

FY 2020 Briefing on ESG

**Smart Cities create social value
from the perspective of climate change**

December 5, 2019

Yutaka Ukegawa

Senior Vice President, NEC Corporation

Smart City biz addresses climate change & social value creation

- Smart Cities with cross-domain data utilization contribute to solving recent diversified social issues in cities

Sustainable City Society 5.0

Issues getting complicated, Resources decreasing

Climate change brings frequent and serious damages

Disaster Prevention

Public Infrastructure

Aging and lack of skilled engineers for maintenance

Safety

Increased need to care for elders, children, etc.

Recent Diversified social issues in cities

Aging Society

Lack of labor, budget, and economic stagnation

Industrial Acceleration

Inbound promotion, and regional activation

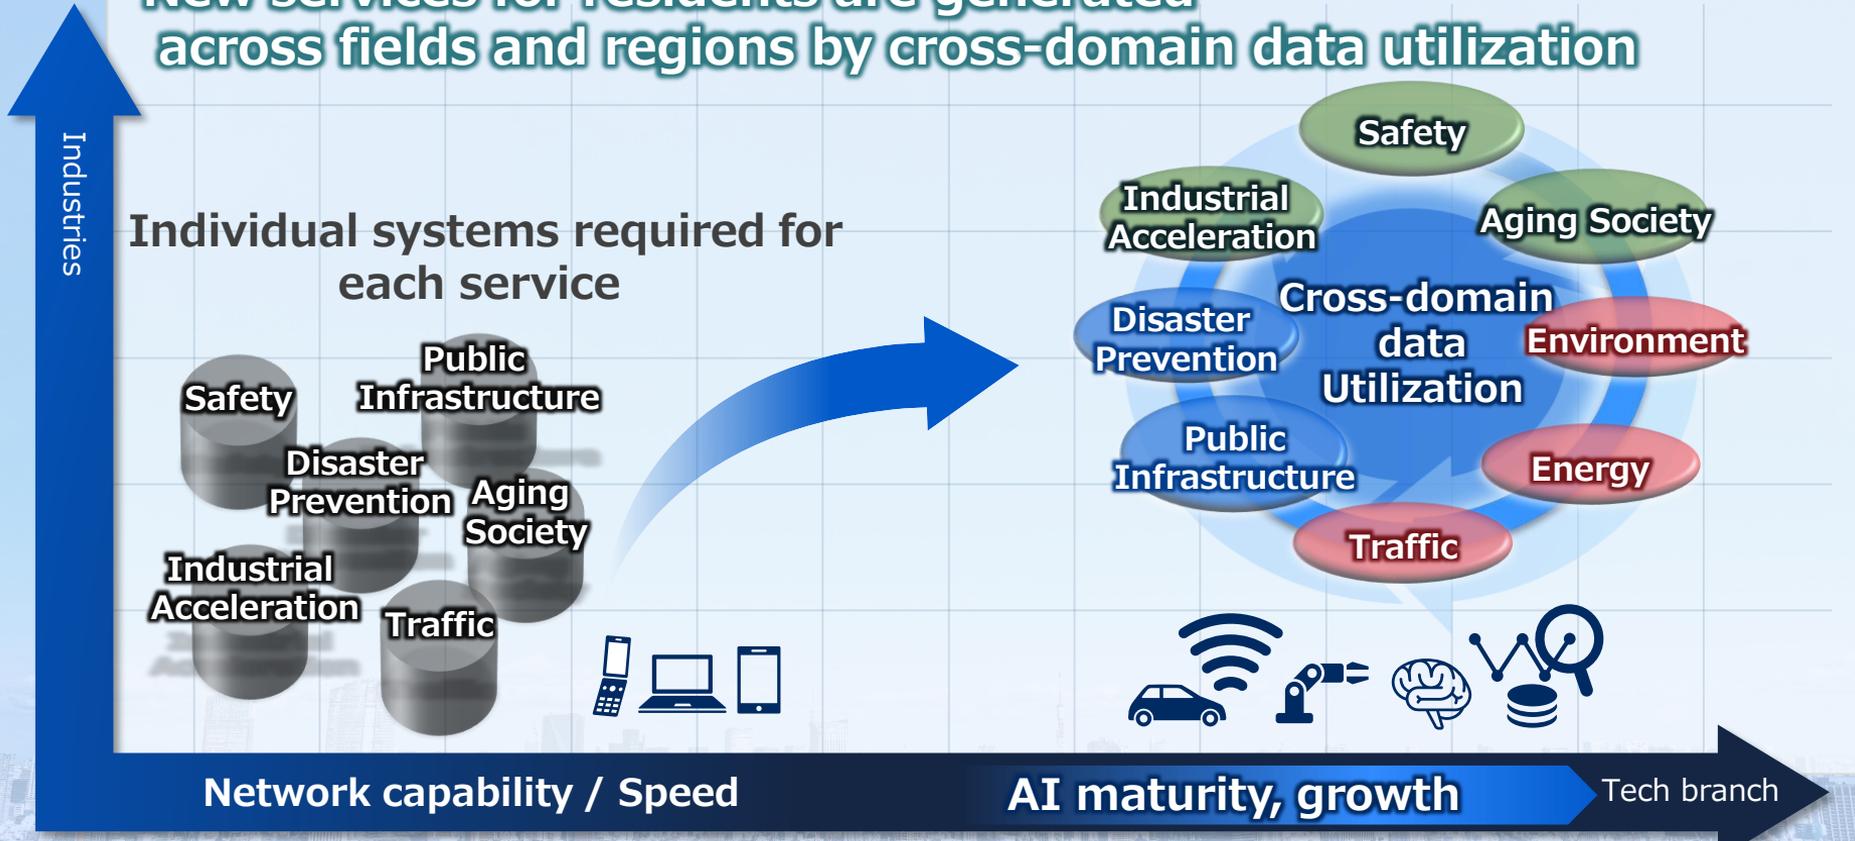

Traffic

Heavy traffic, increasing traffic accidents, budget deficit in local public transport services

Data technology for Smart Cities

New services for residents are generated across fields and regions by cross-domain data utilization

“FIWARE” - Cross-domain data utilization platform -

■ “FIWARE” penetrating globally (Members: 24 countries, 117 cities, 993 Enterprises)

- NEC**
- Joined from development stage. Only Platinum member from Japan
 - Several “FIWARE” use cases in Japan

Expand to other cities and fields

Innovation of New Services

City Management

Resident Engagement

Eco System

Cross-domain data utilization Platform

Various data available in the city

- Development started in 2011
- Expanded and localized globally
- NEC joined development in Europe

NEC joins FIWARE Foundation as a Platinum member, 2017

**FIWARE
Members**※3

- 993 Enterprises *1
- 16 FIWARE Lab nodes (Europe · Africa · India · Mexico · Brazil)
- 11 Business hubs (iHub)
- 200 FIWARE Foundation Members*2
- 2 Accelerator programs
- 24 Countries, 117 Cities *3

Source *1) <http://map.fiware.org/> *2) <https://www.fiware.org/foundation/members/> *3) <http://oascities.org/list-of-cities/>

Santander City, Spain

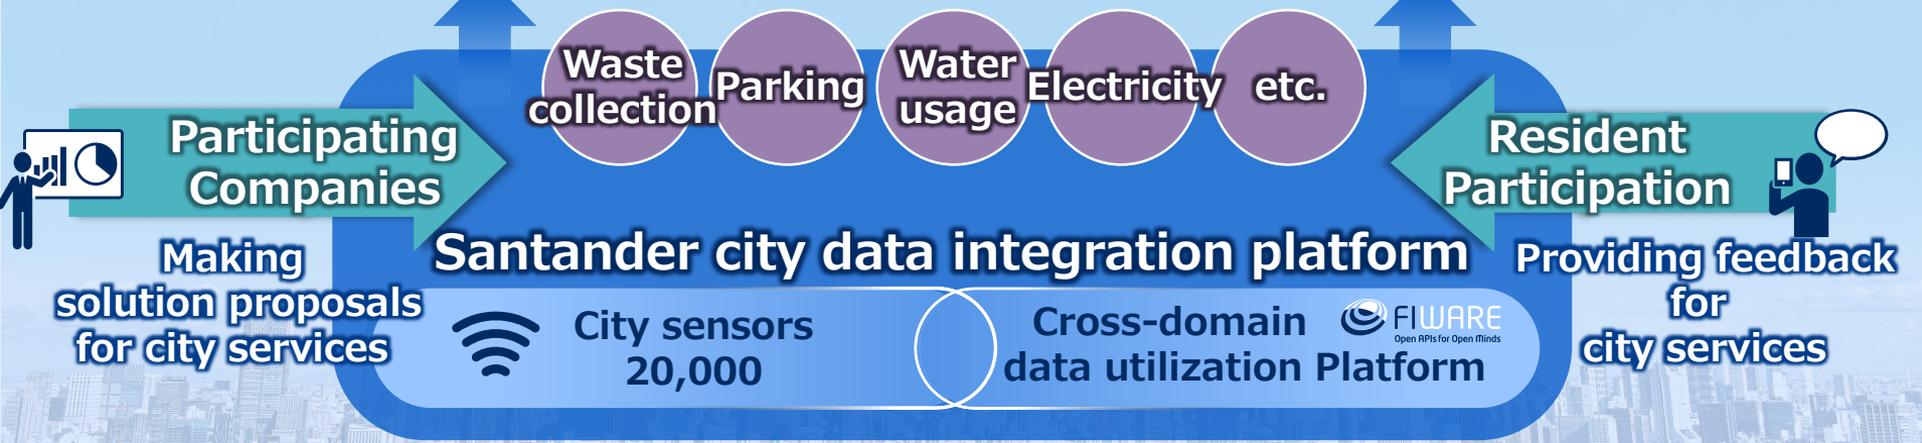

- Reduced traffic jams and enhanced efficiency of waste collection
- Sustainable ecosystem with residents and companies

P IoT sensors monitoring and providing parking availability information

Optimizing waste collection routes by using bin monitoring sensors

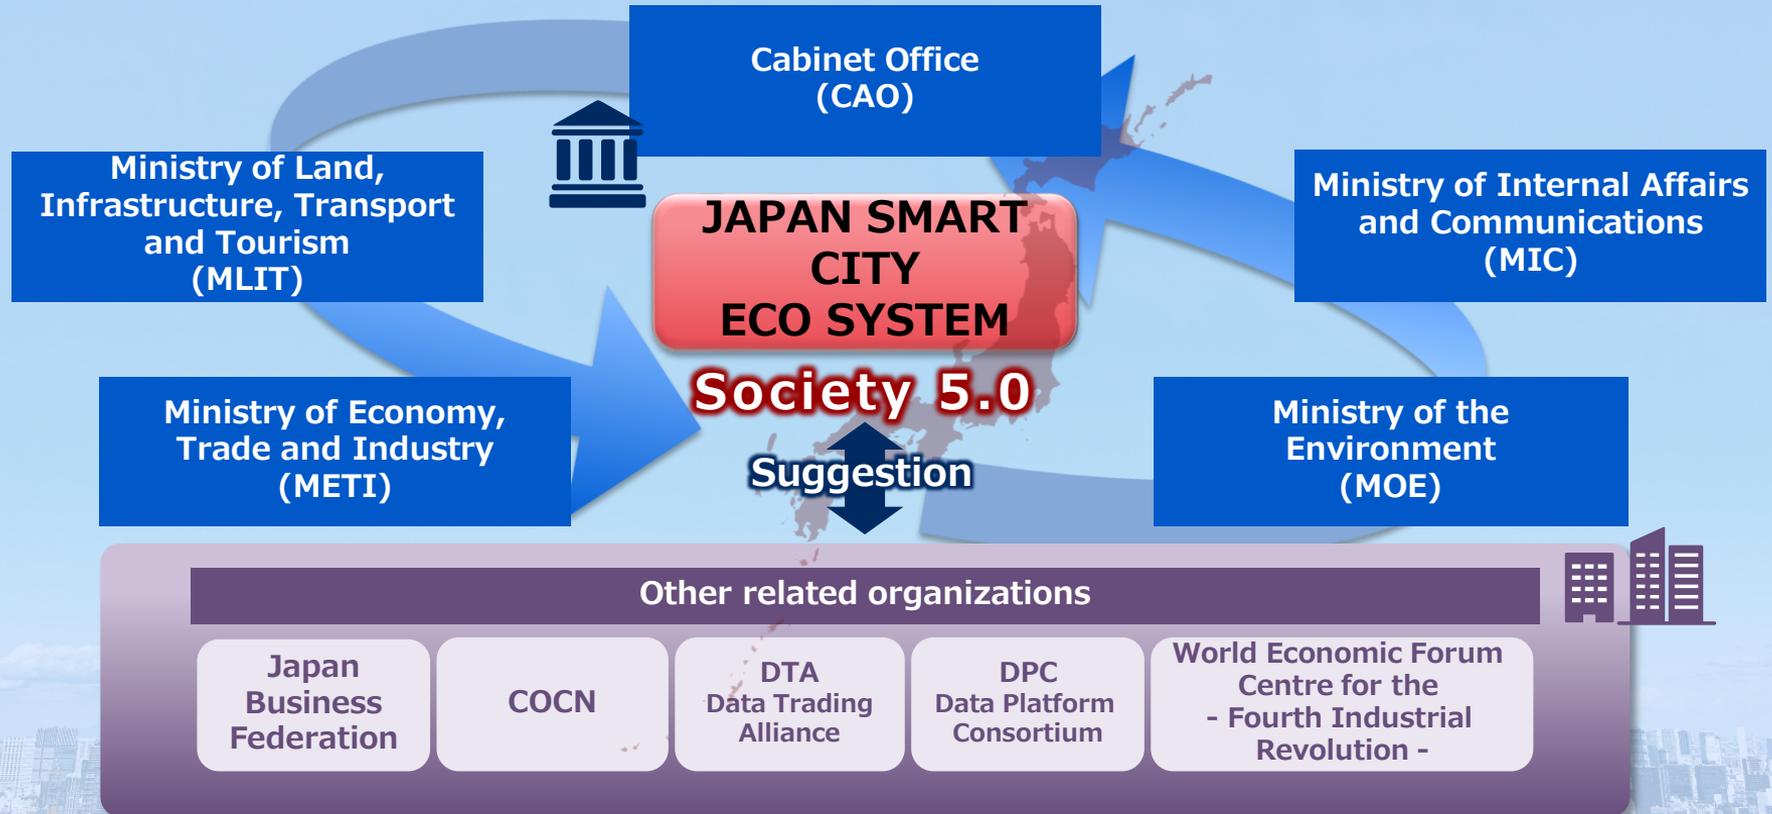

Traffic jams down 80%

Human resource costs down 15%

Smart Cities in Japan

Public and private partnerships lead the Smart City discussion

Overview of NEC Smart Cities

Acceleration of the Smart City discussion in Japan

Today's Case Studies

Takamatsu city, Aso city, Kawasaki city, Kakogawa city

Cross-domain data utilization addresses city challenges. Real-time monitoring contributes to mitigate disaster damage.

In February, 2018, MOU for establishment and utilization of Smart City solutions signed among Takamatsu city, NEC, STNet, Kagawa University, Kagawa tech college.

- Smart City Takamatsu promotion initiative ;more than 60 authorities joined
- Focus areas in cross-domain data utilization expand Disaster Prevention & Tourism to Welfare & Traffic.

Monitoring water & tide level enables early warning & evacuation instructions

City : Rapid decision, Early warning
Residents : Visualized disaster information

Disaster Prevention

Tourism

Rental cycle route analysis captures new popular spots. ⇒Develop new tourism spots.

Welfare

Collecting senior's vital data with wearable IoT sensors. ⇒Virtual care promotes senior care / illness prevention.

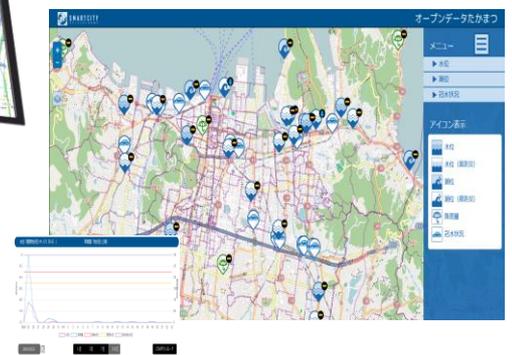

Traffic

Analyzing local governments and private sector traffic accident data ⇒Point out dangerous spots for traffic accidents.

Takamatsu city Dashboard

Dashboard for residents

Visualization of real-time disaster info generates collaboration among neighboring areas

Real-time volcanic activity information from harsh environmental conditions in Mt. Aso contributes to tourism

Comprehensive cooperation with three parties consisting of Aso city, Aso Volcano Museum and NEC signed an agreement pact (July 18, 2018)

Secure, Safer, and Sustainable city creation

Data from observing & monitoring crater utilized for disaster related measures and research

Provide 24h 365d volcanic activity information

For monitors

Monitoring 24H×365D

For tourists

Observe crater status

Aso Volcano Museum

Crater camera

Integrated Ultra high sensitivity Full HD Camera (All titanium)

Visible shooting

Near infrared photography

- Conducted PoC for optimizing collection routes for medical waste
- 9.2% mileage reduction alleviates carbon emissions and driver shortages

NEC & Kawasaki City completed research on advanced resource recycling with IoT technologies in Kawasaki Eco Town in May, 2018

※1: Estimation

- Calculate waste amounts at hospital storage with camera image analysis

- Simulate the optimum route to clinics nearby by calculating the remaining truck capacity
- Maximize usage of truck capacity

Picking up waste based on requests from hospitals/clinics

Optimizing truck routes with data analysis

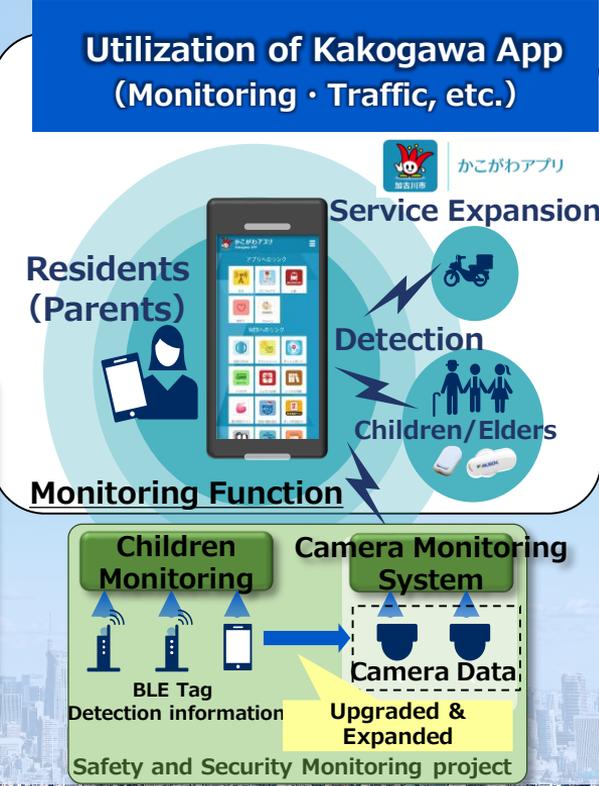

Reduce mileage by up to 16% by cooperating with multiple vendors

NEC & Kawasaki City identified outcome of AI & platform utilization for optimization in waste collection transportation and processing, May 2019

Kakogawa City, Hyogo Prefecture

- Data* utilization contributes to city safety and security
- Information provision service for residents on the "Kakogawa App"

* Monitoring, Transportation, Disaster Prevention, Welfare

Monitoring

Provide location info detected by monitoring tags

* Awarded by Ministry of Land, Infrastructure and Transport for advanced town planning competition

Japan's first Public-Private Partnership monitoring service

Transportation

Real-time distribution of bus location information

Disaster Prevention

Detection & Collection of Water level/River condition data

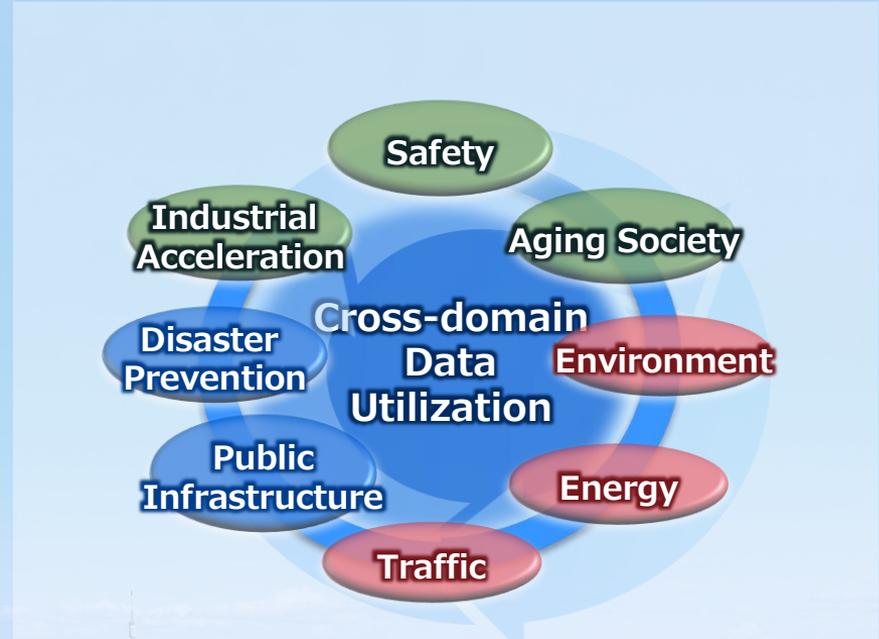

Traffic

Childcare / Caregiver burden reduction measures

Kakogawa City (Contractor: NIKKEN SEKKEI RESEARCH INSTITUTE)

Smart City biz addresses climate change & social value creation

- Smart Cities with cross-domain data utilization contribute to solving recent diversified social issues in cities

Sustainable City Society 5.0

Orchestrating a brighter world

NEC brings together and integrates technology and expertise to create the ICT-enabled society of tomorrow.

We collaborate closely with partners and customers around the world, orchestrating each project to ensure all its parts are fine-tuned to local needs.

Every day, our innovative solutions for society contribute to greater safety, security, efficiency and equality, and enable people to live brighter lives.
