

The Best Partner for Network Solutions – NEC Networks & Systems Integration Corporation

Now that the real NGN age is about to begin, a network environment that is safe, secure, comfortable and ubiquitous is becoming indispensable for our everyday lives. In consideration of this trend, in April 2007 NEC Telenetworx, Ltd., which had become a subsidiary in 2006, was integrated into NEC Networks & Systems Integration Corp.. This move was in order to enhance one-stop services for network systems and a new corporate system was thus initiated. As a total systems integrator in the network solution domain of the NEC Group, NEC Networks & Systems Integration Corp. will offer customers safe, secure and comfortable network-related systems based on an integration capability that makes full use of the latest technologies.

1. Business Concept

“By offering Network integration/support services and telecommunications engineering business we aim to support the improvement of customer values.”

NEC Networks & Systems Integration Corp. offers one-stop services from planning/consulting to design, system introduction, maintenance/administration and outsourcing. This is achieved by fusing IT technologies based on long years of expertise and the latest networking technologies. We also undertake the telecommunications engineering that form social infrastructures. These two kinds of business support improvements in customer values by organically linking our characteristics and strengths.
