

Solution for Fast Food Restaurants

Food Service Solutions

In order to satisfy the diverse needs of customers, it is important to offer a variety of menus as well as fast service. NEC's Food Service Solution allows efficient shop operation by providing vital features such as stock and employee management functions. The result of our years of experience, this comprehensive package is the ideal solution for any food service company looking to enhance operations and expand business.

Optimization

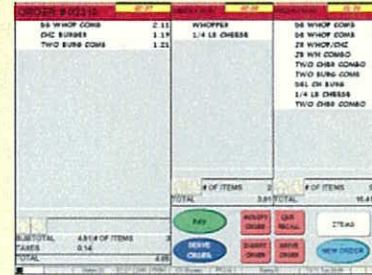

This solution supports different types of stores including fast food (quick service) and drive-thru restaurants.

Main Features

QS Functions for Fast Food Restaurants
 Coupon
 Auto-combo
 Discount (item-based/total amount)
 Order storage by numbers

DT Functions for Drive-thru Restaurants
 3 screen display
 Insert order

Drive-thru display

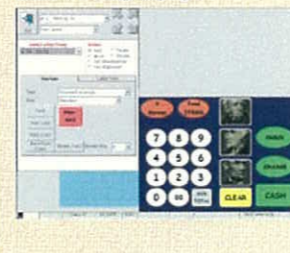

User Friendly & Flexible

The layout of the display can be quickly and easily modified in terms of menus, touch-key size, and font style/size. This software recognizes different operators at log-on and automatically switches to the appropriate display.

Sales registration display

Screen editing display

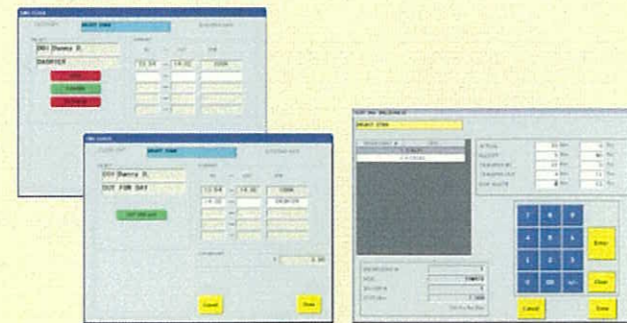

Safe & Efficient

The mutual data backup function allows you to check various reports (e.g. sales report) at any POS terminal. Since multiple POS terminals share the same data and master files, these files can be restored from another POS terminal in the event of malfunction.

Store Management

A variety of functions are included for more efficient shop management including sales registration, time keeping, and scheduler.

Employee work record display Stock control display

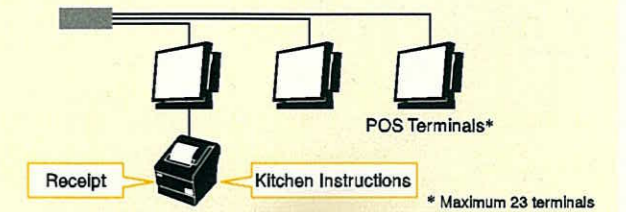

System Configuration

In addition to the stand-alone configuration, the system can be configured with multiple POS terminals and an optional kitchen video system.

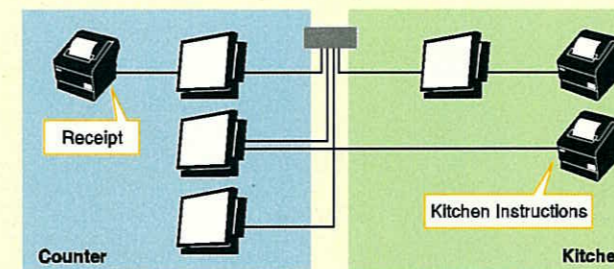

Stand-alone Configuration

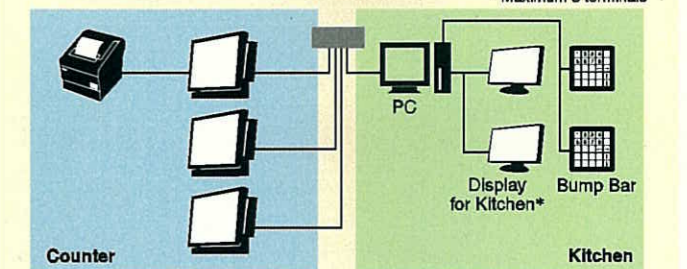

Master-slave Configuration (w/multiple POS terminals)

Kitchen Printer System

Kitchen Video System

Option
