Mid-term Management Plan 2015

April 26, 2013
NEC Corporation
(http://www.nec.com/en/global/ir/)
Mid-term Management Plan 2015

I  Looking Back at V2012 and Mid-term Management Policy

II  Focus on Solutions for Society

III  Focus on Asia, Promotion of “Locally-led” Businesses

IV  Stabilize Our Financial Foundation

V  Conclusion
Looking Back at V2012

While we targeted high earnings, we did not execute an expanded model that utilized our core assets

- For high growth overseas, we were unable to execute our growth plans to the extent we anticipated.
- Our financial strength was not sufficient to respond to changes in the external environment produced by the Great East Japan Earthquake, the Thai floods, the financial crisis in Europe, etc.

While we expect Government’s market revitalization policies to have a positive impact, intensification of price competition and the slowing of growth are unavoidable in the domestic market.

Economic growth will continue to center on emerging countries; in advanced countries, demand arising from structural changes will be key.

- Demand related to the advancement of social infrastructure and the exploitation of resources will increase.
- New trends will promote and accelerate structural changes, chiefly in the advanced countries.
- (Smartphones / Cloud / Big Data / SDN* / Etc.)

Competition will intensify around the axes of globalization, structural change and new markets.

→ We must change our existing strategies.
Mid-term Management Policy

(1) Focus on Solutions for Society

- Transformation into a social value innovator
  - Focusing of management resources on businesses that advance social infrastructure through ICT
  - Create new business models with the understanding that social problems provide an opportunity for growth

(2) Focus on Asia, promotion of “locally-led” business

- Creation of a foundation for growth as a company able to compete globally
  - Focus on emerging and developing countries, in particular in Asia
  - Realization of increased sensitivity to local needs, increased business speed

(3) Stabilize our financial foundation

- Enhanced cost competitiveness
- Creation of an earnings structure that produces operating income of 150 billion yen and free cash flow of 100 billion yen
- Hybrid finance to ensure financial reserve

These initiatives will represent 5% of operating income and 25% of overseas sales

*Projected figures are as of April 26, 2013*

Mid-term Management Plan 2015

I  Looking Back at V2012 and Mid-term Management Policy

II  Focus on Solutions for Society

III  Focus on Asia, Promotion of “Locally-led” Businesses

IV  Stabilize Our Financial Foundation

V  Conclusion
The Future World Economy

World population: 7 billion → 9 billion (1.3 X)
Ratio of urban dwellers: 50% → 70%

Scale of world economy → 4 X *
Energy demand 1.8 X
Greenhouse gases 1.5 X
Demand for food 1.7 X
Demand for water 1.6 X
(Present to 2050)
(* Source: UN, FAO, OECD, PWC, IMF)

With expectations of economic growth based on population increase...

Innovative social infrastructure will be required to make it possible to lead safe and secure lives and make efficient use of resources.
NEC’s Concept “Innovative Social Infrastructure”

For living people, in Society that is abundant in

Solutions for Society

Public
(Disaster prevention, security, electronic administration, finance)

Telecom Carrier
(Information networks)

Enterprise
(Logistics, distribution, transport)

Smart Energy

Innovation of social infrastructure via ICT

Safety  Security  Efficiency  Equality
(1) Innovation of Social Infrastructure via ICT(1)

Leveraging our proven results and strong position for global expansion

- From the seafloor to outer space, concentrating management resources in areas in which social infrastructure will be innovated by ICT

Responsible BU:

Public
Enterprise
Smart Energy
Telecom carriers

Air traffic control
Fingerprint recognition
Diverse business systems
Bank ATMs
TV studios
Electronic records

Digital TV transmission
Broadcasters
Hospital
Government

Electronic government

Digital TV transmission
Broadcasting towers
Important facilities
Post offices

Satellite communications / Earth observation

Water management
Leak detection

POS

Dams/Water supply

Diverse business systems

Fire departments

Distribution centers

Firefighting systems

Communications systems

NEC ICT supporting social infrastructure and systems

Next-generation network technologies

High-performance, high-reliability core IT technologies

Diverse sensor and human interface technologies

Page 10 © NEC Corporation 2013
(1) Innovation of Social Infrastructure via ICT

Collection of large-scale data

- Diverse sensors and human interface technologies
  - Diverse sensors
  - Surveillance cameras
  - Smart devices
  - Accumulated data

Analysis and prediction

- High-performance/high-reliability core IT technologies
  - Invariant analysis
  - Heterogeneous mixture learning
  - Facial image analysis
  - Behavior analysis
  - Textual entailment recognition

Solution of social issues

- Surveillance cameras
- Smart devices
- Diverse sensors

Next-generation network technologies

- Network virtualization
- Cyber security
  - World’s first SDN switches
  - Essential to future information system

Leveraging information captured by our unique and highly competitive ICT assets to become a social value innovator

* Rated as No. 1 among organizations participating in an evaluation task organized by the U.S. National Institute of Standards and Technology (NIST)
Continuing to transform our structure and strengthen the reach of our business, with IT and networks as our core competence.

Enhancement of service domains:
- 2004 Consulting services (ABeam)
- 2004 SI services for finance (Decillion)
- 2008 Global NW services (NetCracker)
- 2012 Video surveillance services (Global View)
- 2012 Global NW services (Convergys)
- 2012 Global IT services (CSG)
- 2013 Data security (Cyber Defense Institute) Etc.

Increased focus on core ICT assets:
- Next-generation network technologies
- High-performance/high-reliability core IT technologies
- Diverse sensors and human interface technologies

Withdrawn businesses:
- 2004 DRAM business
- 2004 Plasma display business
- 2007 Laser machining business
- 2008 Optical disc business
- 2011 Consumer PC business
- 2011 Liquid crystal business
- 2012 Electronic component business
- 2013 Semiconductor business Etc.

Enhancement of overseas bases:
- 2010 Establishment of Turkish subsidiary
- 2011 Establishment of South African subsidiary
- 2012 Establishment of South Korean subsidiary
- 2012 Establishment of Nigerian subsidiary Etc.
Focusing on fundamental social issues, we will increase our avenues for value innovation and boost our competitiveness

- We will become a company that understands the solving of social issues as a business opportunity and focuses on latent needs
- **Provision of total value** that integrates operational management services, financial functions, etc. in addition to ICT assets

### Solutions for society

#### Value innovation: Methods and functions
- Open innovation
- Partnering
- Project financing
- Consulting
- Operational management services, etc.
- Core ICT assets
  - BIGDATA/SDN/Cloud foundation, etc.

#### Focusing on fundamental issues for society and our customers

#### Innovation of new value / new markets

#### Value for society (Ex.)
- Reduction of energy loss
- Mitigation of risk of major accidents, crime, disasters
- Increased volume of food production / Reduction of loss
- Company sustainability / Management efficiency
- Resolution of financing problems
(3) Organization to Implement “Solutions for Society”

Establish an organizational structure with a sense of speed and which is always aware of the market and customers

- **CS No.1**: Innovation of business models and enhancement of creative functions to enable response to customers’ latent needs
- **Global 1st**: Adapt work processes to match global best practice, creation of competitive products and services
- **One NEC**: Maximization of workplace capacity through systematic fusion of product, technological and personnel assets

* CS: Customer Satisfaction

Four pillars of NEC’s business

- Cloud services
- Platforms
- Sensors / Devices
- IT services
- Social infrastructure
- Energy
- Carrier networks

**Solutions for society**

- Public BU
- Enterprise BU
- Smart Energy BU
- Telecom Carrier BU

**Business Innovation Unit**

**System Platform BU**

**Focus on fundamental issues**

- Seeds-driven specific optimization of businesses to create ensemble
- Consumer-driven optimization of the four pillars

**Innovation of new value and new markets**

* BU: Business Unit
(4) Transformation of Our Business Structure

Long-term growth and profitability with “Solutions for Society” as the driving force

Make social solutions 70% of our sales and 8% of our operating income (5% for the company as a whole)

Sales
(Billions of Yen)

Operating income (loss)
(Billions of Yen)

FY 12
(Actual)

FY 15
(Planned)

1,810
(59%)

2,210
(69%)

3,200

Approx. 100 billion is planned as SDN, Smart energy, safety-related investment

Projected figures are as of April 26, 2013

Figures of solutions for society are approx.
(1) Public / Enterprise / Smart Energy

Business Expansion by the combination of Strong Assets and Leveraging of our Domestic Position

Mid-term target

<table>
<thead>
<tr>
<th>Business Area</th>
<th>FY12 (Approx.)</th>
<th>FY15 (Planned)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Smart Energy</td>
<td>1,100</td>
<td>1,410</td>
</tr>
<tr>
<td>Social Infrastructure</td>
<td></td>
<td></td>
</tr>
<tr>
<td>IT Services</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

CAGR: 8.6%

Ratio of operating income: 5%

Growth strategies

- Exploitation of continuously increasing global demand for upgrading/renewal of social infrastructure (Smart energy, safety, etc.)

- Realization of increased global competitiveness through the integration of strong assets and enhancement of service areas (Characteristic technologies and products × SI services expertise)

- Contribution to renew national infrastructure to support a strong Japan and promotion of overseas expansion

* Projected figures are as of April 26, 2013
(2) Telecom Carrier

Grasping the changes in the carrier business, growth with TOMS and SDN as the main pillars

Mid-term target

- **Ratio of operating income**: 10%
- **CAGR**: 4.1%
- **FY12 (Approx.)**: 710 (Billions of Yen)
- **FY15 (Planned)**: 800 (Billions of Yen)

Growth strategies

- Change in services and applications and increase in traffic with the spread of smart devices
- Social demands: Disaster response, energy conservation, etc.
- Leveraging of proven records in global market for expansion of TOMS business
- Provision of SDN, which will increase carrier revenue and realize cost efficiency, in advance of the industry
- Provision of End-to-End solutions by mobilizing technological capacity in IT and networks (Linkage between SDN, TOMS and service applications, etc.)

**TOMS**: Telecom Operations Management Systems

**SDN**: Software-Defined Networking

*Projected figures are as of April 26, 2013*
(3) System Platform

Ensuring increased cost competitiveness and stable quality for survival in global markets

Mid-term target

<table>
<thead>
<tr>
<th>Social Infrastructure</th>
<th>FY12 (Approx.)</th>
<th>FY15 (Planned)</th>
</tr>
</thead>
<tbody>
<tr>
<td>IT Services</td>
<td>750</td>
<td>800</td>
</tr>
<tr>
<td>Platforms</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Personal</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Growth strategies

- Provision of foundations to support “Solutions for society” (Systems for provision of BtoB products as bundles)
- Shift from sales of individual components/SI components to solution platforms
- Enhancement of partnering, expansion of OEM sales

Solutions for Society

- Vertical integration-type platforms (Packaging of applications)
- Data center-type platforms

*Projected figures are as of April 26, 2013*
(4) Other Businesses

Comprehensive portfolio management with “Solutions for Society” as the focus

Consumer business

Mobile-phone handset business (NEC Casio Mobile Communications)
- Call for all shares in Marubeni Corporation’s subsidiary, MX Holdings, held by NEC as TOB
- Expansion of corporate value through economy of scale

Mobile-phone distributor business (NEC Mobiling)

Other businesses / functions

Distribution functions within the Group (NEC Logistics)
- Strategic linkage with Nippon Express, establishment of combined companies
- Expansion of global supply chain base

Other businesses in difficult situation

Detailed review of business plans, rapid implementation of structural reform or alliances

Focusing of management resources on “Solutions for Society”
Mid-term Management Plan 2015

Ⅰ Looking Back at V2012 and Mid-term Management Policy

Ⅱ Focus on Solutions for Society

Ⅲ Focus on Asia, Promotion of “Locally-led” Businesses

Ⅳ Stabilize Our Financial Foundation

Ⅴ Conclusion
**Overseas Business Strategy (Overview)**

Focus on Solutions for Society, realization of 25% of overseas sales

- **Public / Enterprise / Smart Energy**
  - Active expansion through provision of solutions tailored to the advancement of social infrastructure (global safety, smart energy, etc.)

- **Telecom Carrier**
  - Global expansion of TOMS and SDN, acceleration of creation of models for expansion of income
  - Maintenance and expansion of wireless broadband business

- **System Platforms, etc.**
  - Promotion of transition to unified communications in business network terminals, etc.

*Projected figures are as of April 26, 2013*

(1) Focus on Asia  
(Emerging/developing countries)

(2) Promotion of “locally-led” business

---

- **Overseas sales**
  - Ratio represented by overseas sales: 16%
  - CAGR: 15.8%
  - FY12 (Actual): 483.1 (Billions of Yen)
  - FY15 (Planned): 750 (Billions of Yen)

- **Focus on Solutions for society**
  - FY12 (Actual): 16%
  - FY15 (Planned): 23%
Global Growth Strategies (1)
(Public / Enterprise / Smart Energy)

**Safety**

- The market scale of our focus areas, surveillance of important facilities, cyber security, and disaster prevention, is approximately 3.3 trillion yen (FY17) (provisional calculations by NEC)
- Development of solutions incorporating IT/NW and sensor technologies that only NEC can provide
- Rapid acquisition of models for success with a focus on local SI power, our customer base Asia, and Central and South America
- Realization of increased profitability and acceleration of expansion into other regions through development of solution platform model

**Smart energy**

- The global scale of the market, centering on batteries, energy/SI, and energy services, is approximately 7 trillion yen (FY15) (provisional calculations by NEC)
- Provision of solutions to support the energy independence and dispersal and diversification of sources
- Shift of weight to energy services melding components and ICT
- Enhancement of solutions and acceleration of opening up of new customers and channels via alliances

Collaboration with Interpol in cyber security measures (December 2012)

*Projected figures are as of April 26, 2013*
Global Growth Strategies (2) (Telecom Carrier)

Business expansion leveraging our proven record in TOMS and our advancement in SDN

**TOMS**

Telecom Operations Management Systems

- Marketing of one-platform products looking towards the next-generation OSS/BSS market, in which growth is predicted (Integration with products of former Convergys BSS)
- Expansion of sales to non-carrier customers (power, distribution, etc.)

**SDN**

Software-Defined Networking

- Concentration on global advanced carrier market
  - Joint development of solutions
  - Extension of outcomes to emerging countries
- Realization of further spread and shoring up of presence through promotion of standardization

**Market scale**

- Active business expansion in areas of safety, energy, etc.
- Development of new markets such as mobile backhaul businesses
- Rebuilding of management base and business transformation (TOMS, SDN, smart energy)
- Development of social infrastructure/ growth of economy
- Provision of national infrastructure
- Efforts towards further upgrading with increasing urbanization
- Global optimization and Renewal of infrastructure

* Projected figures are as of April 26, 2013

- 5% Market growth rate
- 10% Market growth rate

© NEC Corporation 2013
(2) Promotion of “Locally-led Business” (1)

Evolution of global 5 regional headquarters structure, acceleration of expansion of “locally-led” business

- Enhancement of local marketing/development functions, etc., mutual development of local strengths
- Gathering of knowledge of local personnel, transformation into new businesses
- Strengthening of support system from Japan

**Diagram:**
- Evolution of regional headquarters structure
- Local to Global
- HQ to Global

* TOMS: Telecom Operations Management Systems
(2) Promotion of “Locally-led Business” (2)

Increased sensitivity to local needs, greater business speed

[Establish new Global Safety Division (GSD)]

- Establishment of global base for safety business in Asia (Singapore), strengthening of focus
- Will engage in marketing, develop shared solutions, implement projects and programs across departments, and support projects

Swift expansion into the global market (Other regions)

- Provision of support for rapid business expansion into various regions by means of pre-sales of fingerprint and facial recognition technologies, video surveillance technologies, and other core assets
- Increase ability of local companies to conduct business
<table>

</tbody>
</table>
(1) Enhancement of Cost Competition

Reduction of 30 billion yen against FY12 (in FY15), in addition to standard cost reduction measures

Expansion of global SCM system
- Product businesses: Concentrated purchasing, optimized production, realization of greater efficiency in development foundations
- “Locally-led” businesses: Strengthening of local procurement ability through creation of global procurement network

Increased use of offshore resources
- Strengthening of foundations towards expansion in China, use of India, establishment of delivery centers
- Greater use of upstream design processes

Further reduction of Group indirect costs
- Rationalization and realization of increased efficiency for each specific item in shared Group costs (including affiliated companies)
- Promotion of resource shifts and sharing for indirect departments

Realization of further efficiency in terms of loss costs (quality costs)
- Enhancement of quality management and project management in SI services
- Enhancement of quality management in overseas production and development

* Projected figures are as of April 26, 2013
(2) Earnings Structure
(Operating Income to Net Income)

Ensuring current net earnings and continuity of dividends through reduction of non-operating loss and extraordinary loss

<table>
<thead>
<tr>
<th>(Billions of Yen)</th>

<td>(38.8)</td>
<td></td>
</tr>
<tr>
<td>Company tax, etc.</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

* Projected figures are as of April 26, 2013
(3) Cash Flow

Generate a 100 billion yen free cash flow per year

---

**Operating cash flow**
- Realization of a stable cash flow via accumulation of profits
- Pursuit of capital efficiency through compression of CCC (Cash Conversion Cycle)
  - Creation of business models and modification of contract conditions with consideration of the specificities of each business, with a view to shortening and realizing efficiency in total supply chains

**CCC days**  
(Accounts receivable – Advances received + Inventory) turnover period – Accounts payable turnover period

- Current: 51 days
- Efficiency target: 40 days

**Investment cash flow**
- Transformation of equipment investment domains by shake-up of portfolio
- Investment in SDN, smart energy, safety, and other growth fields

*Projected figures are as of April 26, 2013*
(4) A Solid Financial Foundation

Realization of a stable financial foundation and advance investment in focus areas

Stabilize financial foundation

- Realization of profits, procurement of business cash flow through implementation of Mid-term Plan
- Investment within free cash flow
- Hybrid financing (Procurement amount: 130 billion yen  Capital ratio 50% [R&I])

Realization of surplus for advance investment

- Advance investment in SDN, Smart Energy, Safety and other focus areas
- Realization of financial surplus to enable response to unexpected worsening of business environment

A strengthened financial foundation and advance investment in focus areas
Mid-term Management Plan 2015

I Looking Back at V2012 and Mid-term Management Policy

II Focus on Solutions for Society

III Focus on Asia, Promotion of “Locally-led” Businesses

IV Stabilize our Financial Foundation

V Conclusion
Mid-term Management Policy

(1) Focus on Solutions for Society

Transformation into a social value innovator
- Focusing of management resources on businesses that innovate social infrastructure through ICT
- Create new business models with the understanding that social problems provide an opportunity for growth

(2) Focus on Asia, promotion of “locally-led” business

Establishment of a foundation for growth as a company able to compete globally
- Adoption of focus on emerging and developing countries, in particular in Asia
- Realization of increased sensitivity to local needs, increased business speed.

(3) Stabilize our financial foundation

- Enhanced cost competitiveness
- Creation of an earnings structure that produces operating income of 150 billion yen and FCF of 100 billion yen
- Hybrid finance to ensure financial reserve

These initiatives will represent 5% of operating income and 25% of overseas sales

* Projected figures are as of April 26, 2013
NEC Business Domains towards the Realization of the Group Vision

Realization of an affluent and equitable society which makes efficient use of resources and whose members are safe and personally secure

Solutions for society

• Supporting the advancement of social infrastructure and systems throughout the world via ICT
• Create new business models with the understanding that social problems provide an opportunity for growth

Transformation into Social Value Innovator
NEC Group Vision 2017

To be a leading global company leveraging the power of innovation to realize an information society friendly to humans and the earth
Empowered by Innovation

NEC
These materials contain forward-looking statement regarding the strategies, financial targets, technologies, products, services, business results, and other aspects of NEC Corporation and its affiliates (collectively termed “NEC” below). In some cases, forward-looking statements are contained in other documents submitted to regulatory authorities such as financial instruments exchanges or the Director-General of the Kanto Finance Bureau, reports for shareholders, and other announcements and notifications. When making these disclosures, NEC complies with the Safe Harbor Rule with regard to forward-looking statements. These statements are based on the assumptions, data and methods available at the time, but these assumptions, data and methods may not be correct, and there may be cases in which it is impossible for NEC to realize the outcomes that have been predicted. Forward-looking statements refer exclusively to NEC analyses and predictions, and do not represent guarantees of future business results. We therefore urge readers not to place undue faith in these forward-looking statements. Readers should also be aware that these statements relate to risks and factors of uncertainty, and a variety of factors may result in a considerable variation between predictions and actual outcomes. Factors that may influence actual outcomes include: (1) The state of the international economy or the overall economy in which NEC conducts its business ventures; (2) Downward pressure on prices due to fluctuations in demand for NEC products and services in the market or intensification of competition; (3) NEC’s continued ability to supply products and services accepted by customers in intensely competitive markets; (4) NEC’s ability to expand its business in overseas markets such as China; (5) Changes or lack of clarity in the regulations relating to NEC’s business ventures and potential legal liabilities; (6) NEC’s ability to reform its management structure and conform its business management in response to changes in the market environment; (7) Fluctuations in exchange rates (In particular the exchange rate between the U.S. dollar and the yen); (8) Unfavorable stock market trends such as declines in stock prices resulting in losses on listed shares held by NEC; (9) The effect of measures or legal procedures instituted by the regulatory authorities in relation to NEC. Forward-looking statements are predictions made on the day of publication. New risks and factors of uncertainty can arise at any time, and it is impossible to predict their occurrence or their effect. NEC will not necessarily correct forward-looking statements in light of new information, future events, etc. The management targets included in these materials are not current estimates produced by NEC’s management team in relation to projections and future business results; they represent targets which NEC’s management team will work to achieve by implementing business strategies. 

The statements contained in these materials do not constitute a public offering of negotiable securities. In cases in which registration of securities is required by law, public offerings or secondary distributions of negotiable securities cannot be conducted in any country or region other than in cases in which registration procedures for negotiable securities are conducted or registration procedures are waived.

(Note)
NEC employs Japanese Accounting Standards in the formulation of its consolidated financial statements.

With regard to the denomination of fiscal years, fiscal 2010 refers to the year ending March 2011, and fiscal 2011 refers to the year ending March 2012. (the same applies below).
