# Virtual Desktop Solution Virtual PC Center (VPCC)

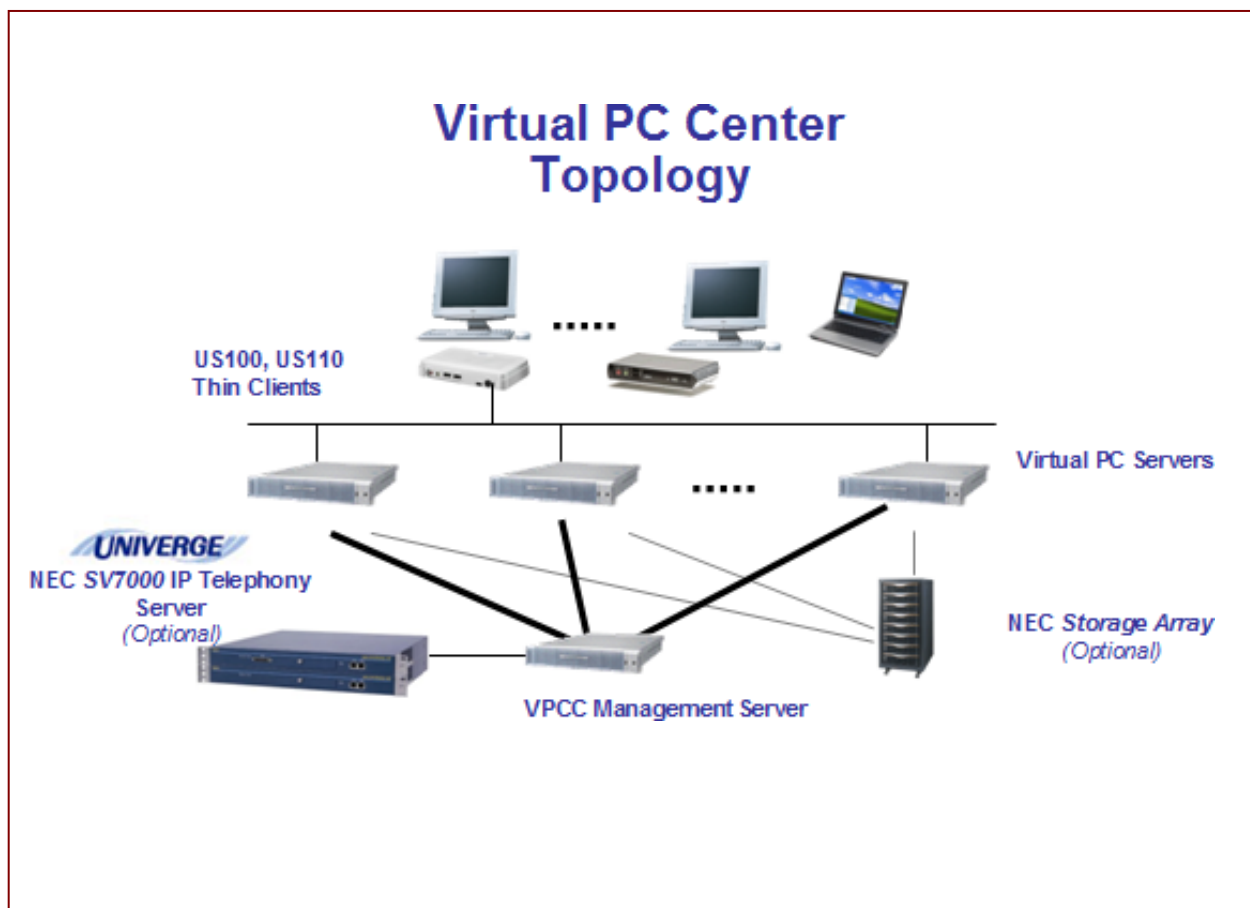

## Better PC for the Enterprise

### Features

- Thin Client with Windows OS support (XP and VISTA)
- Voice Over IP Telephony
- Easy management & operation by SSC – NEC SigmaSystemCenter™ and virtualization technology by VMware®.
- Smooth Image Processing

### Overview

Virtual PCs through thin client solutions have penetrated industries where data confidentiality and security are a priority. However, as traditional PCs have continued to evolve, thin clients have historically stayed somewhat behind—until now. NEC has delivered the first multimedia thin client device with its virtual PC servers, to deliver the first complete virtual PC system.

## Advantages

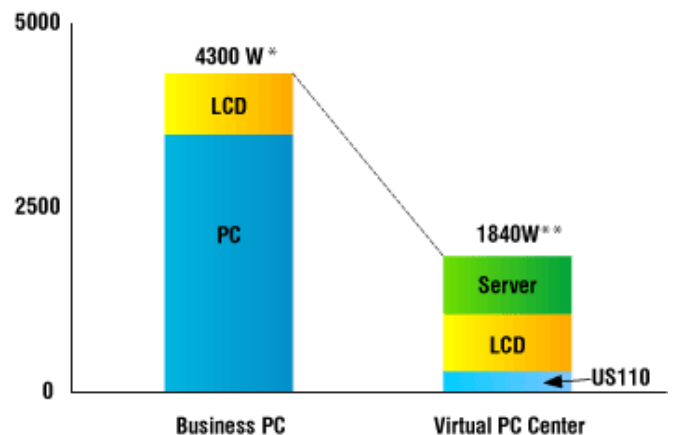

- More secure corporate PC data
- No compromise, full function Windows PC for business
- More Efficient PC Maintenance and Support
- Lower TCO as compared to PC desktops
- Eco-friendly thin client system

## Application Examples

- Create new business opportunities with WiMAX for Carrier operator
- Improve the quality of their service with greater security and accessibility to the information for Hospital and Financial business
- Cut down the installation expense to the minimum for Manufacturing companies.
- Provide the optimum educational environment for the students in Education market.

## Environmental consideration point

- The US110 consumes just 13W per day versus 120W per day for the average desktop PC.
- Including the energy consumption of the servers, the overall consumption is reduced by 50% when compared to normal PC installations.

\* Electric power consumption for 20 PCs + 20 LCDs.  
\*\* Electric power consumption for 20 US100 + 1 server + 20 LCDs.
