A CHANGE IS NEEDED
WHAT PASSENGERS WANT
TAKING OFF WITH DIGITAL IDENTITY

GLOBAL PASSENGER TRAFFIC TO DOUBLE TO 6 BILLION BY 2035

AN EXTRA 10 MINUTES IN SECURITY REDUCES THE AVERAGE PASSENGER SPEND IN THE COMMERCIAL & RETAIL AREA BY 30%

US$1 TRILLION ARE BEING SPENT TO ENHANCE AIRPORT INFRASTRUCTURE TO CATER TO MORE PASSENGERS

A EXTRA 10 MINUTES IN SECURITY REDUCES THE TRAFFIC TO DOUBLE TO 6 BILLION BY 2035

WHY NEC
Fast and Accurate* (NIST)
Proven Over 700 Systems across 70 countries
Trusted Partner Deployment at over 25 Airports

To learn more, visit: www.nec.com/safety

1. Getting Ready
After making a booking, a traveller goes to the airport with her smartphone, where she opts-in to register her face and passport along with her travel information such as flight information.

2. Check-In
Information entered earlier is verified along with the passenger and passport using face recognition at the airport. From here, her face is her ID for all checkpoints.

3. Bag Drop
At a self-service kiosk, she scans her face to confirm her identity and the information is tagged to her bags, which she drops off at a self-service kiosk.

4. Border Control & Security
At a border control, facial recognition is used to check the passenger’s identity against the Government databases. Security screening is dictated by risk. Passengers can be prompted for further checks, if necessary.

5. Shopping & Leisure
With less time queuing, passengers can relax and enjoy their time until departure. Passenger is automatically identified when she approaches an airline lounge or retail shops, where she can receive customised service. Again, no need for documents.

6. Boarding
With a face scan at the gate, she gets the greenlight to board a plane. This ensures only the right passengers get on the plane.

7. Beyond the Airport
Once she lands at the destination, this Digital Identity can also be extended for secure identity management based on face recognition across hotels check-ins, car rental and theme park entry.
