

# Used-IT-Product Collection and Recycling Rates

\*Recycling rate: The ratio of the weight of reused, material-recycled, and thermal-recycled items to the total weight of the collected IT devices

•Resource-reuse rate: The ratio of the weight of materials that can be used as recycled products (parts reuse) or resources (material recycling) to the total weight of the collected IT devices (defined by the Law for the Promotion of Effective Utilization of Resources)

## Breakdown of Collected and Recycled Products

	Home	Business
PCs	291	140
General-use Computers	—	29
Servers	—	85
Printers	—	156
Others	—	373

## Reuse of Parts for Maintenance collected from used-products

	Number of parts recovered
2018	7,299
2019	5,772
2020	5,768
2021	3,308
2022	2,258
2023	1,193
