

## It takes a reliable verification solution to put e-government services at your fingertips.

Now people can easily access e-government services like pension claims from home, thanks to accurate verification of personal identity

Tailored to provide maximum security at minimum intrusion, our National Identity Solutions use the world's most trusted biometrics identification technology to ensure total peace of mind. This also means enhanced national security and operational efficiency for government agencies and business enterprises.

No matter what verification solution you have in mind, NEC is your trusted partner in integrated IT and networking solutions.

NEC empowers you through innovation.
