

## Digital Signage Solution

# NEC Digital Signage Solution

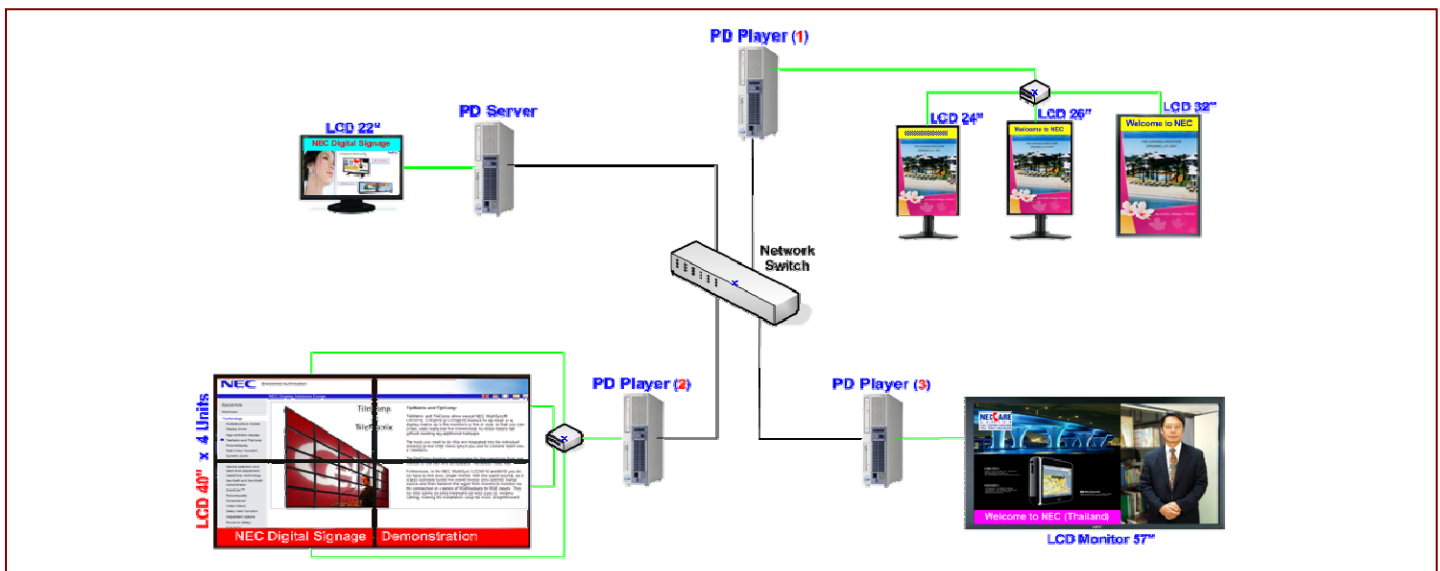

## PanelDirector

### Features

- SCHEDULE MANAGEMENT
- SPLIT-SCREEN DISPLAY
- SCROLLING MESSAGES
- INTERRUPTIVE DISTRIBUTION
- PANEL MANAGEMENT
- DATA DISTRIBUTION VIA NETWORK
- SYSTEM COLLABORATION
- SEQUENTIAL UNICAST
- MULTI-MONITOR DISPLAY
- SYSTEM EASILY EXPANDABLE

### Overview

- PanelDirector is a system to schedule and control any content and information on display panels. You can distribute exciting content to target panels according to your schedule, yet still react to important events for Hotels, Universities, Banks, Amusement Parks, Railway, Department stores...
- PanelDirector is the enabler allowing you to attract peoples attention and convey your message using imaginative and dynamic methods. You can schedule your content based on date or time and also have the ability to interrupt the scheduled information with important messages, news flashes, weather, webcam or DVD content.
- Display rich video content, images, presentations, animated graphics, you can even combine other video sources such as DVD, TV, video camera, game consoles...
- You can split your screen and for example display a music video on 3/4 of the screen and DVD/Video/CD pricing and top 10 lists in other panes. This can be achieved so easily using existing templates or if you like create your own!
- Content can be updated by networking the display drivers using your LAN, dial-up, over the Internet or off-line via USB memory devices. This system is so easy to use you can be displaying targeted and customized messages in minutes.

## Advantages

- **SCHEDULE MANAGEMENT:** Remotely editing more than one schedule by date and time with the simple user-friendly interface.
- **SPLIT-SCREEN DISPLAY:** Divides the screen of a panel into (up to) nine sections and displays different content on each pane. You can also execute automatic down scrolling of HTML pages.
- **SCROLLING MESSAGES:** Scrolling message in various styles appear on upper or bottom of the screen or even on each split screen. You can configure each message group's such as typeface, font colour, background, scrolling speeds and more. A maximum of 50 message groups and 100 text elements can be created per group.
- **INTERRUPTIVE DISTRIBUTION:** Schedules can be edited in real time so that emergency information can interrupt current schedules.
- **PANEL MANAGEMENT:** Within easy-to-use GUI on the CentreSystem, multiple panels can be controlled centrally. Remote power management and time synchronization are also supported.
- **DATA DISTRIBUTION VIA NETWORK:** LAN or subscriber line is used for data distribution. Also supports data transfer by using USB memory stick for non-network environments.
- **SYSTEM COLLABORATION:** Add URL's (including servlets and script execution) and executable files (.exe file) to schedules for updating the display automatically.
- **SEQUENTIAL UNICAST:** Sequentially distributes data to a maximum of 50 panels (please contact NEC for applications over 20 panels).
- **MULTI-MONITOR DISPLAY:** Display impressive images on more than one PDP, by installing multimonitor support graphic cards (hardware dependent).
- **SYSTEM EASILY EXPANDABLE:** Additional panels can easily be added to the system at any time.
