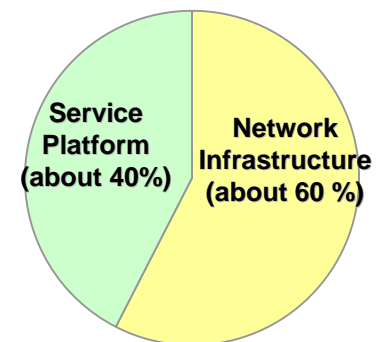

PD: Policy Decision Function
 NS: Network Attachment Subsystem
 CSCF: Call Session Control Function

Progress in Japanese NGN Market

= ¥100Bil.

Business Model Innovation in NGN

Full exercise of NEC's advantage over IT/NW converged areas

Borderless Market

Rapid-changes

Securing Profit through;

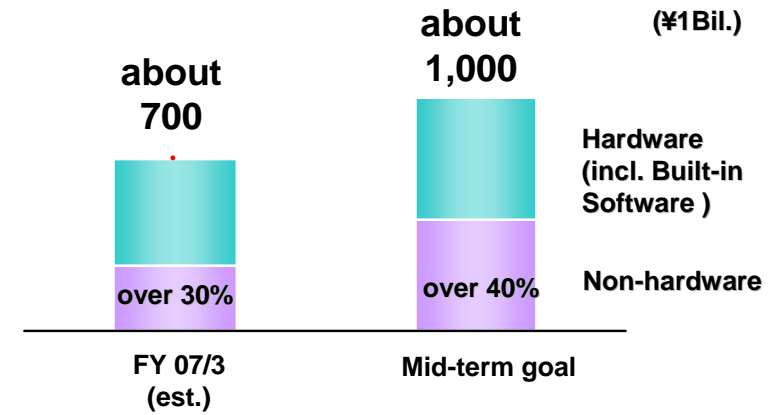

◆ Innovation to Software Business Modes

- Software as new revenue sources; upgrade, licensing, capacity-sales, Know-How, etc.

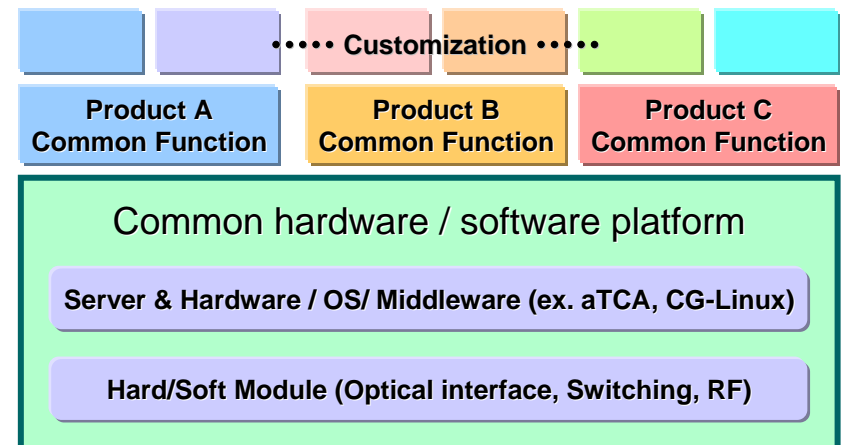

◆ Common Platform Strategy

- Business Enlargement in Global Market
- Minimization of Resource Shortage

Software sales in Carrier Network business

- Common Platform Image -

Empowered by Innovation
