

NEC Innovation Day

01

Biometric Authentication

Business Growth

Driven by Biometric Authentication

NEC Fellow

Hitoshi Imaoka

A portrait of Hitoshi Imaoka, a man with short dark hair and glasses, wearing a light-colored striped button-down shirt. He is smiling and has his arms crossed.

**“Face”
in Face recognition
DX fellow**

- 1997 Joined NEC
- 2002: Worked on R&D related to face recognition
Contributing to the Commercialization of Face
recognition Products
- 2009- Ranked No.1 in the world in Face recognition
benchmark test by NIST* five times
*National Standards and Technology Research Laboratories
- 2015- R&D of new fields utilizing knowledge of Face
recognition such as Endoscopic Cancer Diagnosis
Support System, remote gaze estimation technology,
and ear acoustic authentication technology
- 2019 Appointed as NEC Fellow
- 2021 Responsible for Digital Business Platform Unit and
Global Innovation Unit

“Essentials of Face Recognition”

World of cutting-edge AI to create future business

Released by President Inc on December 1, 2021

An easy-to-understand explanation of the cutting-edge AI technologies that will create businesses tomorrow, how to use them, and many examples of implementation

Identifying individuals by physical characteristics

Business applications expanding to payment and medical care etc.

**Authentication accuracy
which identifies 8 billion
human individuals on earth**

**Creating new value for a
society of new normal**

**Already implemented
more than 1,000 systems
in 70 countries and regions
around the world**

NEC's technology

 **Bio-IDiom**

World's No.1 Biometric authentication technology

Biometric Authentication

Not only Face recognition, but also possesses world-leading technologies in major Biometric authentication (face/iris/fingerprint)

2021 Worldwide Top Acquired Double Face recognition and Iris recognition

Face Recognition

World's No.1

FRVT Ongoing (2021)

- FRVT (2019)
- FIVE (2017)
- FRVT (2013)
- MBE (2010)
- MBGC (2009)

Multi-modal

Iris Recognition

World's No.1

IREX 10 (2021)

- IREX IX (2018)
- (Iris Exchange IX)

Fingerprint Recognition

World's No.1

Acquired 8 times in total

- MINEX (2016,2006)
- PFT/PFTII (2013,2009)
- FpVTE (2012,2003)
- SFSE (2004)
- ELFT (2007)

Newborn fingerprint

※NEC's fingerprint Identification technology, Facial recognition technology, and iris recognition technology are ranked first in benchmark testing conducted by National Institute of Standards and Technology (NIST).

※NIST does not recommend a particular product/service/enterprise by the U.S. government.

World's first

(out of 62 companies worldwide)

Latest research by Frost & Sullivan
(2020 Global Biometrics in Security Market)

the company's **significant R&D investments** in facial, iris, fingerprint, finger vein, and behavioral biometrics, have vaulted **NEC to industry leadership** not only in accurate and multimodal biometrics but **also in developing relevant and modernized identity solutions that are highly scalable.**

As the pioneer of many of the world's largest national biometric ID programs, significant passenger biometric and identity programs, and large-scale biometric access control systems, **NEC remains the global biometric industry leader.**

First in the hotel industry Face and iris multi-modal Biometric authentication Entrance Control

NEC's Multimodal biometric authentication contributes hotels to achieve both advanced security measures and identification efficiency during major international sporting events

Hotel Mariners' Court Tokyo

From July 13, 2021 to September 10, 2021, NEC conducted a demonstration of a multimodal biometric authentication access control system that combines face and iris recognition for hotel employees

- A multimodal biometric authentication system using face and iris has been installed at the employee entrance.
- Identification of employees passing through the employee entrance, and manage their history by linking with the access control system.

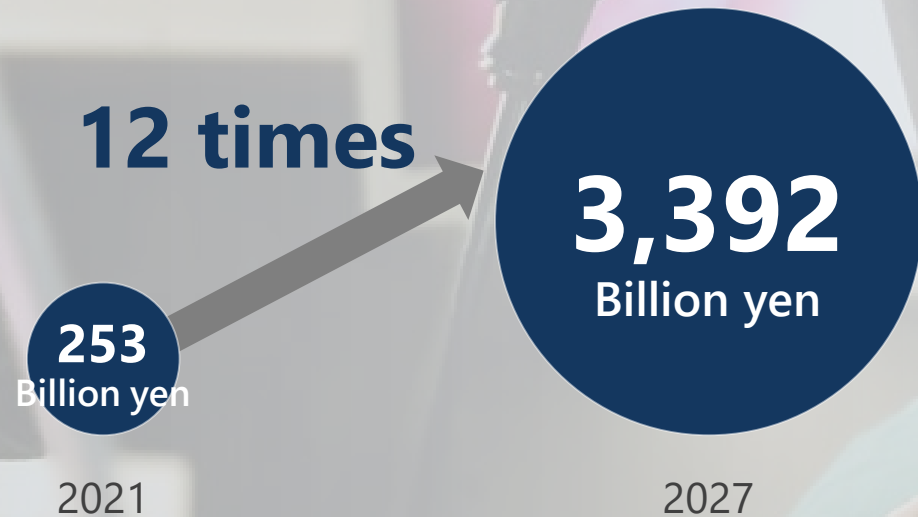

Biometric Authentication

Multimodal Biometric authentication

Technology That Create the Future Healthcare and Life Science

Forecasted Market Size of AI Diagnostics (Global)
