

**NEC Innovation Day**

NEC

Executive vice president, CTO and  
member of the board

**Motoo Nishihara**

# Driving NEC's growth

Contribution to the mid-term management plan 2025 and expansion of new business based on our cutting-edge technology

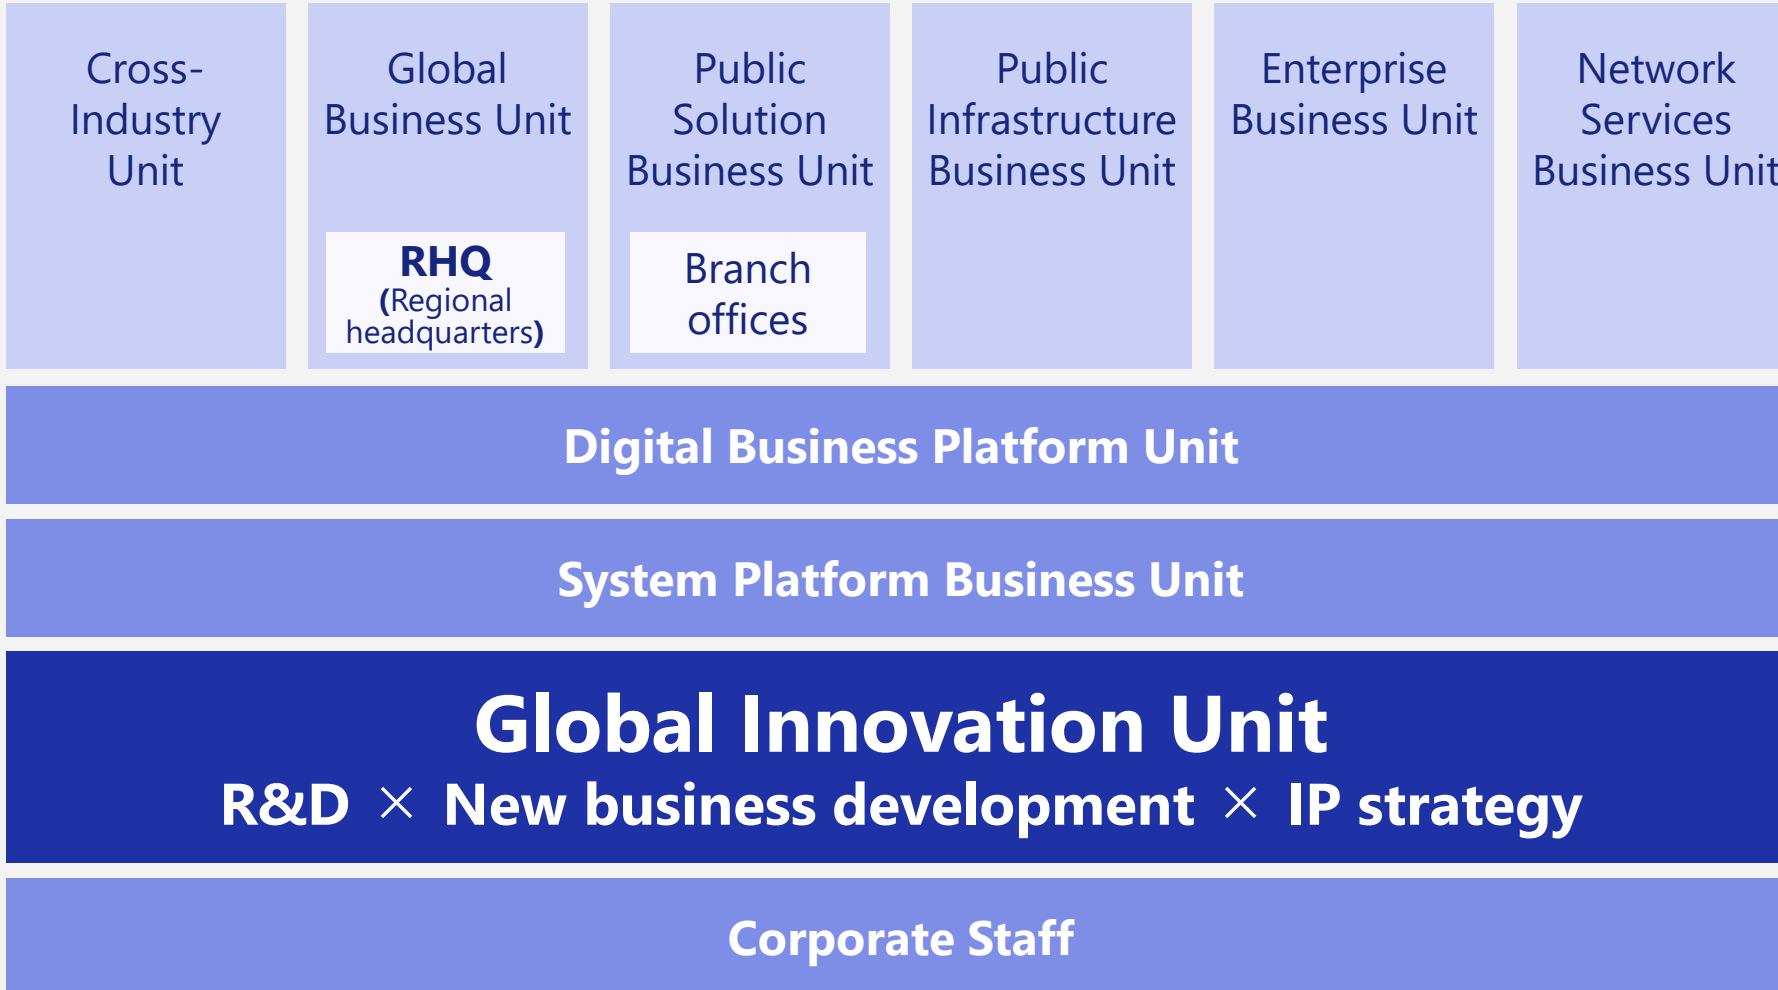

November 30, 2022

NEC

Executive vice president, CTO and member of the board

Motoo Nishihara

## NEC organizational structure (fiscal 2022)

# Expanding R&D and business development opportunities, utilizing our global assets

## NEC Laboratories Europe

Creation of solutions and technology through EU projects and high-tech social implementation

## NEC X

Supports of startup companies that contributes to successful business establishment

## NEC Laboratories America

R&D of cutting-edge technologies, taking locational advantage of latest technological leader region

## DXAS Agricultural Technology LDA

Contributing to sustainable agriculture around the world by addressing water scarcity issues on farms and promoting more environmentally friendly and profitable farming.

## AI Drug Development

Personalized therapies using cutting-edge AI technologies

## Israel Research Center

Rapid creation of solutions that combine NEC's technology with advances in technology from outside the Group, leveraging the world's largest source of start-ups

## NEC's Six Domestic Research Laboratories

Controls over NEC R&D worldwide. Mainly focus on AI (analysis and recognition), security, ICT platforms developments, and other cutting-edge technologies such as quantum computing and devices

## BIRD INITIATIVE

Unprecedented co-creation type of R&D business originated in Japan

## NEC Laboratories China

AI and network related R&D

## NEC Laboratories Singapore

Co-creation of innovative solutions with customers and partners, mainly for developed countries

## NEC Laboratories India

Creation of core technologies and solutions to address the challenges of emerging countries

# Achieving the mid-term management plan 2025 and NEC 2030VISION by technological and business innovations

## Creating global No. 1 technologies

Increasing new global No. 1 technologies

## Cutting-edge business innovation

New business development processes and finance scheme

## High potential human resources

Acquire and train business × Technology professionals

## Improving innovation environment

Establish innovation base /  
No. 1 AI simulation environment among Japanese companies\*

\* Source NEC, March 2023 (scheduled)

## The mid-term management plan 2025 focus area

**01**

**Contribution to the mid-term management plan 2025 and  
NEC 2030VISION based on our global No.1 technology**

**02**

**Creating new business by cutting-edge business innovations**

**03**

**Develop people / innovation environment for new growth**

**01**

**Contribution to the mid-term management plan 2025 and  
NEC 2030VISION based on our global No.1 technology**

**02**

Creating new business by cutting-edge business innovations

**03**

Develop people / innovation environment for new growth

Creation of global No.1 technology

# High technological competitiveness in the world - AI, security and communication -

Global No.1 technology

# World No.1 biometric authentication technologies

## Technology

Facial recognition

**World No.1**

- FRVT Ongoing (2022\*1, 2021\*2)
- FRVT(2019)
- FIVE (2017)
- FRVT (2013)
- MBE (2010)
- MBGC (2009)

Iris recognition

**World No.1**

- IREX 10 (2021)
- IREX IX (2018) (Iris Exchange IX)

Fingerprint recognition

**World No.1**

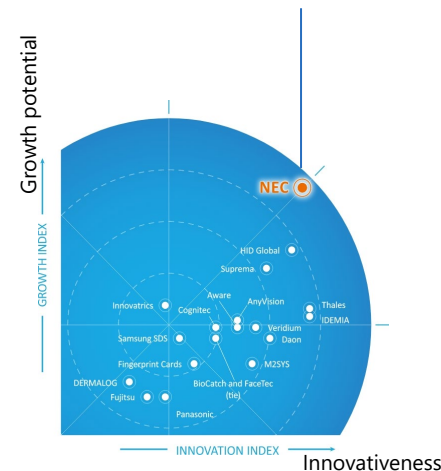

- MINEX(2016,2006)
- PFT/PFT II (2013,2009)
- FpVTE (2012,2003)
- SlapSeg(2004)
- ELFT(2007)

\* NEC's fingerprint recognition, Facial recognition, and iris recognition technology are ranked No.1 in benchmark testing conducted by the National Standards and Technology Research Laboratories (NIST). Evaluation results by NIST do not recommend any particular product/service/companies by the U.S. government.

## Business

NEC's biometrics solutions  
(out of 62 global companies)

**World No.1**

Up-to-date survey by Frost & Sullivan, a research firm

## Brand

“Biometric authentication”

**No.1 share of mind**

Rank	Corporate name
<b>1</b>	<b>NEC</b>
2	Fujitsu
3	Hitachi
4	Google
5	Microsoft

NEC survey (2022)

\*1 Ranked No. 1 by NIST for FRVT Ongoing 1: N Identification (Jan. 2022) Identification (T>0) under the category Gallery: Mugshot; Probe: Mugshot; N=12,000,000, as well as the category Gallery: Border; Probe: Border ΔT ≥ 12 years; N=3,000,000 and the category Gallery: Mugshot; Probe: Mugshot; N=12,000,000  
\*2 Ranked No. 1 by NIST for FRVT Ongoing 1: N Identification (Aug. 2021) Identification (T>0) under the category Gallery: Mugshot; Probe: Mugshot; N=12,000,000 as well as the category Gallery: Border; Probe: Border ΔT ≥ 10 years; N=16,000,000

# Providing biometric authentication system for various scenes

Provide for various scenes

**Multimodal recognition**  
-Facial and iris recognition-

Error rate: 1/10 billion

**Iris recognition**

**Facial recognition**

Providing diverse social services with a wide lineup of highly-accurate technologies

Taking advantage of the strengths of each recognition

Stop & Go

Walk-through

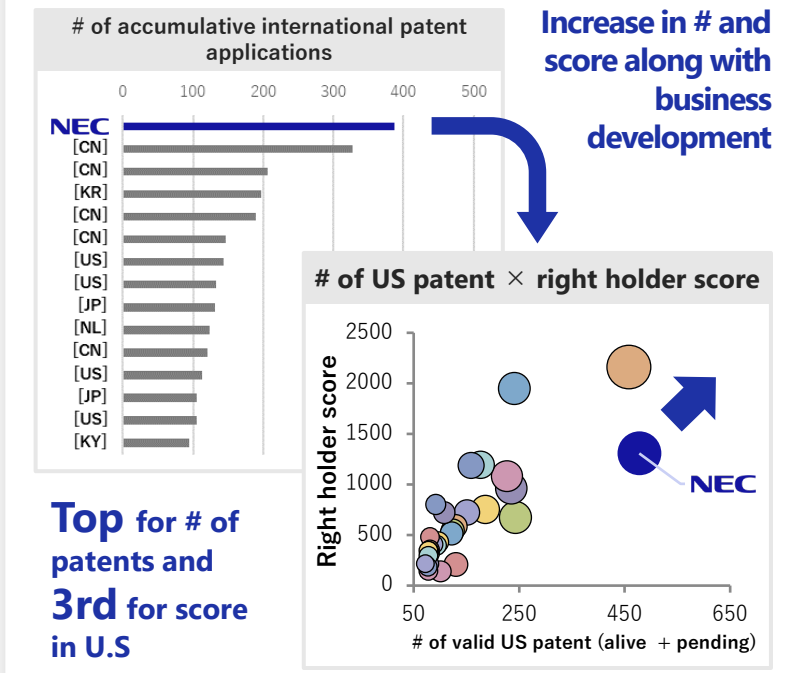

Gateless

Stress-free

# Global No.1 in the three major areas of Biometric authentication, Image recognition, Analysis / Prescription AI

- Targeting global No.1 patents in each areas, in 2025
- Biometric authentication, Image recognition, Analysis / Prescription AI
  - ✓ Contributing to most part of NEC business

## Biometric authentication

## Image recognition

## Analysis / Prescriptive AI

Right holder score: index for strength of patent portfolio of each patent right holder by Patent Result Co. Nov. 2022 (Our research)

# NEC's strength in coordination of DX and digital twins

## Requirements for digital twins

**Elaborate modeling of real world**

**Optimization of complex social issues**

**Control and handling that can satisfy decision makers**

**Trusted and green platforms**

## Strength of NEC's technology

Modelling

**World's best biometrics and image recognition technologies**

Optimization

**World's best analytic AI technologies**

Control/Handling

**World's best prescriptive AI technologies**

Platform

**Track record in mission-critical IT infrastructure (Security / Computing / Networks)**

# NEC technology contribution to the mid-term management plan 2025 / NEC 2030VISION

## List of technologies introduced today

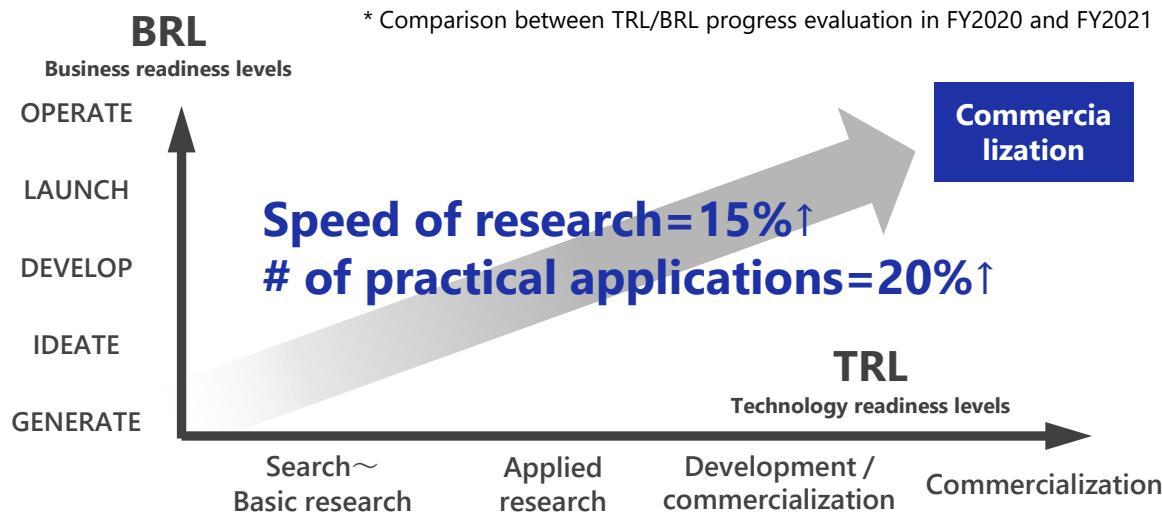

Technology area	Technology	Phase	The mid-term management plan 2025 / NEC 2030VISION	Exhibition	Press
Modeling (Biometric authentication)	Gate-less biometric authentication	Development	CORE DX	○	30 <sup>th</sup> November 2022
	Multi-modal recognition -Facial and iris recognition-	Commercialization	CORE DX	○	8 <sup>th</sup> November 2022
Modeling	Facility / Road digital twin(Improving efficiency of bridge inspection and management with SAR* satellite x AI)	Development	CORE DX	○	6 <sup>th</sup> July 2022
	Worksite digital twin(Identifies dozens of tasks in real time through video recognition)	Development	CORE DX	○	20 <sup>th</sup> June 2022
	Worksite digital twin(Digitalization of various activities of workers in worksites)	Development	CORE DX	○	28 <sup>th</sup> November 2022
	Health condition digital twin(Physical care innovation with digitalization)	Research	Healthcare / Life science	○	—
Optimization	Pseudo quantum annealing(NEC vector annealing service)	Commercialization	CORE DX	○	29 <sup>th</sup> August 2022
	Optimization Ssupport compiler	Research	CORE DX	○	—
Prescription/ Controlling	Human cooperative robot control	Development	CORE DX		27 <sup>th</sup> January 2022
	Explainability that people can understand(Explainable AI)	Research	CORE DX, Healthcare / Life science		—
	AI negotiation between AIs with different interests	Development	CORE DX		24 <sup>th</sup> August 2022
Platform	Visualize the configuration / risks of ICT systems / device to ensure transparency regarding security	Development	CORE DX,GLOBAL 5G		9 <sup>th</sup> November 2022
	Quantum cryptography communication	Development	GLOBAL 5G		4 <sup>th</sup> October 2022
	Application-aware IT/NW control	Development	CORE DX,GLOBAL 5G	○	14 <sup>th</sup> February 2022
	Beyond 5G distributed-MIMO	Research	GLOBAL 5G	○	31 <sup>st</sup> October 2022
	High-capacity multi-core submarine cables	Development	GLOBAL 5G		28 <sup>th</sup> March 2022

\* Synthetic Aperture Radar

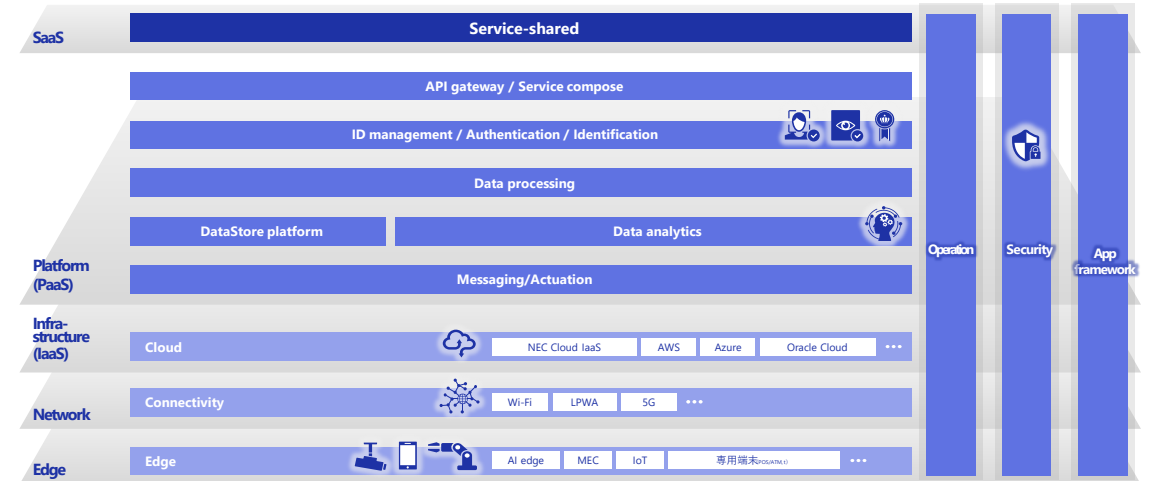

# Accelerating commercialization through various R&D managements

## Process management with BRL/TRL (2020~)

## Common technologization through NEC digital platform

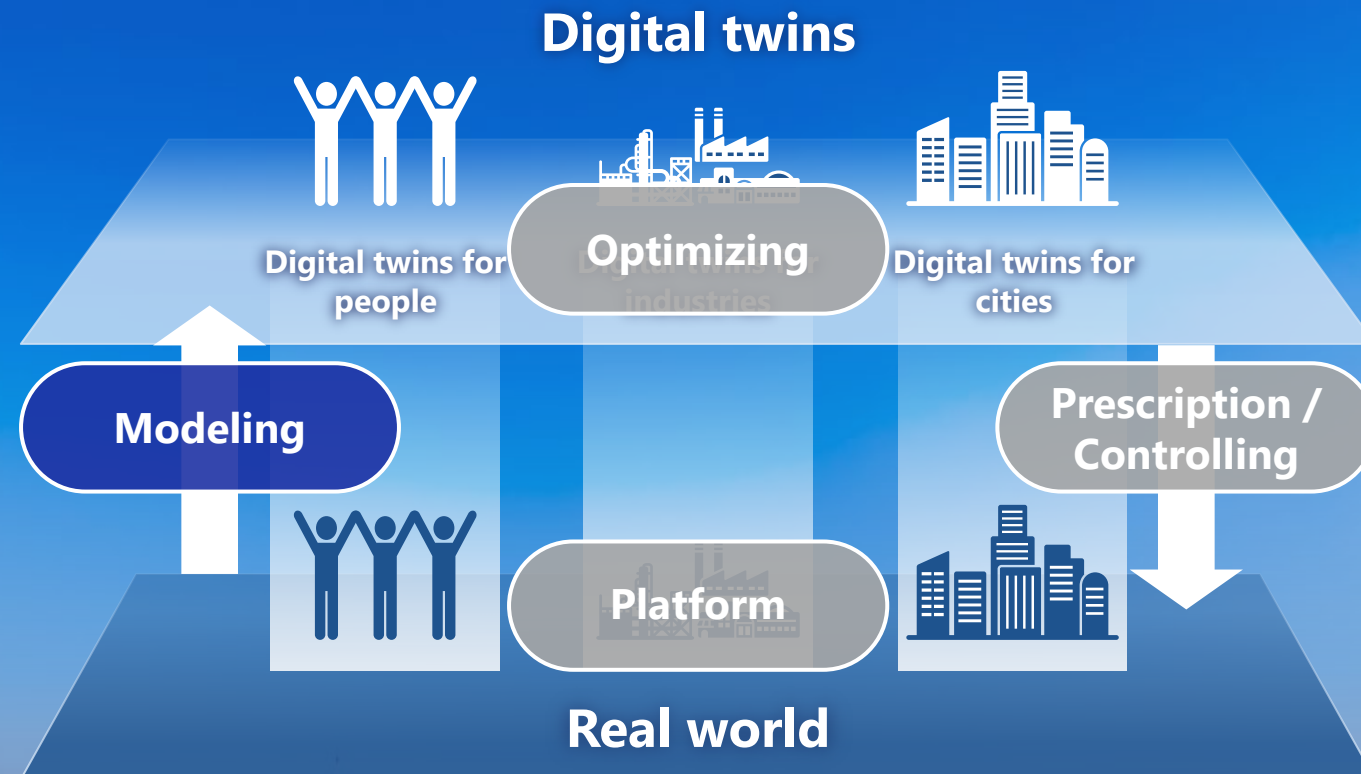

## Expansion of development functions (applied research & practical development)\*

\* manpower base

# Modeling

Monitor changes in cities, industries and people in real time through a variety of sensors to create detailed models

# Real world modeling with cutting edge sensing analysis technology

## City

### Facility / Road digital twin

Improving efficiency of bridge inspection and management with SAR\* satellite x AI

Monitoring in mm order / Inspection 720K bridges in Japan, in 5years

Commercializing in 2025 to promote digitalization for infrastructure management.

Announced July 6, 2022

## Industry

### Worksite digital twin

Identifies dozens of tasks in real time through video recognition

Digitalization of various activities of workers in worksites (DAIWA HOUSE INDUSTRY CO., LTD., etc..)

Convert manual works autonomous / smart in manufacturing / construction / logistics / retail

Commercialization during FY2022

Practical application in FY2023

Announced June 20, 2022

Announced November 28, 2022

## Human being

### Health condition digital twin

Providing appropriate physical care with personal precise digital twin

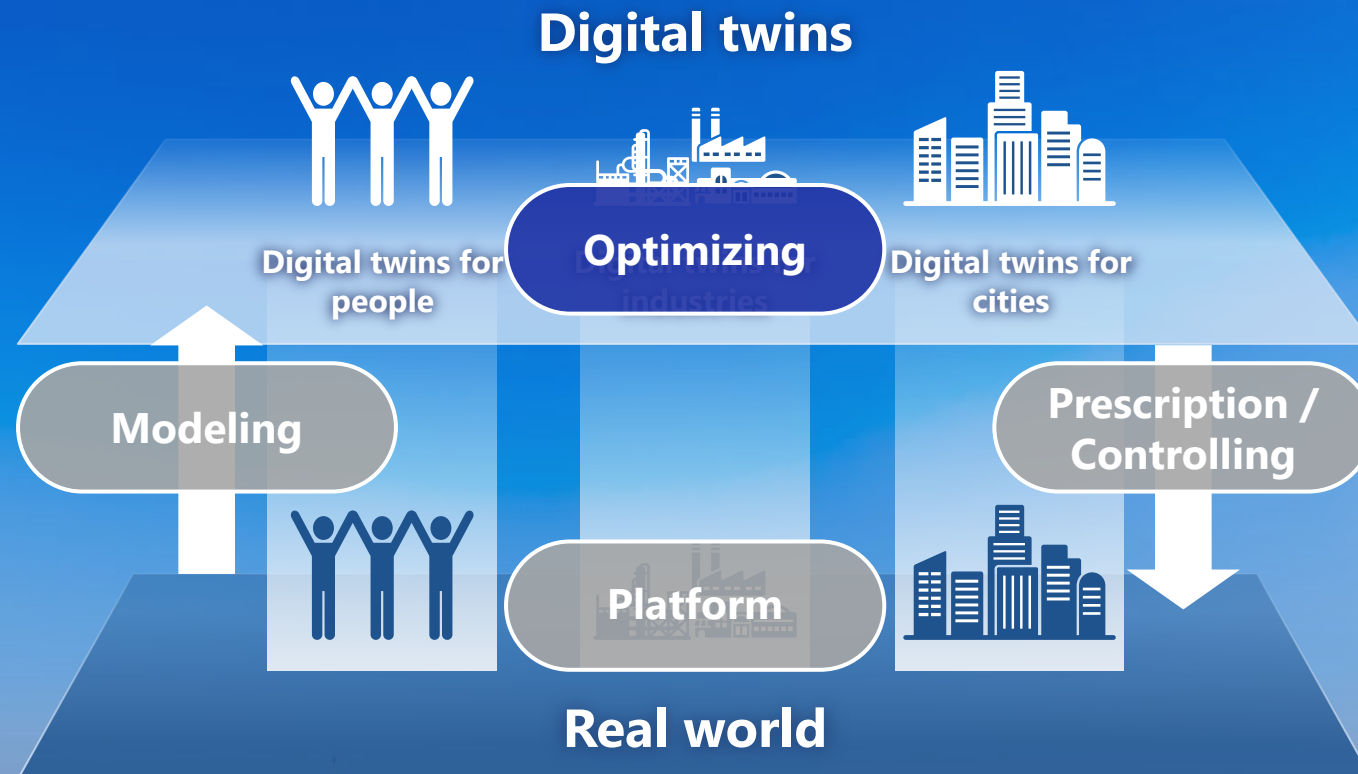

Enabling personal physical care everywhere / every time

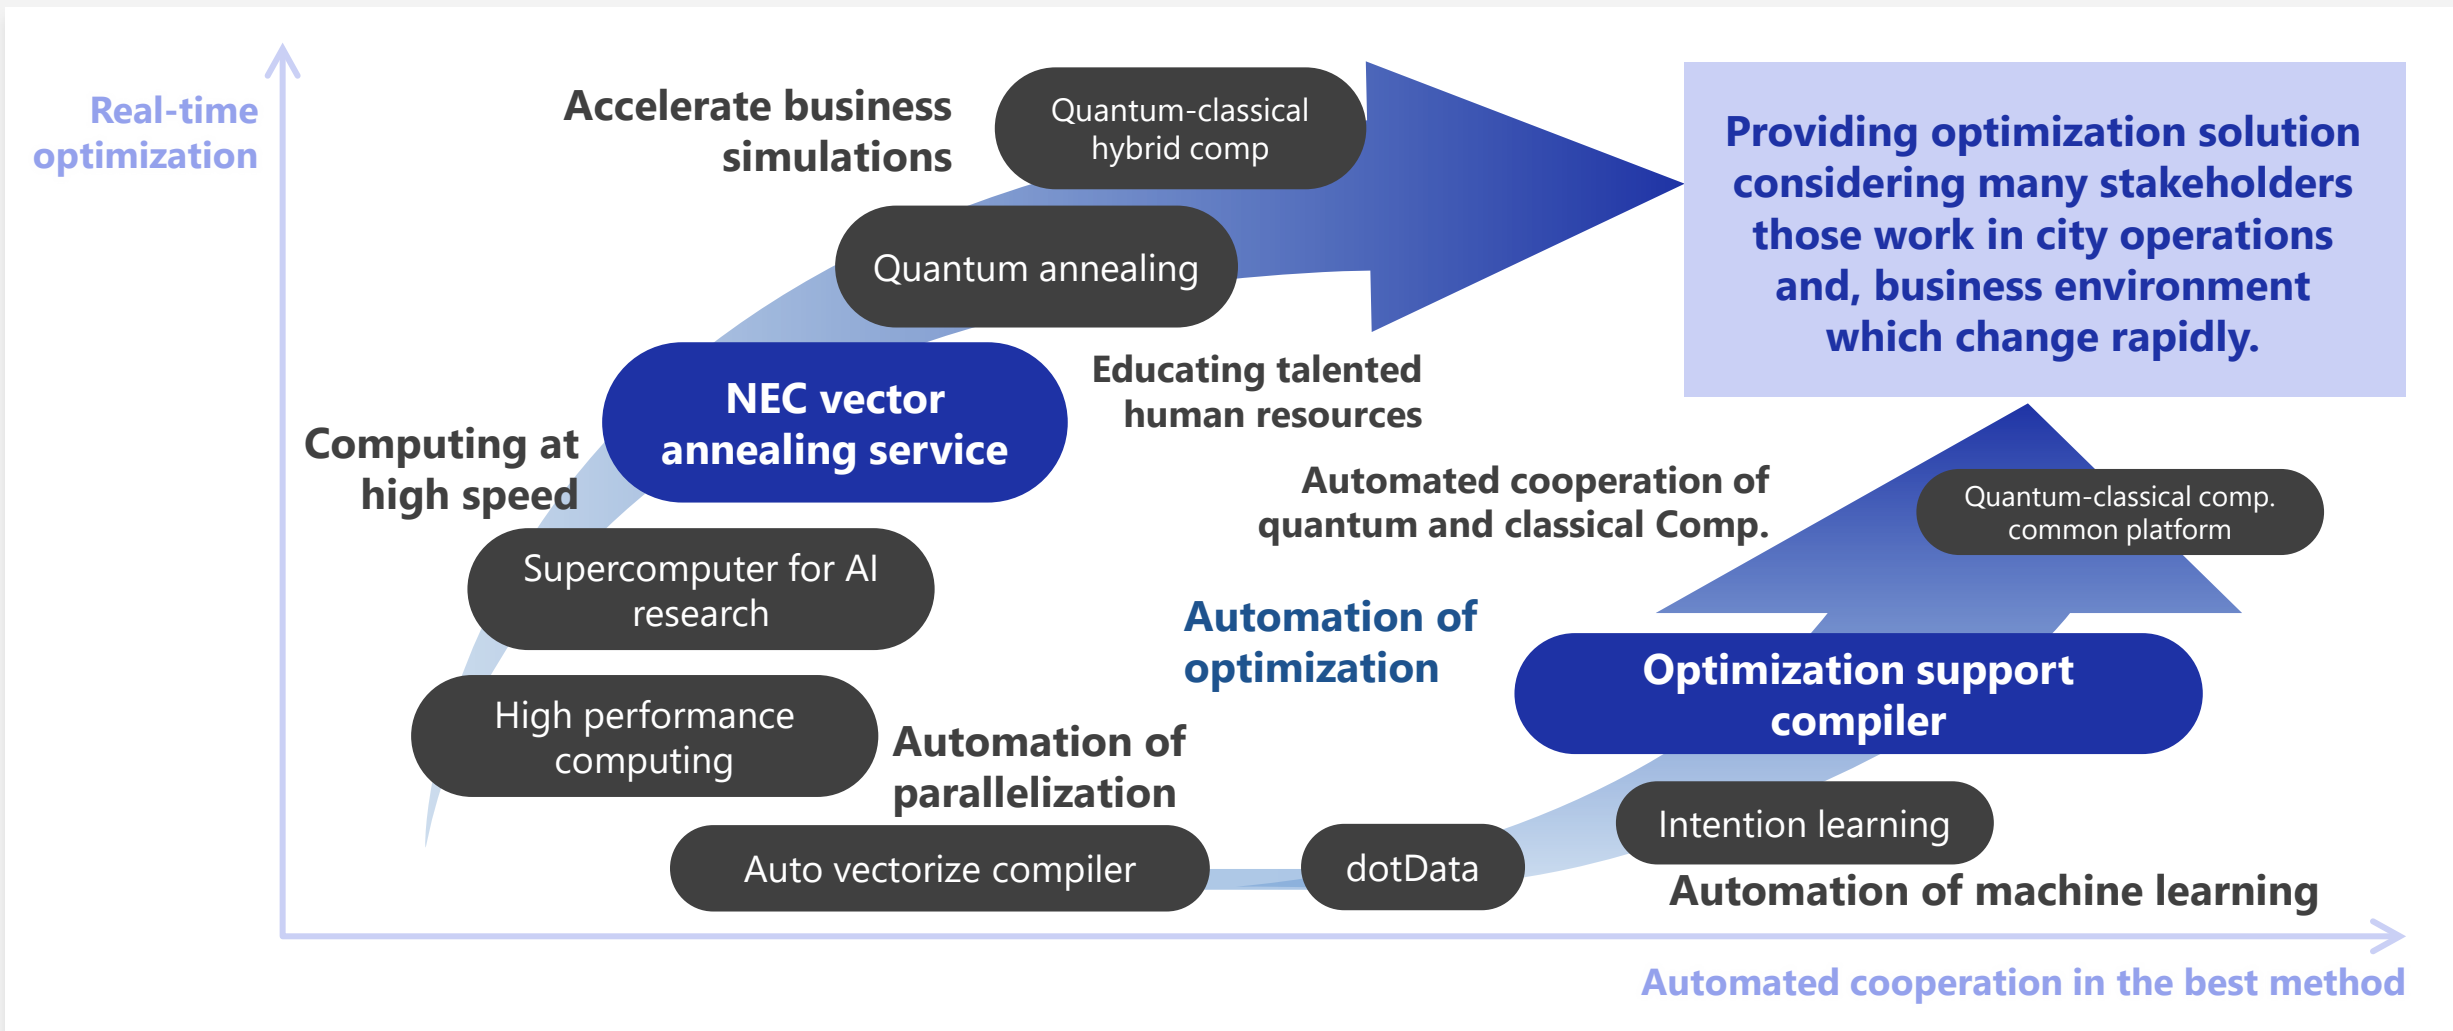

\* SAR(Synthetic Aperture Radar)

# Optimizing

Formulate complex social issues and optimize them rapidly from an enormous number of combinations

# Optimization problem solving technology to realize sustainable society

# Optimization technology to accelerate social issues optimization(examples)

## NEC vector annealing service

Pseudo quantum annealing to select the best candidate option from a huge number of combinations in a realistic time

November 2021 : Started cloud service  
November 2022 : Accelerate solving performance by 30x

Announced August 29, 2022

## Optimization support compiler

Automatic conversion to the appropriate conditional formula for each property of the optimization tool.  
Providing developing environment to efficient optimization programming

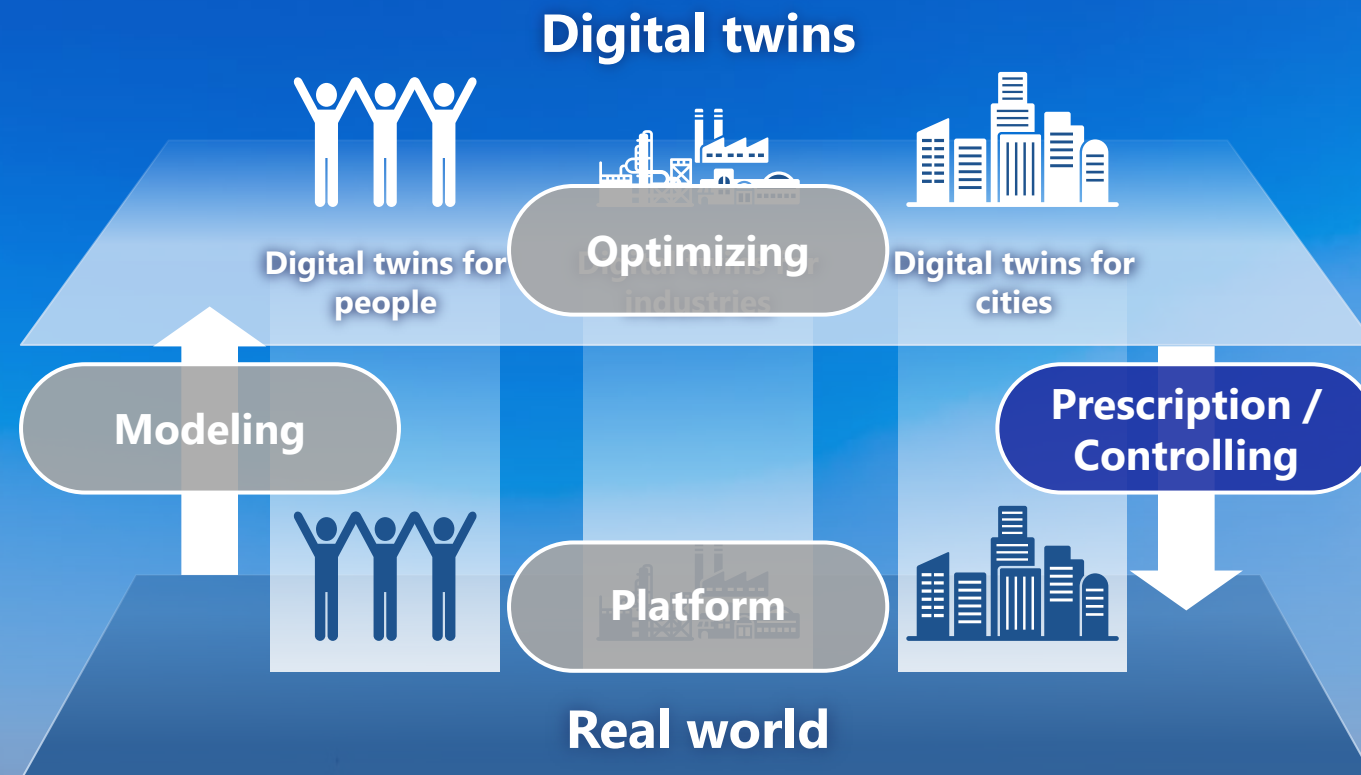

Developing toward middleware as a common platform for solving optimization problems, regardless of whether they are classical or (pseudo) quantum

# Prescription / Controlling

Increase the persuasiveness and credibility of decision makers through explanations and dialogues that are tailored to people

# Plausible prescription and control for decision-maker

## Human cooperative robot control

1. Performing complex task autonomously such like merchandise display with simple instruction
2. Robot autonomously decides and executes risk avoidance against environment changes, etc.

- ➔
1. Targeting actual work during 2023-24
  2. Practical application in FY2023

Announced January 27, 2022

## Explainability that people can understand(Explainable AI)

Providing human behavior explain by natural language based on time-series video and NLP joint analysis

➔ Planning commercialization in industrial smartization, sport support and so on.

## AI negotiation between AIs with different interests

Optimizing transaction instantly between human-AI or AI-AI through autonomously negotiation  
EX) Number of orders, delivery date etc.

➔ Commercialize through automated negotiation SCM consortium in 2023

Announced August 24, 2022

# Platform

A platform that is comprehensively reliable, from data to systems,  
as well as highly-efficient and environmentally friendly

(Security / Computing / Network)

# Realizing total trust and promoting economic security

## Ensure safety and reliability of open ICT systems

Visualize the configuration / risks of ICT systems / device to ensure transparency regarding security

November 2022: Field test with NTT toward business apply  
First half in FY2023 : Planning to launch open consortium

Announced November 9, 2022

## Domestically produced quantum cryptography communication

Ultimate cryptography communication with information-theoretic security utilizing quantum properties

Starting field test with NICT, Kyoto University and Keio University in SIP\*  
Received orders for test beds for social implementation in FY2022

\* SIP (Cross-ministerial Strategic Innovation Promotion Program led by cabinet office)

# High-speed high-capacity network supporting digital twin

## Beyond 5G distributed-MIMO

Solving the problem of radio wave disconnection caused by obstacles, with AI, which is a challenge for the spread of ultra-high-capacity communications.

Promoting proof-of-concept with NTT and NTT docomo for practical realization over Beyond 5G(28GHz band implementation, IOWN)

Announced October 31, 2022

## High-capacity multi-core submarine cables

Realizing sustainable high-capacity submarine cable with multi-core fibers

Top quality international conference OFC publicized as a remarkable achievement

Targeting practical realization till mid-2020s. (1.74petabit@3000km)

Announced March 28, 2022

## Application-aware IT&NW control

Autonomous and real time ICT platform control according to properties of application

Targeting a platform for all digital twin which respond quickly to city or industry change

Announced February 14, 2022

01

Contribution to the mid-term management plan 2025 and NEC 2030VISION based on our global No.1 technology

02

**Creating new business by cutting-edge business innovations**

03

Develop people / innovation environment for new growth

## Basis for NEC's business innovations

- Making new business creation processes systematic and internally standardized
- Widening gateway for new business creation with global alignments / ecosystems

### Forming expertise from wisdom around the globe

Proposals on technological seed directions

Proposals on market directions

Proposals on a global scale, both internally and externally

### Systemizing processes for new business creation

### Diverse outcomes from synergies with NEC

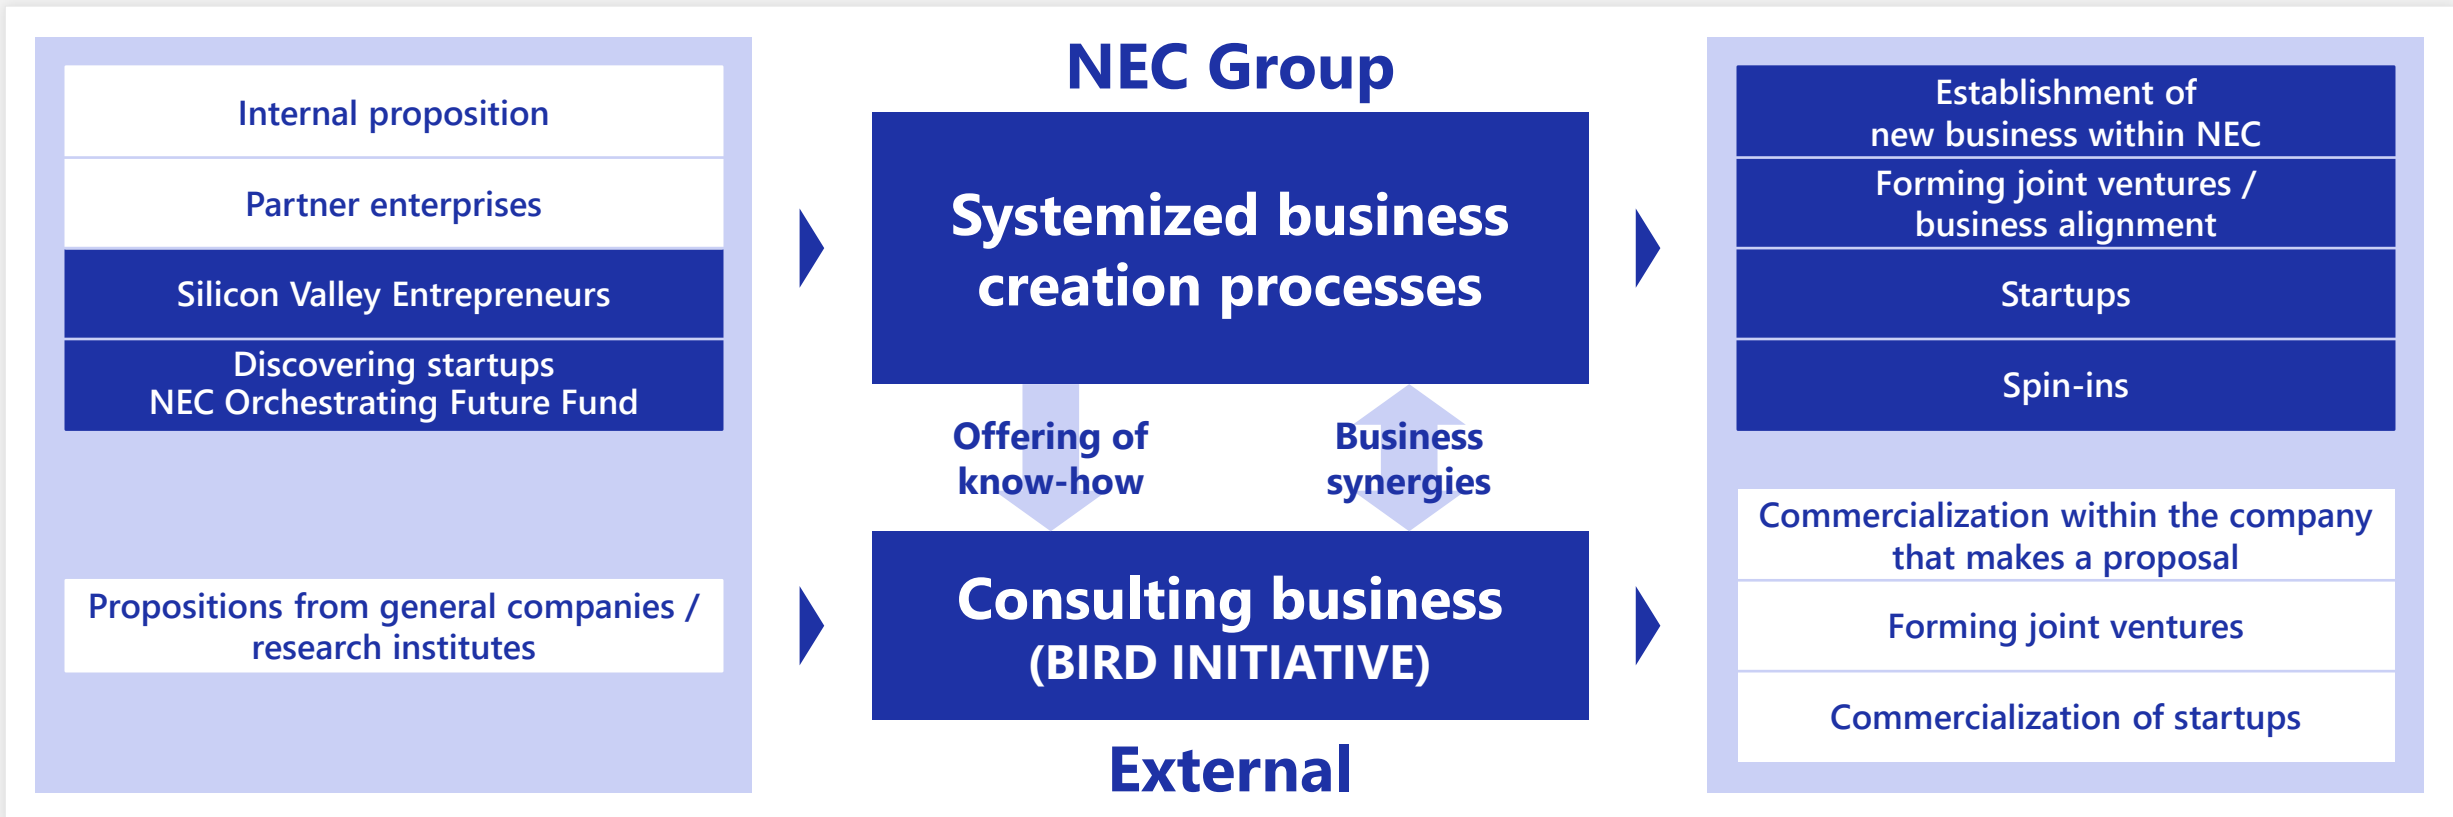

Establish new business internally

Startups

Forming joint ventures / partner collaboration

# Basis for NEC's business innovations

Achieving business synergies by offering systemized processes as NEC's consulting business, while taking various initiatives to widen gateways for new business creation

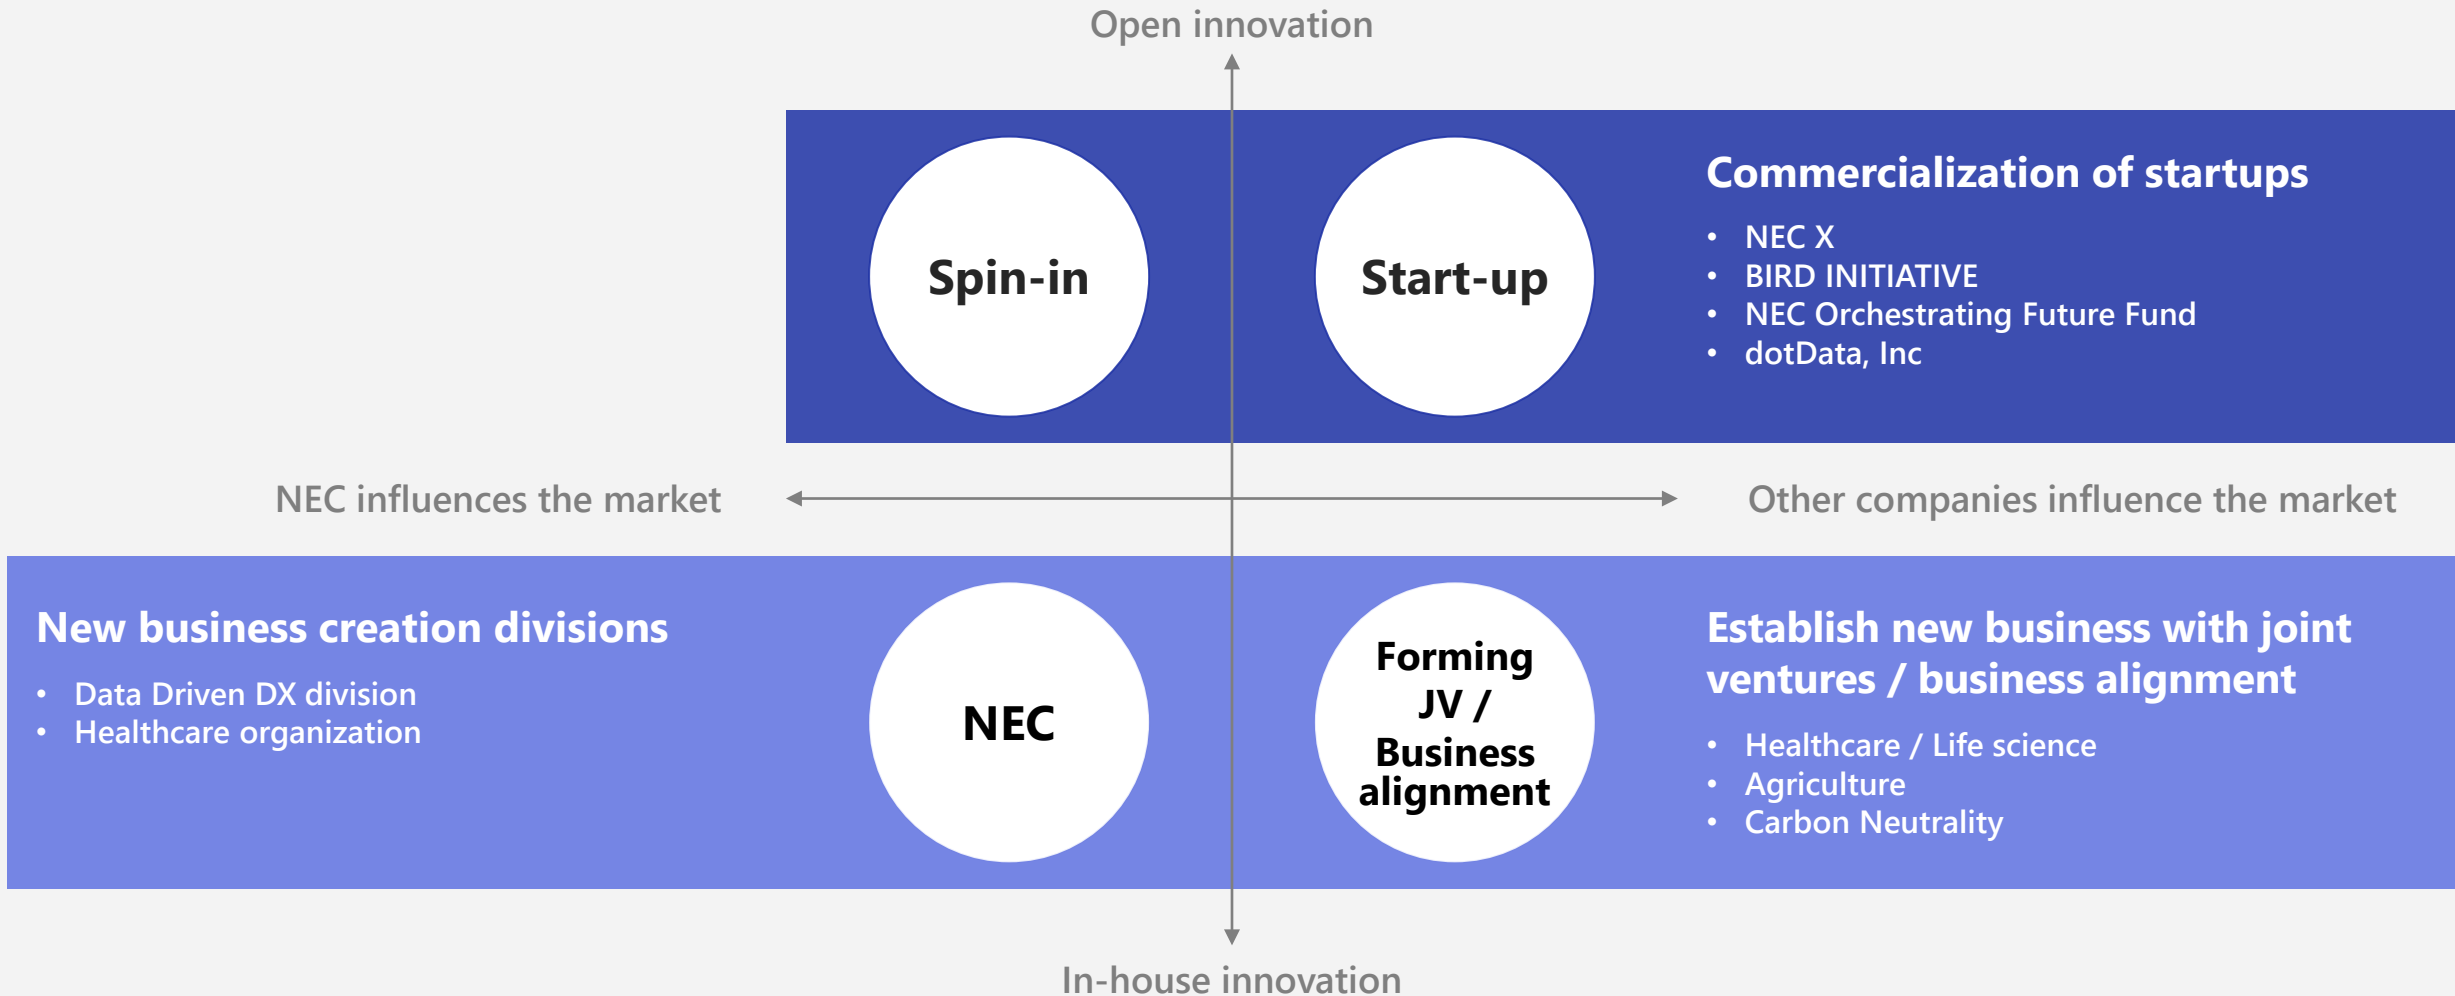

# (Reference) Systemizing process for new business creation

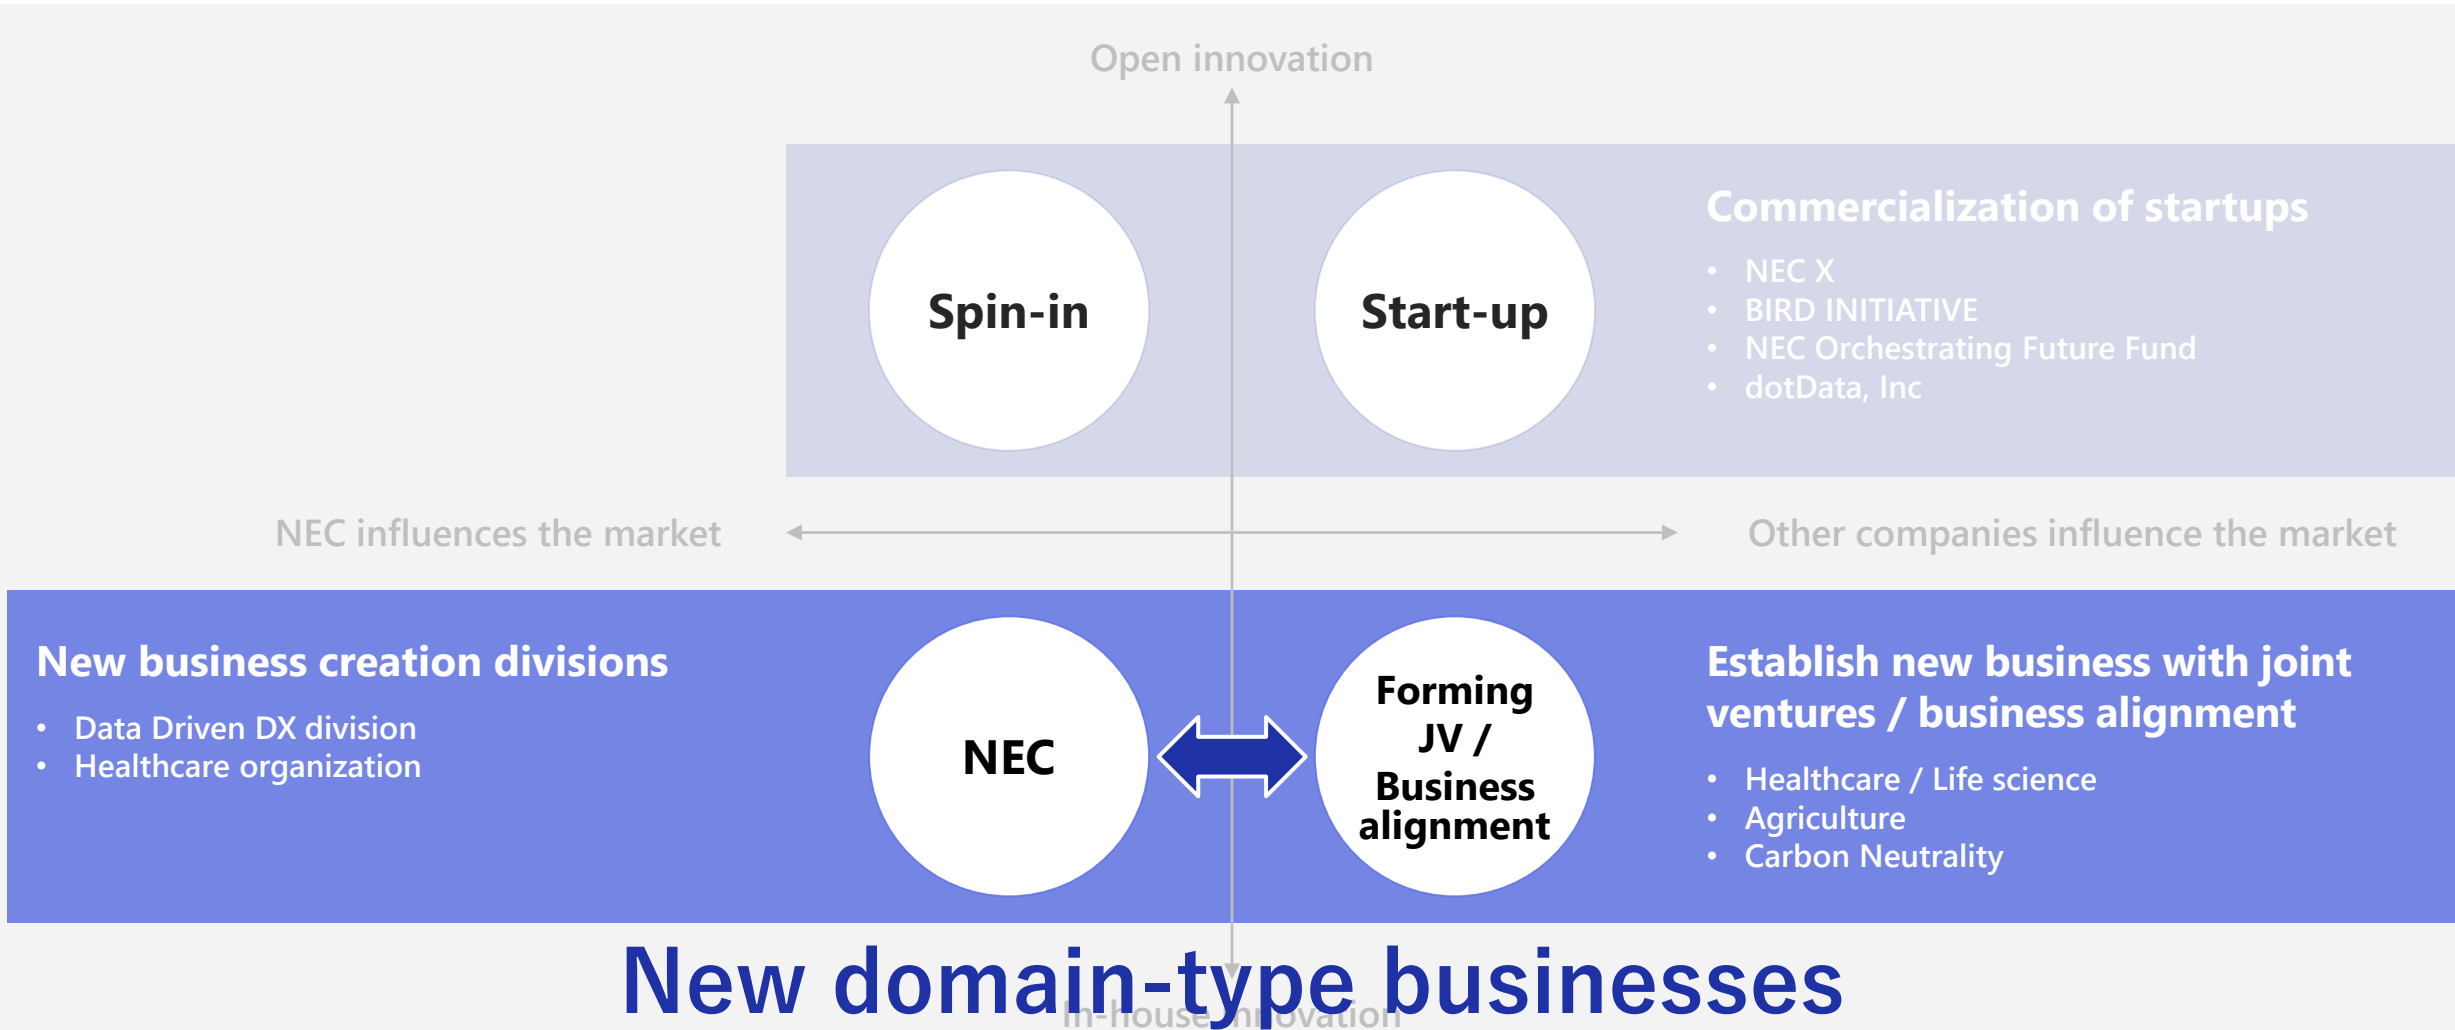

<b>Process</b>	Adopt 'lean startup,' define overall process from generating business idea to commercialization
<b>Investment decision</b>	Investment decision at each milestone of the stage gates set focus areas, exit & pivot through portfolio management
<b>Project evaluation</b>	For business plan after certain market validation, as leading indicator, evaluate maturity and business value periodically by a third party
<b>HR development</b>	With cycle of training / execution / reflection, provide abundant menu to promote growth of biz dev personnel and operate a community of 1600 members for mutual learning & information sharing

# Types of outcomes

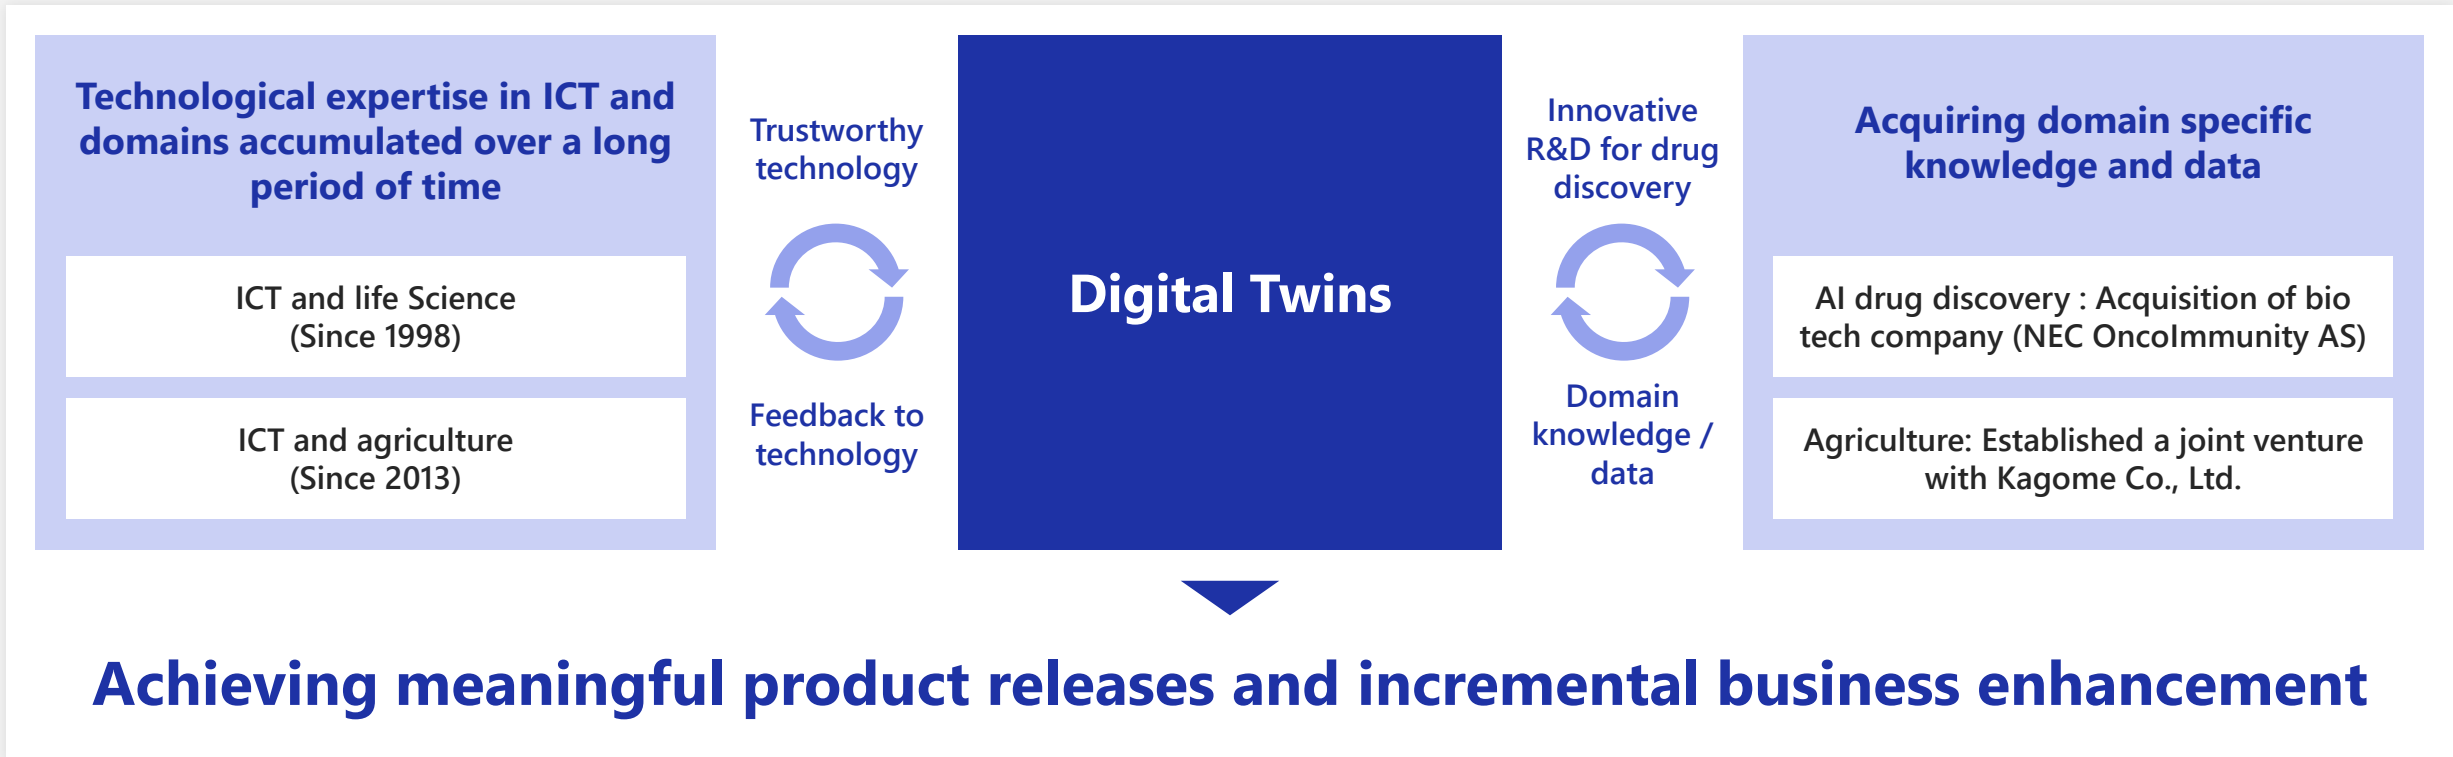

# Types of outcomes

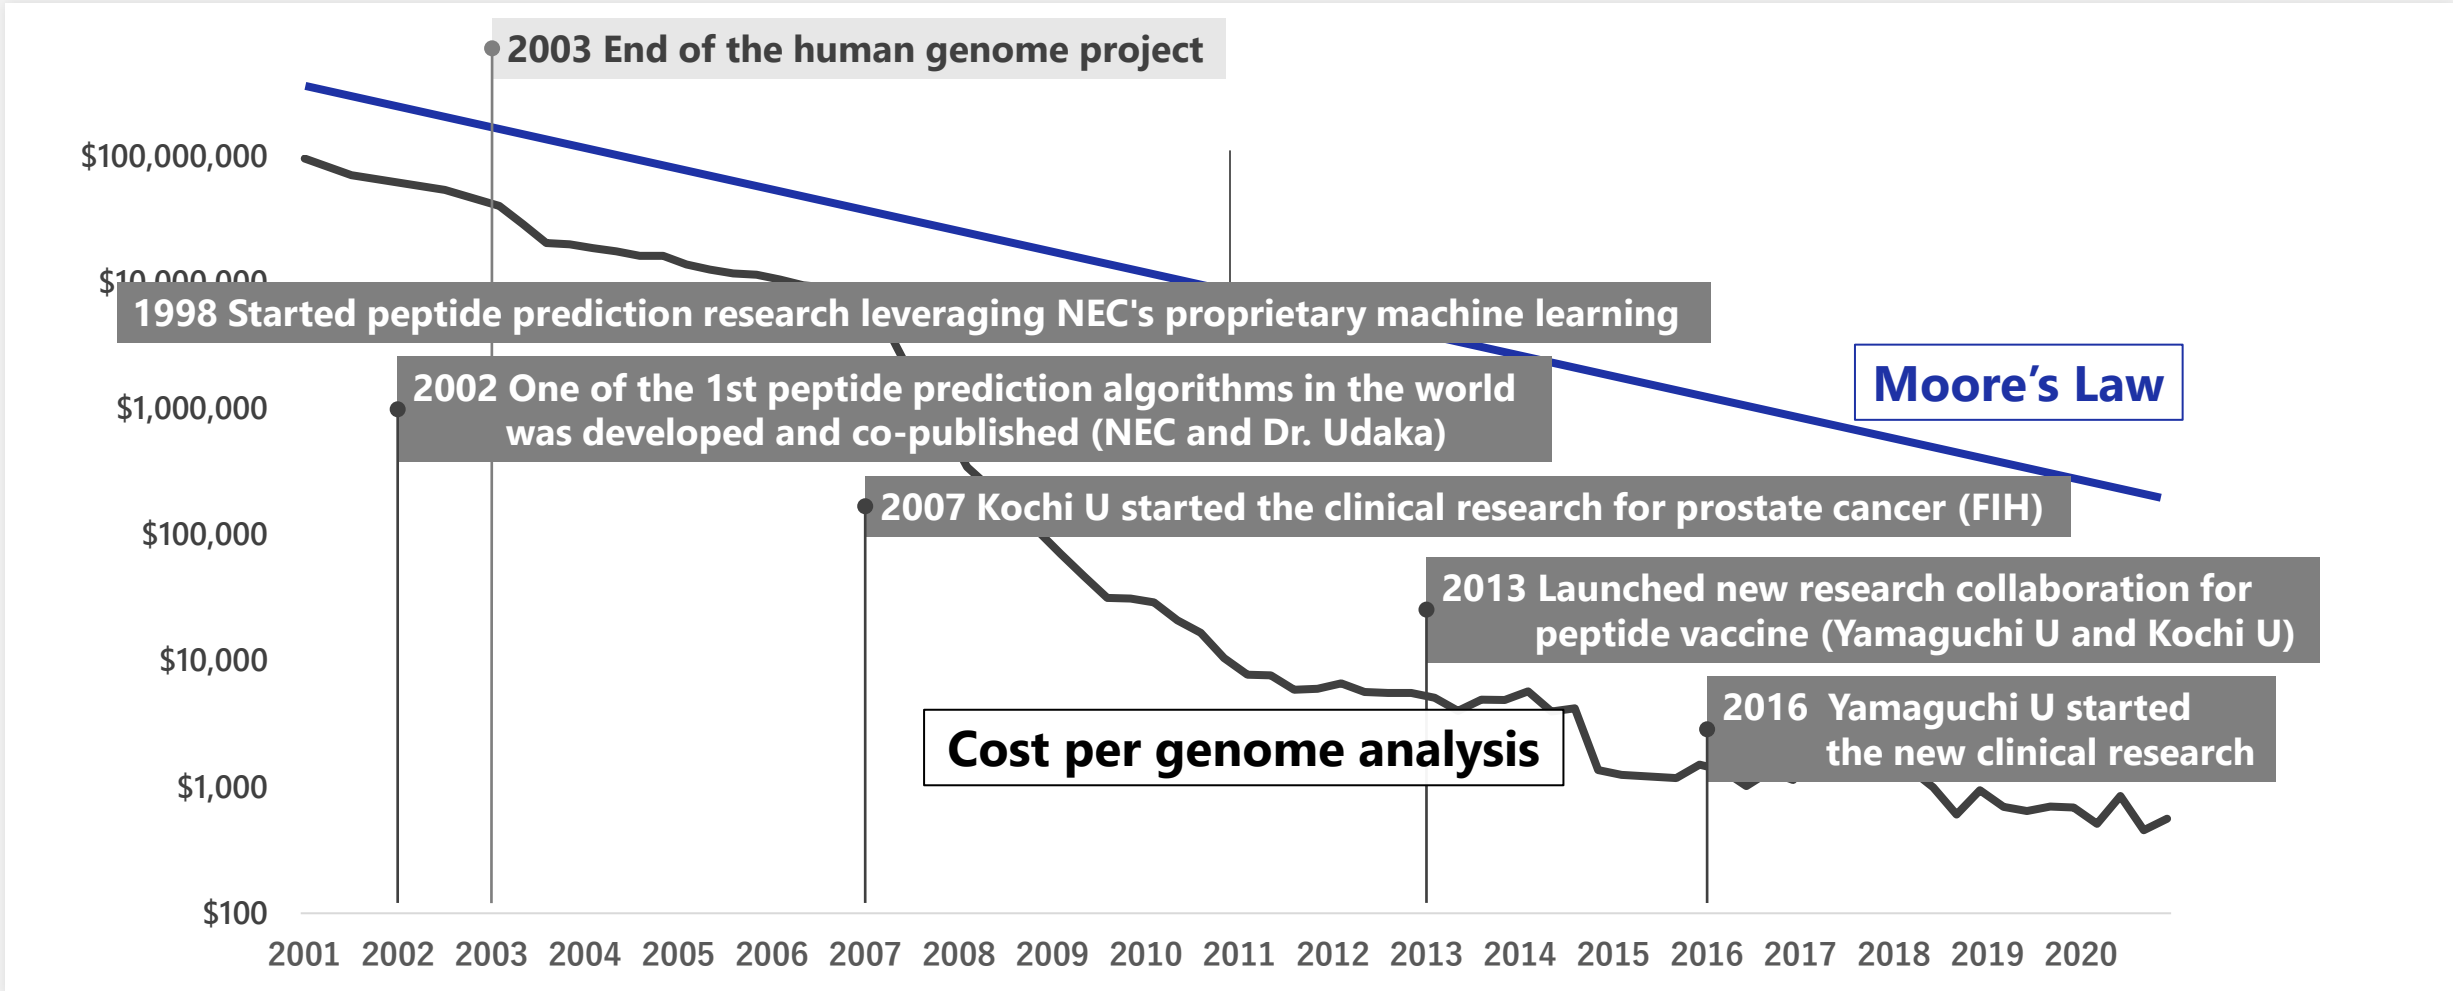

# Characteristics of new domain-type businesses that NEC is undertaking (Healthcare and ICT agriculture)

- Technological expertise in ICT and domains which has been accumulated over a long period of time
- Innovative R&D for drug discovery by incorporating domain knowledge and data from trusted partners into digital twins

# History of NEC Healthcare / Life science research and development

# Expansion to AI drug discovery business (2018~2022)

2018	2019	2020	2021
<p>NEC and transgene announce a collaboration in the field of individualized cancer immunotherapy</p>	<p>NEC invests in BostonGene</p> <p>Partial amendment to the articles of incorporation</p> <p>NEC becomes the first Japanese company to join the TESLA consortium</p> <p>NEC acquires Oncolmmunity AS</p> <p>NEC invests in VAXIMM, and made a co-clinical trial agreement</p>	<p><b>NEC and transgene start clinical trials</b></p> <p>NEC publishes design blueprints for SARS-CoV-2 vaccines</p> <p>NEC and transgene demonstrate high accuracy of AI-based neoantigen prediction</p> <p>NEC and Aichi Cancer Center launch joint research on fundamental study</p> <p>NEC and BostonGene collaborate to analyze cancer patients in clinical trials</p> <p>NEC, Transgene and BostonGene announce strategic collaboration</p> <p>NEC Oncolmmunity AS and Oslo University Hospital team up to develop a diagnostic for COVID-19 using artificial intelligence</p>	<p>NEC joins the CONNECT</p> <p>NEC and transgene announce positive preliminary data from Phase I studies of TG4050,</p> <p>BostonGene and NEC announce global partnership</p> <p><b>2022</b></p> <p>NEC Oncolmmunity acquires VAXIMM's neoantigen vaccine development assets</p> <p><b>CEPI partners with NEC to develop AI-designed broadly protective betacoronavirus vaccine</b></p> <p>NEC and Shionogi enter into strategic research collaboration for Novel Hepatitis B therapeutic vaccine</p>

**NEC**  
NEC Oncolmmunity AS

**transgene**

Started clinical trials of neoantigen vaccines in the US and Europe

**CEPI**

Develop AI-designed broadly protective betacoronavirus vaccine

**Shionogi & Co., Ltd.**

Collaborate on research for novel hepatitis B therapeutic vaccine

# NEC group selected as first Japanese industry partner

CEPI

100 Days

## CEPI

An innovative partnership to develop vaccines against future epidemics

## The 100 Days Mission

Produce safe and effective vaccines in 100 days

NEC's innovative AI-powered vaccine design strategy is leveraged for the development of next-generation vaccine for a wide range of betacoronaviruses

CEPI provides seed funding of up to US\$4.8 million (to initial development)

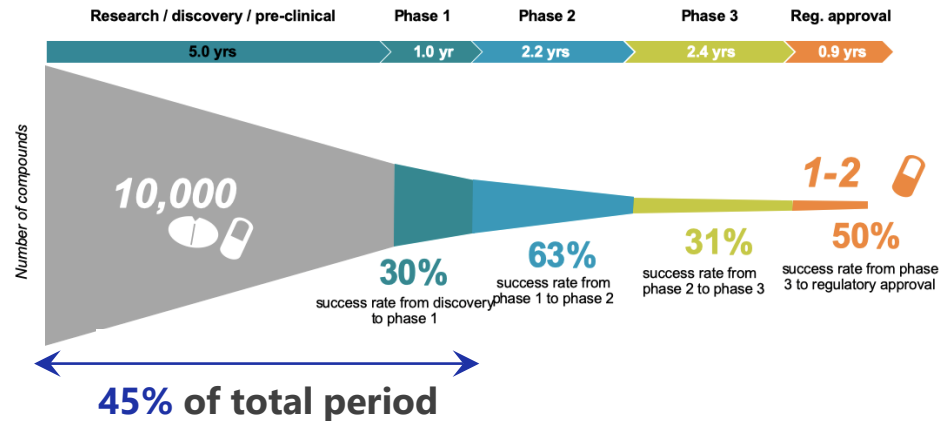

# Innovation for vaccine development against infectious diseases - Toward 100 Days Mission -

Innovate drug discovery process with AI x code optimization x HPC\* technology

Drug discovery issue is the long vaccine design period

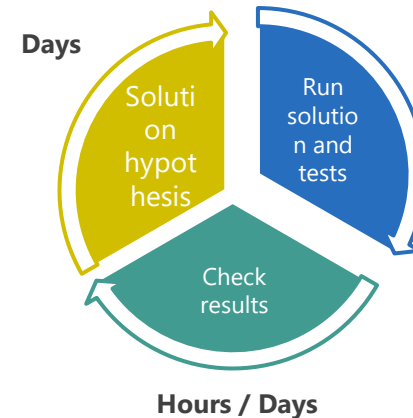

Shorten vaccine design period to less than 1/15

**45 %** of vaccine development period is occupied with “research and design” phase

Most of “research and design” phase is for modeling and numerical simulation of partial differential equations, chemical structures, etc.

**NEC case: 2 times / Y → 30+ times / Y**  
(4 months / trial → 1 week / trial)

**4 Months** ▶ **1 Week**

**Design cycles per 6 months**

**1 Cycle** ▶ **15 Cycles**

Shorten a trial period of a model to less than 1/15 with NEC advanced AI and novel computing optimization technology

# Collaboration with BostonGene

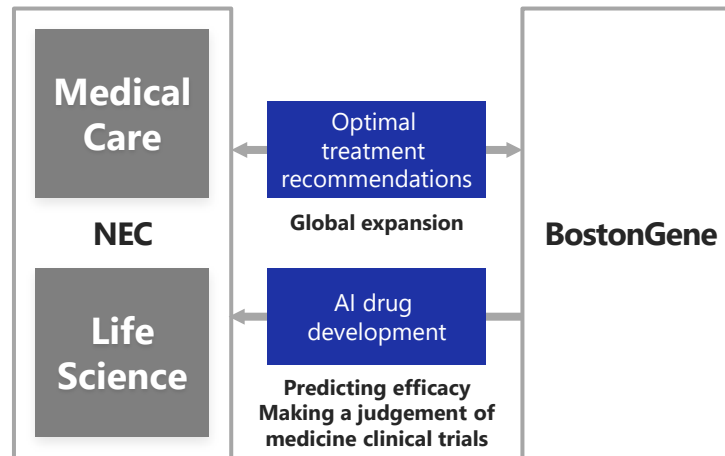

## Scheduled JV establishment to develop AI-based genomic and immunoprofiling products in Japan

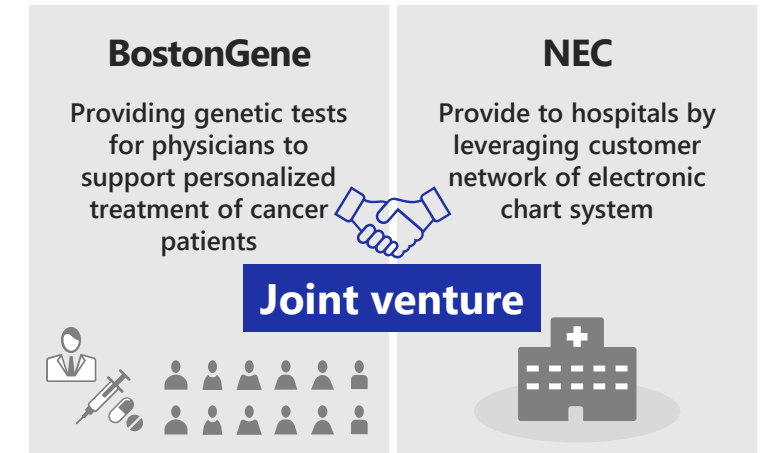

### BostonGene

- Established : 2015
- Location : Waltham MA, USA
- Employees : >400
- Cutting-edge analytics technology : Identifying each immune profile of cancer patient's tumor by combining whole gene next-generation sequencing (NGS) analysis and informatics

### Business Synergy

### Develop markets by leveraging both companies' strengths

# AgriTech with digital twin in agriculture

- Established JV with Kagome Co., Ltd. in Portugal (September 2022) and began operations -

## Establishment of JV with Kagome DXAS agricultural technology LDA

Crop model growth simulation\*1 has succeeded in reducing nitrogen fertilizer by 20%\*2, increasing yields by 20% while reducing irrigation by 15% in Portugal.

\*1 Digital Twin for agriculture \*2 Comparing with common farmer average

## Expansion of target regions and crops Track record of 14 crops in 11 countries

Targeting for NEC consolidated sales of **5 billion** yen by 2025

Expanded to 11 countries

14 crops supported

\* AI farming only provided for tomatoes

# Carbon neutrality challenge

## Carbon credit for disaster prevention

Forest peat fire around 6~9%\*

Reconstruction from flood damage around 1%\*

### Market creation by making it credit for reducing CO2 emission through disaster prevention

- New scheme through NEC-Keio Univ "Creating Knowledge" discussion. In the future, promote creation of technology, business, social systems
- NEC will promote the creation of a credit market and the commercialization of disaster prevention solutions

\* Percentage of global annual CO2 emissions (NEC estimate)

## Creation of high quality carbon offset market

Make natural capital (e.g. forests) of forestry, trading company and so on to carbon credit, then supporting offset for industries and corporations difficult to achieve Net-Zero

# Types of outcomes

## Collaboration with startups-type businesses

NEC influences the market

Other companies influence the market

Open innovation

In-house innovation

**Commercialization of a startup**

- NEC X
- BIRD INITIATIVE
- NEC Orchestrating Future Fund
- dotData, Inc

**New business creation divisions**

- Data Driven DX division
- Healthcare organization

**NEC**

# Expanding new business through dotData, Inc. and NEC's data driven DX business

## Steadily expanding toward corporate value of 50 billion yen as dotData, Inc.

- Series B funding completed in spring 2022 (\$74.6 million cumulative)
- Provided to a cumulative total of approximately 100 companies (more than 80 paid companies, including Fortune 500)

## NEC will provide data driven DX solutions centered on dotData products

- Orders were strong for services such as roadmap development, predictive analysis, human resource development, etc.
- Expanded product lineup including products and cloud services for SMEs
- Standard patterns by industry for data driven DX are improved and expanded to enable global development

**Targeting unicorn level business value by 2025**

### Unique ecosystem - dotData and data driven DX business -

#### Business lead

##### NEC

Hideto Mori,  
Senior executive director,  
Global Innovation Unit

Kohei Haga,  
Executive manager,  
Data driven DX

#### Technology lead

##### dotData, Inc.

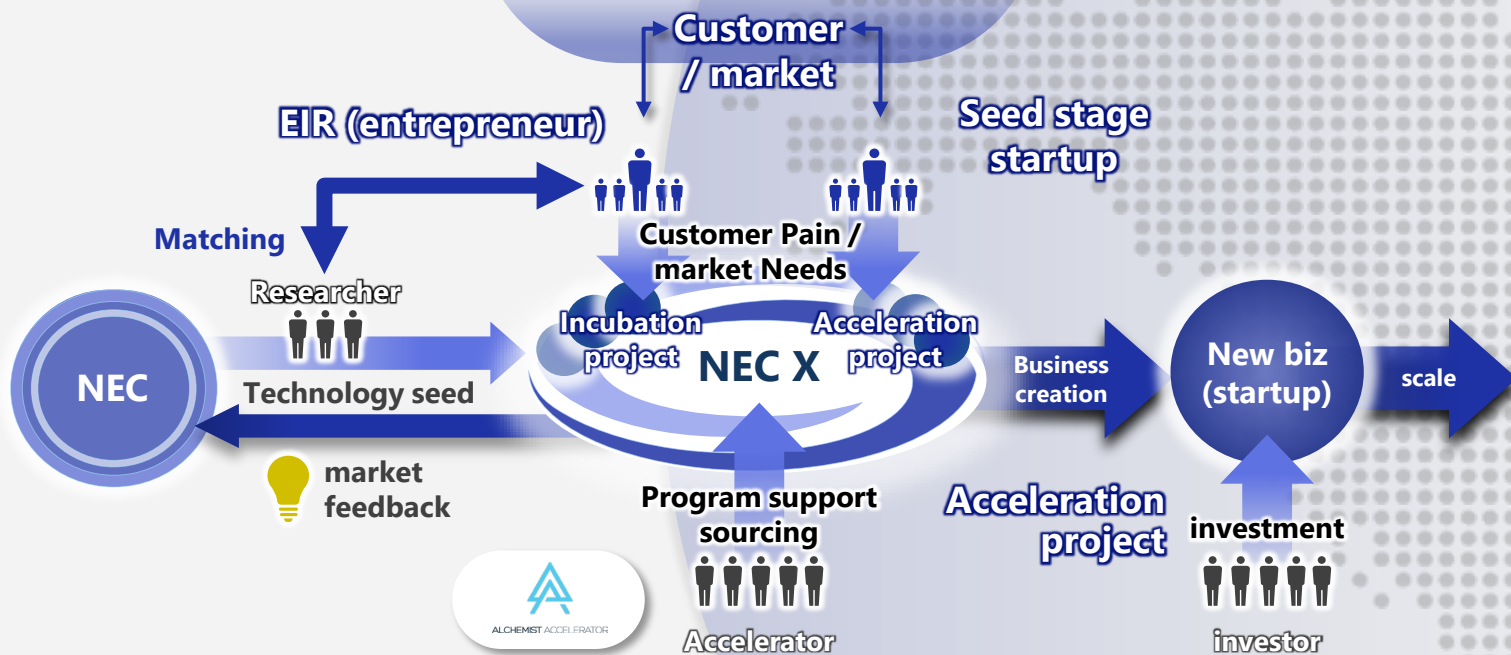

Ryohei Fujimaki,  
CEO & Founder

# New business development with US investors and entrepreneurs

## NEC X (Established 2018)

### Business creation leveraging Silicon Valley resource

### Introduced as case study at Stanford Univ. MBA

"NEC X has evolved from being a new startup itself and is on track to have a success rate that surpasses the norm"

by Charles O'Reilly  
Author of 'Lead and Disrupt'

### Build ecosystem, expand partnership

Mentor from alchemist X and individual guide of NEC X projects

Collaboration with academia

Collaboration with investor network

Expansion of EIR partnership

**5,000 +**

\* Quote from NEC Corporation in 2020: Innovating for the Future, STANFORD BUSINESS, Faculty & Research, Case Studies, Ulrike Schaede, Vanessa Ceia, Charles A. O'Reilly III <https://www.gsb.stanford.edu/faculty-research/case-studies/nec-corporation-2020-innovating-future>

# New business development with US investors & entrepreneurs

## 2021-2022 Launch 7 startups' business

### Metabob

Software services code review and debug support for Software developers  
(announced in May 2021)

Product review comment analysis service for e-commerce sellers  
(announced Jan. 2022)

### BEAGLE TECH

Automated pruning / bud picking SL for farms  
(announced in Apr. 2022)

**Ongoing support after commercialization, including external funding**

### NavigateIO

Infrastructure-free, real-time location-based Solution for first responders  
(announced in July 2022)

Coming soon..

Platform offering employee mental resilience improvement programs

Platform providing matching between real estate brokerage agents and buyers / sellers

Coming soon..

Search and rescue support solution using drones to locate missing persons

# Expanding commercialization of new business creation consulting business as steadily business

## New business creation consulting business by NEC and BIRD INITIATIVE

### Grand design

### Business acceleration

## Innovation from art to science

- Portfolio management
- Hypothesis testing and study
- Examination guides and learning
- Customer acquisition scenario building

▶ Projects supported **34**

Capturing high market growth

▶ CAGR\* **29.2** %

## 6-Company JV

NEC  
OBAYASHI CORPORATION

Japan Industrial Partners, Inc.  
Japan Investment Adviser Co., Ltd.

ITOCHU Techno-Solutions Corporation  
UTokyo Innovation Platform Co., Ltd.

# Business co-creation through the NEC Orchestrating Future Fund

Investment mainly in 6 areas based on the mid-term management plan 2025

5G / 6G	Smart City
DIGITAL GOVERNMENT DIGITAL FINANCE	DX
Healthcare & Life Sciences	Carbon Neutrality

## Results of the first year of the fund's establishment

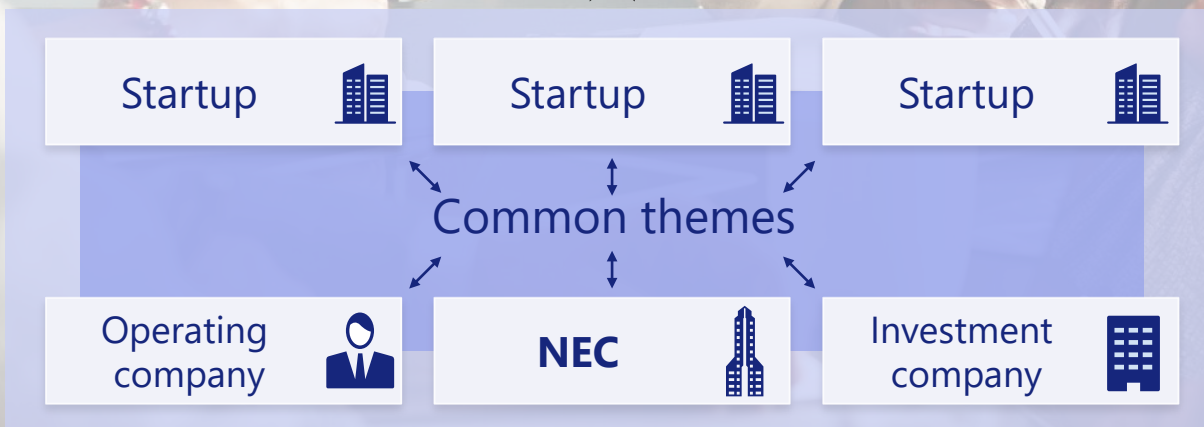

**Raised approx. 20 billion yen**

6 companies including NEC invested

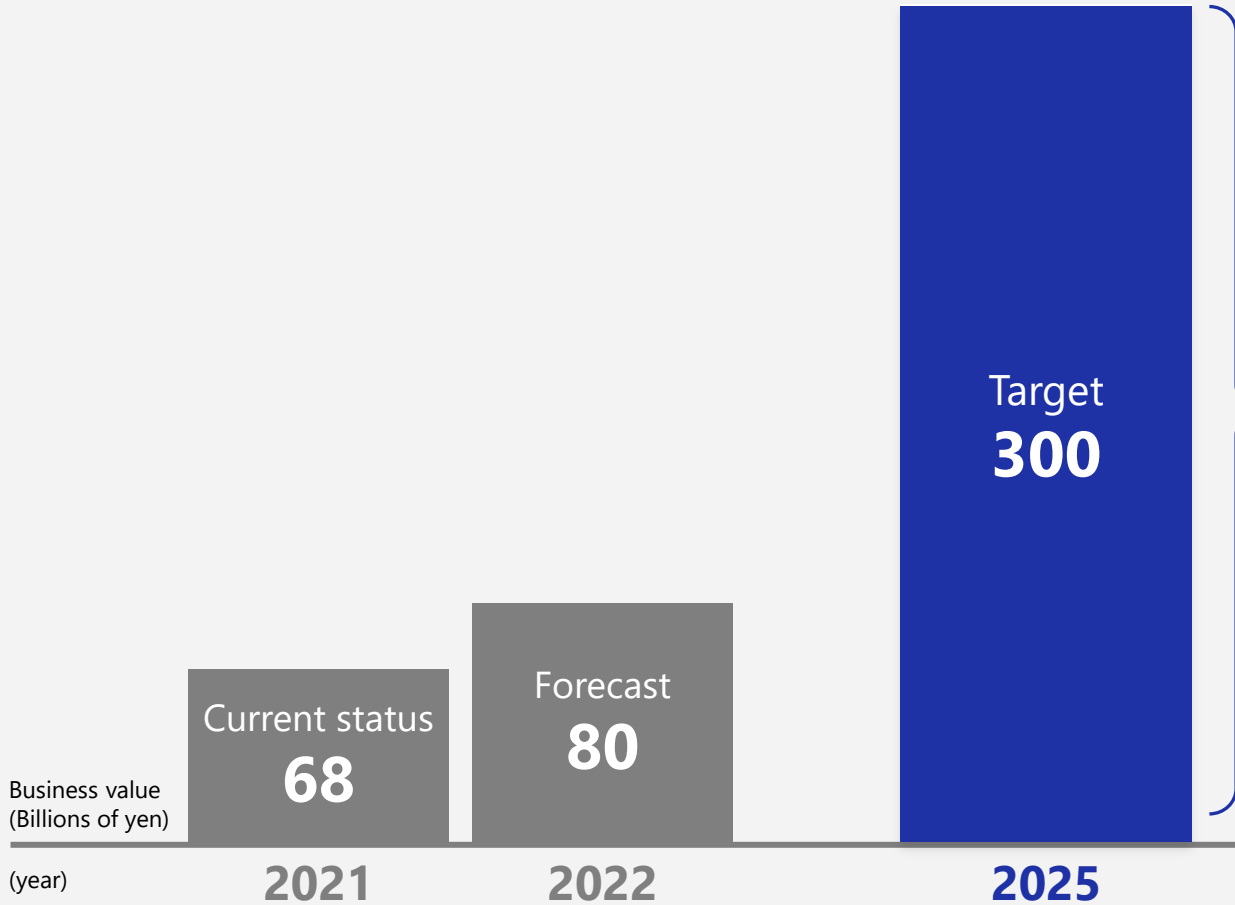

**Invested in 2 companies and started collaboration with 1 company**

Discussions with dozens of companies for collaboration

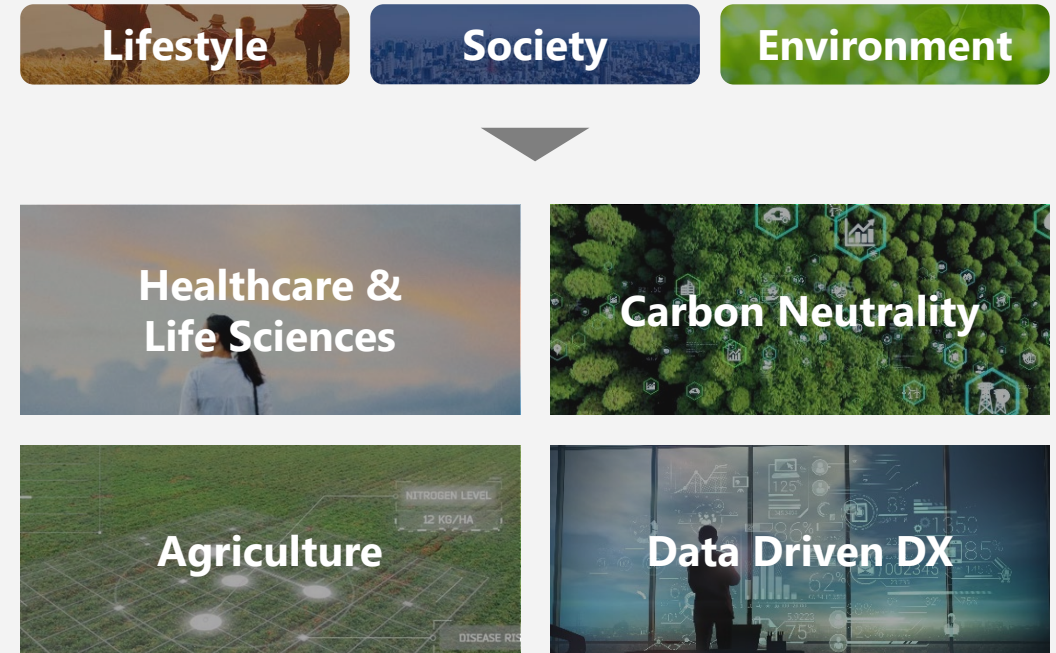

Co-create and formulate eco-system through investments in late stage startups in addition to early stage

# Creating 300 billion yen in business value by fiscal 2025

## Creation of new business areas based on social issues related to NEC 2030VISION

- Total business value of ongoing business development projects.
- Selecting the most appropriate evaluation method according to project characteristics. (e.g., discounted cash flow method, comparable multiple valuation method (multiple), and others)

**01**

Contribution to the mid-term management plan 2025 and NEC 2030VISION based on our global No.1 technology

**02**

Creating new business by cutting-edge business innovations

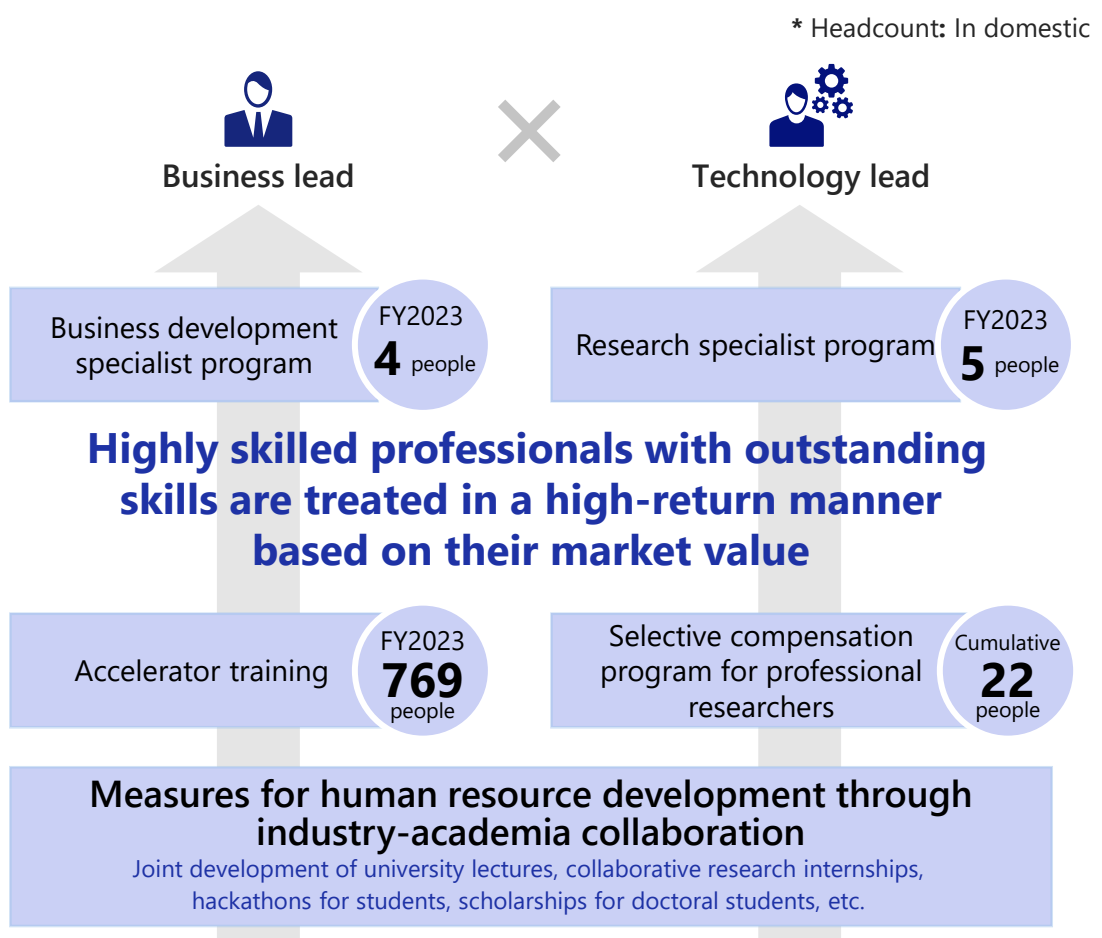

**03**

**Develop people / innovation environment for new growth**

# Development of high potential human resources that bring innovations

## Professionals development system

\* Headcount: In domestic

## NEC DX Innovators 100

44 out of 100 professionals who lead successes in DX were selected from the Global Innovation Unit

**Attracting talented resources from around the world, assigning the right person in the right place**

- Full-scale ability-based human resources management in R&D divisions, with 40% consisting of those in abroad.
- In new business development divisions, approximately 40% were hired mid-career, even as high as 70% in some.

# Leading AI supercomputing center in Japan

The key to competitiveness is enhancing computing power to meet the demands of AI innovation and deep learning

## Computing

**Incorporated 928 units of high-end GPU (580PFLOPS)**

## Network

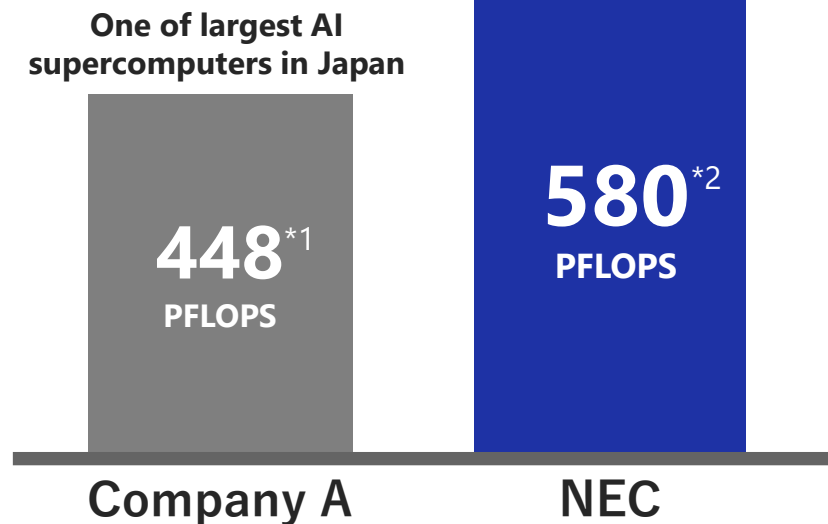

**High-speed / low latency network (200GbE)**

## Storage

**Large capacity / high-speed storage (16PB)**

## The largest AI research supercomputer among Japanese companies

Top among Japanese companies

\*1 Source: NEC (Sum of company A's AI supercomputers performance) August 2022

\*2 Forecast for March 2023. NEC's performance is estimated based on BF16 of A100. Other companies' performance estimated based on FP16 as their BF16 data is not available.

# Establish a global open innovation base in 2025

**Technology demonstrations field for co-creation the future**  
**A place where a variety of people from around the world are invited and where IP value is created by one team**

NEC Partners Universities  
Investors Startups

**Promotes open innovations worldwide and becoming a company that expands the ecosystem for transformation with technological and business innovations.**

\Orchestrating a brighter world

**NEC**
