

Logistics Management Solution for Retailers

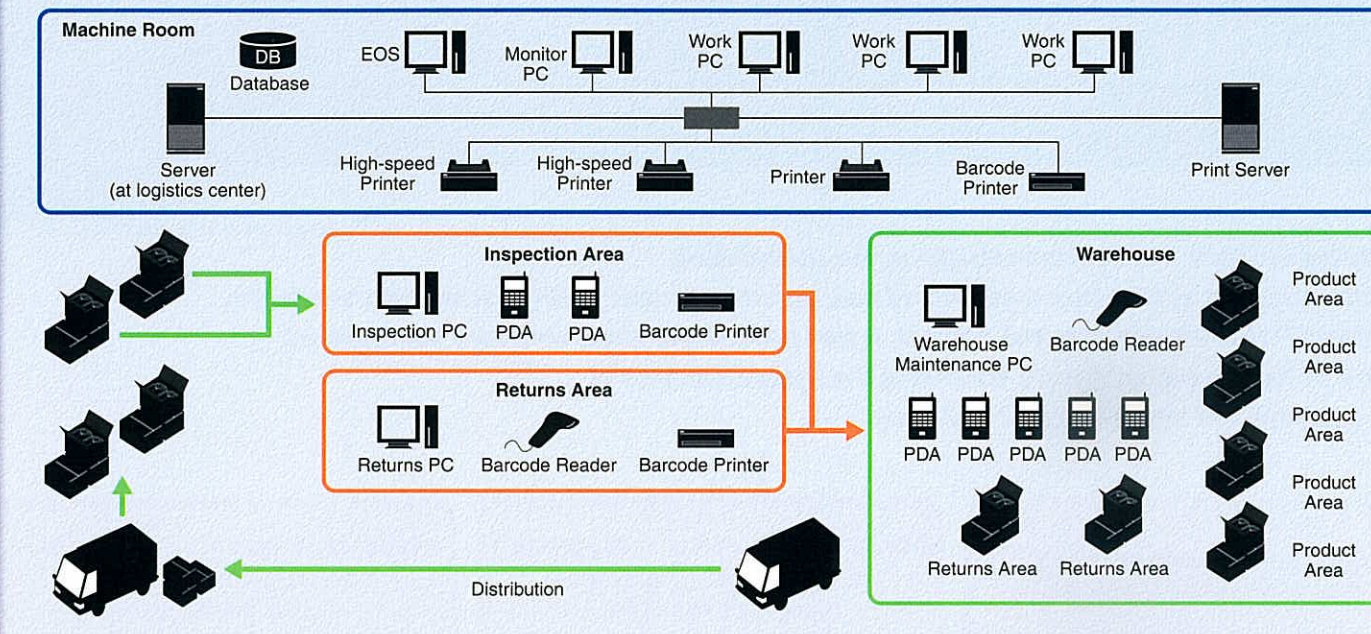

DCMStar/WMS

As customer needs become increasingly varied, establishing a flexible logistics system that is capable of fast, accurate product delivery is an important factor. DCMStar/WMS is not only fast and efficient, it also provides accurate inventory management in the distribution center, thereby enhancing the competitiveness of your company and improving your business.

- Accurate inventory control via real-time stock management.
- Efficient and practical management of warehousing/shipment via process control.
- Optimized delivery costs based on vehicle allocation by quantity.
